<b>2010 Australian Infant Feeding Survey (ANIFS)</b>	The 2010 Australian National Infant Feeding Survey (ANIFS) gathered information about infant feeding practices and attitudes from a sample of mothers and carers in Australia. The survey gathered information about the prevalence and duration of breastfeeding and collected information on other foods consumed by infants. The survey also gathered information about barriers to initiating and continuing breastfeeding and gathered information about perinatal depression.	1/03/2010	31/03/2011	National	Publications; There are restrictions and limitations governing the availability or use of other data in this holding.	Mothers or primary carers of infants aged up to 24 months. Sample selected from the Medicare enrolment database.	Survey		2010 ANIFS indicator results Researchers can access a confidentialised unit record file through the <a href="#">Australian Data Archive</a> .	bernice.cropper@aihw.gov.au	
<b>2010 National Drug Strategy Household Survey Master Unit Record File</b>	This is the tenth in a series of surveys auspices by the National Drug Strategy (and its predecessors) and the fifth to be conducted by the AIHW. It is a national household survey of non-institutionalised persons aged 12 years and over. There were 26,648 completed responses in 2010. Fieldwork was conducted by Roy Morgan Research.	29/04/2010	14/09/2010	National and State	Publications; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	The estimates for 2010 contained in this publication are based on information obtained from people aged 12 years or older or 14 years or older (as specified) from all states and territories. The scope of the survey was residential households, and excluded institutional settings, hostels, motels and homeless people. Foreign language interviews were not conducted.	Survey	<a href="http://meteor.aihw.gov.au/content/index.phtml/itemId/511160">http://meteor.aihw.gov.au/content/index.phtml/itemId/511160</a>	<a href="http://www.aihw.gov.au/publication-detail/?id=32212254712">http://www.aihw.gov.au/publication-detail/?id=32212254712</a>	aod@aihw.gov.au	
<b>2013 National Drug Strategy Household Survey Master Unit Record File</b>	This is the eleventh in a series of surveys auspices by the National Drug Strategy (and its predecessors) and the sixth to be conducted by the AIHW. It is a national household survey of non-institutionalised persons aged 12 years and over. There were 23,855 completed responses in 2013. Fieldwork was conducted by Roy Morgan Research.	31/07/2013	1/12/2013	National and State	Publications; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	Private dwellings from people aged 12 years or older. Excluded from sampling were non-private dwellings (hotels, motels, boarding houses, etc.) and institutional settings (hospitals, nursing homes, other clinical settings such as drug and alcohol rehabilitation centres, prisons, military establishments, and university halls of residence). Homeless persons were also excluded as well as the territories of Jervis Bay, Christmas Island and Cocos Island. <b>Alcohol and Other Drug Treatment Services (National Minimum Data Set)</b>	The Alcohol and Other Drug Treatment Services National Minimum Data Set (AODTS NMDS) emanated from the national forum 'treatment and research - where to from here?' held in 1995 by the Alcohol and Other Drugs Council of Australia. In December 1999 the Commonwealth and state and territory governments through the then National Health Information Management Group endorsed a version of the AODTS NMDS for collection to commence on 1 July 2000. The first data were collected for 2000-01; this was considered a pilot year. The data from 2001-02 onwards contain information about alcohol and other drug treatment services; the clients who use these services; the types of drug problems for which treatment is sought and the types of treatment provided.	1/07/2000	30/06/2020	National; National and State; Other	Publications; Data cubes; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; Unit records are not available	Government publicly funded alcohol and other drug treatment specialist services, national. <b>Australasian Paediatric Endocrine Group dataset (APEG)</b>	The APEG dataset contains information on young people with insulin-treated diabetes aged 0–14 years at the time of diagnosis. As insulin-treated type 2 diabetes is rare in children under 15 years old, most of the children and adolescents listed on the APEG dataset have type 1 diabetes. APEG data are primarily used by the AIHW (together with National Diabetes Services Scheme (NDSS) Registrant data; NDSS Sales data and National Death Index (NDI) data) to create the National (insulin-treated) Diabetes Register (NDR).	1/01/1999	31/12/2020	National and State	Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	Incident cases of insulin-treated diabetes in young people aged 0–14 years at the time of diagnosis, 1999–2016, Australia. Due to concerns about the coverage of data in 1999, most reporting begins in 2000. <b>Australian Burden of Disease Database</b>	The Australian Burden of Disease Database contains aggregated output of burden of disease metrics from the Australian Burden of Disease Study. This includes Years of life lost (YLL), Years lived with disability (YLD) and Disability-adjusted life years (DALY) for around 200 diseases and injuries. It also includes estimates of attributable burden (DALY) for around 30 risk factors.	1/01/2003	31/12/2018	National and State	Publications; Summary tables published in electronic form; Client specified tables on request which may be subject to data provider approval (charges apply); Unit records are not available	The Australian Burden of Disease Database was established as part of the Australian Burden of Disease Study 2011 to set up the relevant infrastructure to enable efficient and timely ongoing updates by the AIHW as required.  The database is updated and added to following the completion of each ABDS. It currently includes national estimates of disease burden and risk factor attribution for 2003, 2011, 2015 and 2018. Subnational estimates of disease burden are available for state/territory, remoteness, and socioeconomic group for 2011, 2015 and 2018. Subnational estimates of risk factor attribution are available for socioeconomic group for 2015 and 2018. Indigenous-specific estimates of disease burden and risk factor attribution are available for 2003, 2011 and 2018. All data are available by 5 year age group and sex.	Admin data; Official; Survey	N/A	For more information on burden of disease data and related publications by AIHW see: <a href="http://www.aihw.gov.au/burden-of-disease/">http://www.aihw.gov.au/burden-of-disease/</a>	<a href="mailto:burdenofdisease@aihw.gov.au">burdenofdisease@aihw.gov.au</a>	
<b>Australian Cancer Database</b>	The Australian Cancer Database (ACD) contains data about all new cases of cancer diagnosed in Australia since 1 January 1982, excluding basal and squamous cell carcinomas of the skin.  Cancer is a notifiable disease in all Australian states and territories. The relevant legislation requires certain individuals and organisations to notify all new cases of cancer to the jurisdiction's central cancer registry. These registries supply data annually to the AIHW, which cleans and standardises the data, notifies the registries of inter-state duplicates and produces the Australian Cancer Database.	1/01/1982		National and State	Publications; Data cubes; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; There are restrictions and limitations governing the availability or use of other data in this holding. <b>Australian Government housing data set (AGHDS)</b>	The AGHDS is a confidentialised unit record file that provides point in time data for income units in receipt of Centrelink social security payments and families receiving Family Tax Benefit (FTB) Part A.	30/06/2006	25/06/2021	National and State	Publications; Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). There are restrictions and limitations governing the availability or use of other data in this holding.	Combines information from numerous Centrelink files to create records at an income unit level, rather than person or household level. An income unit consists of a person, the person's partner, and any children for whom the couple may receive FTB Part A. Single social security recipients living together in the same household are regarded as separate income units. One person in each income unit is classified as the primary reference person based on sex and the type of payment received.  Includes information about type of housing, amount of weekly income, payment type and other characteristics of income units.	Admin data	A data dictionary is available on request	<a href="#">Housing assistance in Australia</a>	<a href="mailto:housing@aihw.gov.au">housing@aihw.gov.au</a>	
<b>Australian Gulf War veterans' health study: mortality and cancer incidence study, AIHW data collection.</b>	This was a study of cancer outcomes and mortality among Australian veterans of the 1991 Gulf War and a randomly selected military comparison group. AIHW linked the study cohort to the NDI and Australian Cancer Database (ACD). A data collection application for this dataset has been submitted to the AIHW Ethics Committee but has not yet been accepted. Until the application is accepted, no data from this collection can be analysed or released.	1/01/1980	31/12/2011	National	Publications; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). <b>Australian Mesothelioma Registry database</b>	The Australian Mesothelioma Registry (AMR) has been operational since 2011. The AMR was managed by the Cancer Institute New South Wales (CINSW) until 31 August 2017. Since then, the AMR has been managed by the AIHW. The AMR is funded by Safe Work Australia (SWA).  Since 2011, the AMR has collected information on new cases of mesothelioma diagnosed in Australia from 1 July 2010. The eight state and territory cancer registries provide incidence and mortality data on new cases of mesothelioma to the AMR. These records include demographic information and details of diagnosis and death.  The AMR also collects asbestos exposure information, obtained from consenting mesothelioma patients through a postal questionnaire and telephone interview. The postal questionnaire collects information on a patient's residential history, occupational history and family history of mesothelioma. The telephone interviews collect additional information, based on responses to the postal questionnaire, to assess the likelihood of asbestos exposure.	1/07/2010		National and State	Publications; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	The notifications data include all cases of mesothelioma diagnosed in Australia since 1 July 2010. Asbestos exposure data includes all consenting patients diagnosed with mesothelioma in Australia since 1 July 2010, who are physically and mentally able to participate. <b>Child Protection National Minimum Dataset (CP NMDS)</b>	<p>The Child Protection National Minimum Data Set (CP NMDS) is an annual collection of information on child protection in Australia. It contains data on children who come into contact with State and Territory departments responsible for child protection. The CP NMDS consists of the following data files: client demographics; notifications, investigations and substantiations; care and protection orders; living arrangements, including children in funded out-of-home care; carer households; data for reporting on National Out-of-Home Care Standards measures. Where possible, data are also collected on sibling relationships.</p> <p>The CP NMDS collection was implemented in 2012–13. Prior to that a national aggregate child protection data collection was used for national child protection reporting (data for this collection began in 1990–91).</p> <p>Some data are still collected in aggregate format in Excel spreadsheets.</p> <p>The data are published annually by AIHW and are also used for the Report on Government Services.</p>	30/06/2012		National and State	Publications; Summary tables published in electronic form; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). <b>Community Care</b>	This is administrative by product data for the Community Aged Care Packages (CACP) Program, Extended Aged Care at Home (EACH) packages and EACH-DEMENTIA (EACHD), and the Transition Care Packages Program. These are all programs designed to enable frail older people with complex care needs to continue living in the community. This is the source of the data for the publication by the AIHW on Community Aged Care packages which has its origins in CACP reporting. Transition care is Commonwealth/State funded but other programs receive recurrent Commonwealth funding. Home and Community Care (HACC) is reported annually by DoHA and reports are available on their website. The Institute receives a copy of the annual HACC MDS.	30/06/1992	30/06/2009	National	Publications	All recipients of mainstream community aged care packages, EACH and EACHD programs and the Transition Care program. <b>Community Housing (CH) data collection</b>	<p>The Community Housing (CH) data collection captures information about CH organisations, the dwellings they manage and the tenants assisted.</p> <p>CH is rental housing for low- to moderate-income or special-needs households. It is managed by community-based organisations that lease properties from government or have received a capital or a recurrent subsidy from government. CH models vary across states and territories, and the housing stock may be owned by a variety of groups including government.</p> <p>The data are supplied by state and territory housing departments on an annual basis. Since 1996–97, the AIHW has compiled CH data from state and territory housing departments on an annual basis. These data help to describe the performance of the current National Housing and Homelessness Agreement and the former National Affordable Housing Agreement and Commonwealth-State Housing Agreement.</p> <p>The data collection has evolved over time. Changes have occurred to data collection scope, procedures, data items and underlying definitions and concepts.</p>	1/07/1996	30/06/2021	National and State	<p>Publications; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>CH includes tenancy (rental) units under management of a CH organisation, excluding Indigenous CH organisations. CH excludes dwellings:</p> <ul style="list-style-type: none"> <li>• where the tenancy is managed under: Public Housing; State and Territory Owned and Managed Indigenous Housing; Indigenous CH; or the Crisis Accommodation Program.</li> <li>• no longer administered by a CH organisation at 30 June of the reference financial year (including dwellings demolished, sold or otherwise disposed of).</li> <li>• not yet available to CH organisations at 30 June of the reference financial year (e.g. under construction or being purchased).</li> </ul> <p>Additional jurisdiction-specific inclusions and exclusions reflect: different definitions of CH in legislation; difficulties in identifying some organisations e.g. those not registered or funded by the state/ territory housing authority; inconsistencies in reporting e.g. inclusion of transitional housing and National Rental Affordability Scheme dwellings owned or managed by CH organisations.</p> <p>Currently:</p> <ul style="list-style-type: none"> <li>• NSW, Vic, WA, SA, Tas and ACT supply unit record level data, including details on individuals, organisations, dwellings and associated tenancies of the organisations.</li> <li>• Qld supplies aggregate data supplemented by unit record administrative data for funded organisations, properties and current waitlist applications.</li> <li>• NT supplies finalised aggregate data, including dwelling and organisational level data, but not information on individual tenancies or persons.</li> <li>• Data are incomplete for some jurisdictions due to non/under-reporting by CH organisations.</li> </ul>	Admin data	<p><a href="#">Community Housing Data Set Specification</a></p> <p><a href="#">Community Housing Data Collection Data Quality Statement</a></p>	<p><a href="#">Housing assistance in Australia</a></p> <p><a href="#">Report on government services</a></p> <p><a href="#">Australia's welfare</a></p>	<a href="mailto:housing@aihw.gov.au">housing@aihw.gov.au</a>

<b>Disability Services National Minimum Data Set (DS NMDS)</b>	<p>Since 1991, data was collected and reported on disability support services in Australia have been provided under four national disability agreements. The Commonwealth/State Disability Agreement Minimum Data Set (CSDA MDS) collection was set up as a 'snapshot' data collection in 1994, following the signing of the first CSDA in 1991. The second CSDA, signed in 1998, reflected significant changes which meant the CSDA MDS collection needed to be redesigned, including changing the collection to be a full year data collection. In 2002-03, the redeveloped CSDA MDS became the Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS), and the first full financial year of data collection took place between 1 July 2003 and 30 June 2004. The National Disability Agreement (NDA) replaced the CSTDA on 1 January 2009. As a result of the implementation of the NDA, from 2009-10 the CSTDA NMDS was renamed the DS NMDS. From 1 July 2013, state and territory-based disability support services provided under the NDA were progressively transitioned over to the National Disability Insurance Scheme (NDIS). This has meant that 2018-19 was the last year for which DS NMDS was data collected and reported.</p>	1/07/1994	30/06/2019	National and State	Publications; Data cubes; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). <b>Indigenous Community Housing (ICH) data collection</b>	The Indigenous Community Housing (ICH) data collection captures information about ICH organisations (ICHOs), the dwellings they manage, and tenants assisted. ICHOs include community organisations such as resource agencies and land councils, which may have a range of functions, however are included in ICH provided that they manage housing for Indigenous people. ICHOs may either directly manage the dwellings they own or sublease tenancy management services to the relevant state/territory housing department or another organisation. Since 2003–04, the AIHW has compiled ICH data from state and territory housing departments on an annual basis. These data help to describe the performance of Indigenous housing programs. The data collection has evolved over time, including changes to the data collection scope, procedures, data items and underlying definitions and concepts.	1/07/2003	30/06/2021	National and State	Publications; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; There are restrictions and limitations governing the availability or use of other data in this holding.	Inclusions: dwellings that are targeted to Indigenous people and ICHOs that provide medium- to long-term housing tenure to tenants.  Excludes dwellings: • managed under Community Housing, Public Housing, State Owned and Managed Indigenous Housing, or the Crisis Accommodation Program • no longer under the administration of an ICHO at 30 June of the reference year (including dwellings demolished, sold or otherwise disposed of) • not yet available to the ICHO at 30 June of the reference year (such as those still under construction or being purchased).  Apart from the following, the data collection focuses on dwellings managed by funded ICHOs only (for NSW, this means excluding not actively registered ICHOs): • Number of permanent dwellings managed by funded and unfunded organisations at 30 June • Number of funded and unfunded ICHOs at 30 June.  There is no ICH program in the ACT. <b>Maternity Model of Care Data Set</b>	The Model of Care Data Set (MoC DS) is a national maternity service-based data collection that contains data about the maternity Models of Care offered by maternity services. The data elements within this dataset reflect the characteristics of 11 major models of care, under which women would be cared for by a health professional. The MoC DS reflect maternity plans at the population level, not the individual. As such no individual unit record data is held in this collection.	1/01/2018	30/04/2021	National; National and State	Publications; Unit records are not available	The Maternity model of care (MoC) National best practice data set (NBPDS) is not mandated for collection. This data set enables maternity care providers to classify models of care using the Maternity Care Classification System (MaCCS).  The scope of the data set is all models of maternity care available to pregnant and birthing women.  The MaCCS, utilising the NBPDS provides a standardised nomenclature and descriptive data for maternity models of care. National collation of these data enables meaningful analysis and comparisons of maternal and perinatal outcomes between differing models of care. The data elements in the NBPDS describe the different characteristics of models of maternity care based on three domains:  •the women a model is designed for; •the carers working in the model; and •aspects of how care is provided.  The development of the MaCCS and the MoC NBPDS was undertaken as part of the National Maternity Data Development Project under the guidance of an expert advisory group and included wide-reaching consultation with relevant stakeholder groups around the country	Admin data	See Maternity model of care (MoC) National best practice data set (NBPDS)	Nomenclature for models of maternity care: a consultation report <a href="https://www.aihw.gov.au/reports/mothers-babies/nomenclature-for-models-of-maternity-care-a-consu/contents/table-of-contents">https://www.aihw.gov.au/reports/mothers-babies/nomenclature-for-models-of-maternity-care-a-consu/contents/table-of-contents</a> Maternity Care Classification System: Maternity Model of Care Data Set Specification national pilot report November 2014 <a href="https://www.aihw.gov.au/reports/mothers-babies/maternity-care-classification-system-maternity-mo/contents/table-of-contents">https://www.aihw.gov.au/reports/mothers-babies/maternity-care-classification-system-maternity-mo/contents/table-of-contents</a>	<a href="mailto:maccs@aihw.gov.au">maccs@aihw.gov.au</a>

<b>national Key Performance Indicators (nKPIs) for Indigenous-specific primary health care</b>	The national Key Performance Indicators (nKPIs) are a set of indicators reported by organisations receiving funding under the Australian Government's Indigenous Australians' Health Programme (IAHP) to deliver comprehensive and culturally appropriate primary health care services to Indigenous Australians. Data are collected against set of indicators focusing on maternal and child health, preventative health, and chronic disease management. The collection commenced in June 2012 and is ongoing with data being collected every 6 months from over 200 Indigenous-specific primary health care organisations across Australia.	30/06/2012	31/12/2021	National and State; Other	Publications; Client specified tables on request which may be subject to data provider approval (charges apply); Unit records are not available; There are restrictions and limitations governing the availability or use of other data in this holding.	Collected from the over 200 organisations funded under the Australian Government's Indigenous Australians' Health Programme (IAHP), data are counts of Indigenous regular clients (those who attended an organisation 3 times in 2 years) against a set of indicators focusing on maternal and child health; preventative health; and chronic disease management.	Official	Information on the indicators and associated data collection can be found in the <a href="#">data collection guide</a> for each period and on METeOR. <a href="#">Data quality statements</a> for each collection period are also available via METeOR.	The latest available data from the nKPI collection can be found at <a href="#">Aboriginal and Torres Strait Islander specific primary health care: results from the nKPI and OSR collections, About - Australian Institute of Health and Welfare (aihw.gov.au)</a> . <b>National Rheumatic Heart Disease data collection</b>	The National Rheumatic Heart Disease Data Collection (NRHDDC) comprises information from jurisdictional registers of notified cases of acute rheumatic fever/rheumatic heart disease (ARF/RHD). It is a de-identified population-based collection, initiated as part of the Australian Rheumatic Fever Strategy 2009, funded by the Australian Government Department of Health.  The data collection will enable reporting on the Key Performance Indicators (KPIs) of the Strategy, reporting local level data to jurisdictional registers and supporting relevant data development activities. This will contribute to efforts to reduce the incidence of ARF and RHD in Australia, which are among the highest in the world.  Data from NSW are sent to the AIHW also, though this is not funded through the RFS.	1/01/2016	31/12/2020	NSW; QLD; WA; SA; NT	Publications; Summary tables published in electronic form; Client specified tables on request which may be subject to data provider approval (charges apply)	The information collected is de-identified unit record data about living and deceased individuals affected by ARF and/or RHD. The collection contains demographic data (age, sex, Indigenous status), information about clinical diagnosis (diagnosis and notification dates), disease progression, clinical severity, secondary prophylaxis and surgical management. The data will be used in at least four ways. - to monitor and report program effectiveness in the detection and management of ARF/RHD in Australia, as measured by the KPIs under the Rheumatic Fever Strategy. - for reporting against the relevant indicators in the Health Performance Framework report. - for reporting against the relevant indicators in the Better Cardiac Care report. - Regular (unpublished) jurisdictional-level data reports, as per jurisdictional requirements, to be supplied to individual jurisdictions. Online Services Report (OSR) for Indigenous primary health care	The OSR is reported by organisations receiving funding under the Australian Government's Indigenous Australians' Health Programme (IAHP) to deliver comprehensive and culturally appropriate primary health care services to Indigenous Australians. It contains contextual information about each organisation as well as aggregate counts of number of clients, episodes of care and FTEs. Prior to 2018-19, the OSR also included data collected from organisations funded by the Department of Health and/or the Department of Prime Minister and Cabinet (function now sitting within the National Indigenous Australians Agency (NIAA)) to provide one or more of the following health services to Aboriginal and Torres Strait Islander people: primary health care; maternal and child health care (between 2012-13 and 2017-18); social and emotional wellbeing services; and substance-use services.	1/07/2008	30/06/2021	National and State; Other	Publications; Summary tables published in electronic form; Client specified tables on request which may be subject to data provider approval (charges apply); Unit records are not available	Data on the over 200 organisations funded under the Australian Government's Indigenous Australians' Health Programme (IAHP). <b>Risk Factor Prevalence Survey Data Collection</b>	There were three Risk Factor Prevalence Surveys (RFPS) run in 1980, 1983 and 1989. These surveys gathered information about the prevalence of heart disease risk factors in adult Australians living in State and Territory capital cities. The surveys gathered self-reported health and demographic information, measured height, weight and blood pressure and collected blood samples for analysis. In all three surveys the blood samples were tested for total cholesterol, HDL cholesterol and triglyceride levels. For the 1989 survey additional analysis of the blood samples was carried out to test blood iron, ferritin and transferrin levels.	1/05/1980	1/06/1989	National	Publications; There are restrictions and limitations governing the availability or use of other data in this holding.	For the 1980 and 1983 survey participants were adults aged 25-64 years randomly selected from the electoral roll and recruited from defined catchment areas in the 6 State capitals. Canberra and Darwin were excluded. For the 1989 survey participants were adults aged 20-69 years recruited from defined catchment areas in the 6 State capitals, as well as Canberra and Darwin. <b>Specialist Homelessness Services Collection (SHSC)</b>	<p>The SHSC collects information about people who are referred to, or seek assistance from, specialist homelessness services (SHS) agencies. These services collect the data on an ongoing basis and are responsible for submitting the data to the AIHW on a monthly basis.</p> <p>There are two parts to the SHSC — a Client collection and an Unassisted Persons collection.</p> <ul style="list-style-type: none"> <li>• The Client collection captures information on adults and children who receive a service from an SHS agency.</li> <li>• The Unassisted Person collection is used to gain information about adults and children whose request for service is not able to be met by an SHS agency.</li> </ul>	1/07/2011		National and State	Publications; Data cubes; Summary tables published in electronic form; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; There are restrictions and limitations governing the availability or use of other data in this holding.	<p>Client collection - The base unit is a person who presents to an SHS agency requesting services. A person becomes a 'client' once they receive a service(s). A 'support period' is the period of time a client receives assistance from a SHS agency. It relates to the provision of a service and/or supported accommodation. During a support period, a range of services additional to supported accommodation can be provided. Detail on types of services provided is also available.</p> <p>Unassisted persons collection - Comprises information on the number of instances where a person received no immediate services from a SHS agency.</p> <p>Details of all agencies participating in the SHSC are on the Specialist Homelessness Establishment Database file.</p> <p>Information is submitted to the AIHW monthly.</p>	Admin data	<p><a href="#">Specialist Homelessness Services Collection NMDS 2019</a></p> <p><a href="#">Specialist Homelessness Services Collection, 2020-21 DQS</a></p> <p><a href="#">Specialist Homelessness Services Collection training &amp; resources</a></p>	<p><a href="#">Specialist Homelessness Services reports</a></p> <p><a href="#">Report on government services</a></p> <p><a href="#">Australia's welfare</a></p>	<a href="mailto:homelessnessdata@aihw.gov.au">homelessnessdata@aihw.gov.au</a>	

<p><b>Supported Accommodation Assistance Program Data Collection</b></p>	<p>The Specialist Homelessness Services Collection (SHSC) replaced the SAAP National Data Collection (NDC) on 1 July 2011. For key differences between the SAAP NDC and SHSC, see Appendix D of Specialist Homelessness Services 2011–12 (AIHW website).</p> <p>The SAAP NDC provided nationally consistent information on SAAP clients and services from July 1996 to June 2011. It was jointly funded by Commonwealth, state and territory governments and comprised three main collections:</p> <ul style="list-style-type: none"> <li>• Client collection – the main component, captured socio-demographic information about clients receiving support under SAAP, services required by and provided to each client, and client circumstances before and after receiving support.</li> <li>• Demand for accommodation collection – which operated over a 1-week period, twice yearly. It captured information about the number of people who requested accommodation at SAAP agencies, which requests were met, and reasons for this.</li> <li>• Administrative collection – collated from information obtained by state and territory government departments in the course of administering the SAAP program. It captured descriptive information about SAAP agencies.</li> </ul> <p>The following special issues collections were also undertaken as part of the SAAP NDC:</p> <ul style="list-style-type: none"> <li>• Casual client collection – discontinued from the SAAP NDC in June 2005 when the definitions of client and support period were changed so that many people previously counted as casual clients would be counted in the Client collection from 1 July 2005.</li> <li>• Accompanying child in SAAP collection – collected information about the children who accompanied an adult and received assistance under SAAP between 21 May and 30 June 1998.</li> <li>• Income issues collection – collected information on SAAP clients with no/very low income. It was conducted from May to June 2000.</li> </ul> <p>A number of methodological changes to the SAAP NDC occurred over time. Refinements to data items introduced in July each year are summarised in the annual reports for the data collection, available from the AIHW website. In particular, in 2005–06 a Core Data Set was introduced (collecting fewer data items, introducing a new statistical linkage key and incorporating changes to some definitions) and from 2000–01, the Client Collection captured demographic and support information for each child requiring assistance.</p> <p>The AIHW continues to hold data collected through the following surveys of SAAP agencies conducted by the AIHW outside of the SAAP NDC:</p> <ul style="list-style-type: none"> <li>• High and complex needs census (June 2008).</li> <li>• Youth homelessness pilot programme collection (1 July 1997 to 31 December 1999).</li> <li>• NSW access and exiting project collection (23 August to 1 September 2002).</li> </ul>	<p>1/07/1996</p> <p>30/06/2011</p>	<p>National and State</p>	<p>Publications; Summary tables published in electronic form; Statistics; Client specified tables on request which may be subject to data provider approval (charges apply); Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).; There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>The scope of SAAP NDC data varied by collection component and over time. For more information, refer to the annual reports for the data collection, available from the AIHW website.</p>	<p>Admin data</p>	<p><a href="#">Client Collection National Minimum Data Set</a></p> <p><a href="#">Demand for Accommodation National Minimum Data Set</a></p> <p><a href="#">Administrative National Minimum Data Set</a></p>	<p>Homelessness reports</p>	<p><a href="mailto:homelessnessdata@aihw.gov.au">homelessnessdata@aihw.gov.au</a></p>

<b>The third Vietnam Veterans mortality study and cancer incidence in Vietnam Veterans study</b>	This project investigated cancer and mortality outcomes for Vietnam Veterans. The project created a 2002 update of the Vietnam Era Nominal Roll held at AIHW. The project also drew on the Vietnam Veterans Nominal Roll held at DVA. AIHW linked information from the Roll to the National Cancer Statistics Clearing House to obtain information on cancer prevalence, and to the NDI to obtain cause of death information.	1/01/1972	30/06/2008	National	Publications; There are restrictions and limitations governing the availability or use of other data in this holding. <b>Vietnam Veterans Health Study and follow-up projects</b>	The Vietnam Veterans Health Study 1997/98 (also known as the Vietnam Veterans Morbidity Study) aimed to establish a complete health picture of Vietnam Veterans and their families.	1/05/1997	25/12/2000	National	Publications; There are restrictions and limitations governing the availability or use of other data in this holding.		Survey	Study reports (location listed in <i>External links</i> ), files and survey forms	<p>The study produced three major reports: Volume 1 and Volume 2 - no longer available online, Volume 3 (validation) – available direct through AIHW <a href="#">Morbidity of Vietnam veterans: a study of the health of Australia's Vietnam veteran community</a></p> <p>The Vietnam Veterans Health Study also gave rise to a number of supplementary reports:  <a href="#">Morbidity of Vietnam Veterans: Supplementary Report 1</a> A report of the investigation into suicide in Vietnam Veterans' children:  <a href="#">Morbidity of Vietnam Veterans: Supplementary Report 2 (Revised Edition)</a></p> <p>A report into the prevalence of adrenal gland cancer, leukaemia and non-Hodgkin's lymphoma in Vietnam Veterans.  <a href="#">Morbidity of Vietnam Veterans: Supplementary Report 3</a> A report into the prevalence of multiple sclerosis and motor neurone disease in Vietnam Veterans.</p>	<a href="mailto:vhw@aihw.gov.au">vhw@aihw.gov.au</a>	Yes
<b>Vietnam Veterans mortality first study</b>	This project investigated mortality rates among Vietnam Veterans compared to those observed for the general population. The project created a 1995 update of the Vietnam Era Nominal Roll held at AIHW. AIHW linked information from the nominal roll to the National Death Index (NDI) in order to obtain cause of death information.	1/01/1980	1/01/1995	National	Publications; There are restrictions and limitations governing the availability or use of other data in this holding.		Official	The study report is no longer available online.		<a href="mailto:vhw@aihw.gov.au">vhw@aihw.gov.au</a>	Yes
<b>Younger people with disability in residential aged care (YPIRAC)</b>	The Younger people with disability in residential aged care (YPIRAC) program was agreed by the Council of Australian Governments (COAG) on 10 February 2006 with the aim of delivering sustained reductions in the number of younger people with disability in residential aged care. The YPIRAC program operated under a 5-year agreement between the Australian Government and state and territory governments. The program was funded through the states and territories and administered by the Australian Government Department of Families, Housing, Community Services and Indigenous Affairs (FaHCSIA). The AIHW was contracted by FaHCSIA to develop a YPIRAC Minimum Data Set (MDS), and to complete the MDS over the 5-year collection periods. YPIRAC data collected concluded in 2010-11.	1/07/2006	30/06/2011	National and State	Publications; Summary tables published in electronic form; There are restrictions and limitations governing the availability or use of other data in this holding.	All state and territory governments provide data on the YPIRAC program.	Admin data; Official	No metadata are available for this collection.	Not applicable	<a href="mailto:NDDN.secretariat@aihw.gov.au">NDDN.secretariat@aihw.gov.au</a>	Yes
<b>Youth Justice</b>	The Youth Justice National Minimum Data Set (YJ NMDS) is an annual collection of information on young people under juvenile justice supervision in Australia. It contains data on all supervised orders (both community based and detention) relating to young people under juvenile justice supervision.	1/07/2000	30/06/2021	National	Publications; Summary tables published in electronic form; Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	All young people under youth justice supervision throughout Australia from July 2000	Admin data	<a href="http://meteor.aihw.gov.au/content/index.phtml/itemId/470084">http://meteor.aihw.gov.au/content/index.phtml/itemId/470084</a>	<p>Youth justice in Australia 2020–21, Summary - Australian Institute of Health and Welfare (<a href="http://aihw.gov.au">aihw.gov.au</a>)</p> <p>Youth Justice NMDS 2020–21: Quality Statement (<a href="http://aihw.gov.au">aihw.gov.au</a>)</p>	<a href="mailto:Youth.justice@aihw.gov.au">Youth.justice@aihw.gov.au</a>
