

## Operations for miscellaneous acquired heart conditions

Information on operations and mortality for other acquired heart conditions such as electrophysiological surgery, pulmonary embolectomies, pericardiectomies, cardiac tumours and cardiac trauma is presented in Table 14.

**Table 14: Operations for miscellaneous acquired heart conditions, 1994**

Procedures	Operations	Deaths
<b>Electrophysiological surgery for:</b>		
Supraventricular tachycardias		
Wolff-Parkinson-White Syndrome	2	0
AV junction	0	0
Atrial fibrillation or flutter	1	0
AV node ablation	0	0
Ventricular tachycardias		
Aneurysmectomy	7	0
Myocardial incision	1	0
Automatic defibrillator	64	0
<b>Total electrophysiological surgery</b>	<b>75</b>	<b>0</b>
<b>Cardiac tumour/cardiomyopathy</b>		
Myxoma	29	1
Other cardiac tumour	4	0
IHSS	4	0
<b>Total cardiac tumour/cardiomyopathy</b>	<b>37</b>	<b>1</b>
<b>Cardiac trauma</b>		
Atrium	2	0
Ventricle	6	3
Valves	0	0
Ascending aorta	6	0
Descending aorta	14	1
Other	3	1
<b>Total cardiac trauma</b>	<b>31</b>	<b>5</b>
<b>Pulmonary embolectomy</b>	<b>11</b>	<b>3</b>
<b>Pericardiectomy for:</b>		
Tuberculosis	1	0
Non-specific infections	10	0
Uraemia	0	0
Other	49	3
<b>Total pericardiectomy</b>	<b>60</b>	<b>3</b>
<b>Other conditions</b>	<b>29</b>	<b>5</b>
