# Acknowledgments

The Australian and Institute of Health and Welfare's METeOR and Metadata Unit receives funding from the Housing Ministers' Advisory Committee (HMAC) to produce and maintain the national standards for the *National housing and homelessness data dictionary*.

The national standards are approved by the National Housing and Homelessness Information Mangement Group and endorsed by the HMAC.

It is anticipated that the National housing and homelessness data dictionary will be published biennially and updates posted on the Metadata Online Registry (METeOR) every 6 months.

# Introduction

The *National housing and homelessness data dictionary* (NHHDD) is an important part of the national data infrastructure for housing and homelessness information development. It provides the basis for consistent national data and is designed to make data collection activities more efficient by describing standards for core data items, and more effective by ensuring that information to be collected is appropriate for its purpose. Having high quality comparable data in the community services field enables accurate reporting that is comparable across data sources (agencies and states and territories). To obtain high quality comparable data, the data needs to be collected against common definitions that are agreed and understood between stakeholders. The dictionary is also designed to be compatible with national data dictionaries in other relevant sectors, for example, community services.

The dictionary aims to set out agreed data definitions, classifications and standards. It will continue to be the ongoing authoritative source of housing assistance data definitions where national consistency is required or desired. The dictionary items are presented according to the ISO/IEC Standard 11179 Specification and Standardization of Data Elements. This is the international standard for defining data elements issued by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).

For this version, considerable effort has been dedicated to:

- developing common (or integrated) metadata items with the community services and health data dictionaries
- assessing the content of the dictionary in line with the revised protocols for data standards
- ensuring the appropriateness and relevance of the metadata items in the dictionary.

The national standards for housing and homelessness are also available on the Australian Institute of Health and Welfare's Metadata Online Registry (METeOR) at <http://meteor.aihw.gov.au>, along with the national standards for health, community services, and early childhood.

# Data elements

---

## Accommodation period end date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service event – accommodation period end date, DDMMYYYY
<i>METeOR identifier:</i>	347334
<i>Registration status:</i>	Community Services, Standard 30/11/2007 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The date at which an <b>accommodation period</b> was completed.
<i>Data Element Concept:</i>	Service event – accommodation period end date

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This data element refers to a discrete accommodation period within a service episode. There may be a number of accommodation periods within a service episode.
<i>Collection methods:</i>	This data element is collected in conjunction with the Accommodation period start date and supported accommodation type.

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services accommodation type and start/end date cluster</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>Implementation start date:</i> 10/12/2012 <i>DSS specific information:</i> In the Specialist Homelessness Services (SHS) NMDS, accommodation end date may be asked for three types of accommodation: 1) Short term or emergency, 2) Medium term or transitional; and 3) Long term.
---	---

Clients may have breaks in accommodation, or move between different types of accommodation. Clients may have multiple start and end dates for the various types of accommodation.

<i>Implementation in Data Set Specifications:</i>	<a href="#">Home purchase assistance DSS 2011-12</a> Housing assistance, Standard 01/05/2013
---	--

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

Only the value of assistance provided between 01/07/2011 and 30/06/2012 should be included. The value of assistance provided before or after this date should be excluded, therefore:

- for households with outstanding balances on repayable

assistance provided in a previous financial year where no transfers of assistance were provided in the 2011-12 financial year, the amount of assistance received, HPA\_AMOUNT, should be left blank.

- for households that commenced receiving ongoing assistance in a previous financial year that continued to receive transfers of assistance in the 2011-12 financial year, only the value of assistance provided in the 2011-12 financial year should be included.

Private rent assistance DSS 2011-12 Housing assistance, Standard 01/05/2013

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

Only assistance provided between 01/07/2011 and 30/06/2012 should be included. Assistance before or after this date should be excluded.

For those households who commenced receiving assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, include only the value of assistance provided for the year ending 30 June 2012 (i.e. disregard the value of assistance provided prior to 1 July 2011).

---

## **Relational attributes**

*Related metadata references:* See also [Household – principal source of cash income, \(housing assistance\) code N\[.N.N\]](#) Housing assistance, Standard 01/05/2013

*Implementation in Data Set Specifications:* [Household \(housing assistance\) cluster](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

The assessable weekly income refers to the weekly amount at 30 June.

Assessable income is also used to calculate the rental housing rebate, which allows the household to pay a rent lower than the market rent. Each state and territory uses its own definition of 'assessable income'.

[Tenancy/vacancy cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

Assessable weekly income was collected for the week of 30 June. Assessable income includes income from all sources (excluding Commonwealth Rent Assistance (CRA)) as specified and used by the agency to establish eligibility of a household for receipt of housing assistance.

Unknown values are recorded as "U".

---

## Assistance received date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service event – assistance received date, DDMMYYYY
<i>METeOR identifier:</i>	270042
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The date on which a client <b>receives assistance</b> from an agency.
<i>Data Element Concept:</i>	Service event – assistance received date

---

### Value domain attributes

#### Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

---

### Data element attributes

#### Collection and usage attributes

<i>Guide for use:</i>	This metadata item should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example if a person received assistance from an agency on 1 July 2000 the Assistance receipt date should be recorded as 01072000 as specified in the representational layout.
<i>Collection methods:</i>	The date recorded should reflect the date on which the client received any type of assistance. Where a client receives more than one occasion of service on the same day, the agency should separately record each occasion of service against the same date.

#### Source and reference attributes

<i>Submitting organisation:</i>	Australian Institute of Health and Welfare
<i>Origin:</i>	Home and Community Care (HACC) Data Dictionary Version 1.0, 1998

#### Relational attributes

*Related metadata references:*

Supersedes [Assistance received date, version 1, DE, NCSDD, NCSIMG, Superseded 01/03/2005.pdf](#) (15.2 KB)

*Implementation in Data Set Specifications:*

[Home purchase assistance DSS 2011-12](#) Housing assistance, Standard 01/05/2013

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

The 2011-12 HPA collection requires a different format from the standard. The HPA collection required format is DD/MM/YYYY.

For the purposes of this collection this data item should record the date that the assistance is first received by the household, regardless of whether this date precedes the 2011-12 financial year.

The originating date of assistance will precede 1/7/2011 whenever households commenced receiving an ongoing form of assistance in a previous financial year and continued to receive that assistance in the 2011-12 financial year, or whenever households have, for the given assistance type, outstanding balances on repayable assistance provided in a previous financial year.

For example, if a household first received direct lending assistance in the 2001-2002 financial year and has a balance outstanding on their loan at the commencement of the 2011-12 financial year, the assistance received date for direct lending assistance will be the date their loan was issued in the 2001-2002 financial year. If they then commence receive ongoing mortgage relief on this loan in the 2010-11 financial year and continue to receive mortgage relief in the 2011-12 financial year, then the assistance received date for mortgage relief will be when it was first provided in the 2010-11 financial year.

[Private rent assistance DSS 2011-12](#) Housing assistance, Standard 01/05/2013

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

For those households who commenced receiving ongoing assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, report the originating date of the assistance (i.e. the date the household first received the assistance).

---

## Assistance request date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service event – assistance request date, DDMMYYYY
<i>METeOR identifier:</i>	270043
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The date on which assistance was requested.
<i>Context:</i>	Service provision and planning: This item can be useful for measuring the immediacy of response times and the responsiveness to people’s requests for assistance (in conjunction with the date the assistance commenced and the <b>reason assistance was requested</b> ). It also has important uses in measuring actual assistance provided and unmet demand.
<i>Data Element Concept:</i>	Service event – assistance request date

---

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This metadata item should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example if a person requested assistance from an agency on 1 July 2000 the Date assistance requested should be recorded as 01072000 as specified in the representational layout.
<i>Collection methods:</i>	This item should be collected on the date on which a person(s) made the initial request for assistance. The person(s) requesting assistance need not necessarily be a client as a request does not necessarily result in provision of a service.

May be collected for individual types of assistance or service requested.

*Comments:*

A request does not necessarily result in provision of a service.

## Australian postcode (address)

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Address – Australian postcode, code (Postcode datafile) {NNNN}
<i>METeOR identifier:</i>	429894
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standard 01/05/2013 Health, Standard 07/12/2011 Early Childhood, Standard 09/03/2012 Tasmanian Health, Draft 12/09/2012 Independent Hospital Pricing Authority, Standard 31/10/2012
<i>Definition:</i>	The Australian numeric descriptor for a postal delivery area for an address.
<i>Data Element Concept:</i>	Address – Australian postcode

### Value domain attributes

---

#### Representational attributes

<i>Classification scheme:</i>	Postcode datafile
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	{NNNN}
<i>Maximum character length:</i>	4

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>Australian postal addresses should include a valid postcode. Refer to the Australia Post Address Presentation Standard for rules on presentation and positioning of postcodes on mail. For a full list of Australian postcodes visit the Australia Post website: <a href="http://www.auspost.com.au">www.auspost.com.au</a></p> <p>This data element may be used in the analysis of data on a geographical basis which involves a conversion from postcodes to the Australian Bureau of Statistics (ABS) postal areas. This conversion results in some inaccuracy of information as postcodes do not have a geographic definition and boundaries are not well defined. However, in some data sets postcode is the only geographic identifier, therefore the use of other more accurate indicators (e.g. Statistical areas - SA) is not always possible.</p> <p>When dealing with aggregate data, postal areas, converted</p>
-----------------------	---

from postcodes, can be mapped to Australian Statistical Geography Standard (ASGS) codes using an ABS concordance, for example to determine SA2s. For a more advanced concordance, locality, postcode and state, which are all part of an address, used in conjunction can effectively code data to the SA1 level and above in the ASGS.

This data element is one of a number of items that can be used to create a primary address, as recommended by the AS 4590-2006 *Interchange of client information* standard. Components of the primary address are:

- Address site (or Primary complex) name
- Address number or number range
- Road name (name/type/suffix)
- Locality
- State/Territory
- Postcode (optional)
- Country (if applicable).

8	Australian Capital Territory																				
9	Other territories (Cocos (Keeling) Islands, Christmas Island and Jervis Bay Territory)																				

#### Collection and usage attributes

<i>Guide for use:</i>	The order presented here is the standard for the Australian Bureau of Statistics (ABS). Other organisations (including the Australian Institute of Health and Welfare) publish data in state order based on population (that is, Western Australia before
-----------------------	---

South Australia and Australian Capital Territory before Northern Territory).

### Source and reference attributes

*Reference documents:* Australian Bureau of Statistics. [Australian Standard Geographical Classification \(ASGC\)](#). Cat No. 1216.0. Canberra: ABS.

### Data element attributes

---

#### Collection and usage attributes

*Collection methods:* Irrespective of how the information is coded, conversion of the codes to the ABS standard must be possible.

#### Source and reference attributes

*Submitting organisation:* Australian Institute of Health and Welfare

*Origin:* Health Data Standard Committee  
National Community Services Data Committee

*Reference documents:* AS4846 Health Care Provider Identification, 2004, Sydney: Standards Australia  
AS5017 Health Care Client Identification, 2002, Sydney: Standards Australia  
In AS4846 and AS5017 alternative codes are presented. Refer to the current standard for more details.

#### Relational attributes

*Implementation in Data Set Specifications:* [Community housing and Indigenous community housing service provider organisation address details cluster](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

This DSS uses abbreviated state and territory names (e.g. NSW, Vic etc.), rather than code values. It does not collect Code 9 'Other territories (Cocos (Keeling) Islands, Christmas Island and Jervis Bay Territory)'.

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Residential care Where placement is in a residential building where the purpose is to provide placements for children and where there are paid staff. CODE 2 Family group home
-----------------------	---

Family group homes provide care to children in a departmentally or community sector agency provided home. These homes have live-in, non-salaried carers who are reimbursed and/or subsidised for the provision of care.

CODE 3 Relatives/kin who are reimbursed

Includes family members (other than parents) or a person well known to the child and/or family (based on a pre-existing relationship) who is reimbursed by the state/territory.

CODE 4 Foster care

Includes situations in which a child is living with foster parent(s) who receive a foster care allowance from a government or non-government organisation for the care of a child (excluding children in family group homes)

CODE 5 Other home based care (reimbursed)

Any other type of reimbursed home-based care that does not fit into the above categories.

CODE 6 Relative/kin who are not reimbursed

Includes family members (other than parents) or a person well known to the child and/or family (based on a pre-existing relationship) who ARE NOT reimbursed by the state/territory.

CODE 7 Independent living

This includes private board and lead-tenant households.

CODE 8 Other living arrangements

This includes any living arrangements not mentioned above.

CODE 9 Parents

Includes natural or adoptive parents of the child.

CODE 99 Not stated/inadequately described

Is used when the family in which a child lives in not recorded or is unknown.

## Source and reference attributes

*Submitting organisation:* National Child Protection and Support Services data working group (NCPASS).

*Origin:* Child Protection and Support Services National Minimum Data Set, Data Collection Manual, AIHW September 2005.

## Data element attributes

---

### Collection and usage attributes

*Collection methods:* This item is for children who were on a care and protection order during the financial year. This item should be filled in for all children, regardless of when they came into care. If the child was not on an order at 30 June, this should be left blank. This refers to the usual place of residence of the child, as stated in the case plan. If the child is absent, either planned or unplanned, the usual place of residence should still be

recorded.

### Source and reference attributes

*Submitting organisation:* National Child Protection and Support Services data group (NCPASS).

*Origin:* Child protection and support services data dictionary. AIHW Version 1.0 Oct 2005.

### Relational attributes

*Implementation in Data Set Specifications:* [Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this data element is conditional on the client providing consent to release their personal data to the AIHW. The data element Client – consent obtained indicator, yes/no code N, must receive a response of Yes (Code 1).

This data element is only collected for clients aged less than 18 years, who have a care and protection order.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

---

## Case management goal status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Client – case management goal status, code N
<i>Synonymous names:</i>	Extent case management goals achieved
<i>METeOR identifier:</i>	401048
<i>Registration status:</i>	Community Services, Standard 17/11/2010 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The extent to which a client has achieved his/her case management goals, as represented by a code.
<i>Data Element Concept:</i>	Client – case management goal status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code										
<i>Data type:</i>	Number										
<i>Format:</i>	N										
<i>Maximum character length:</i>	1										
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Not at all</td></tr><tr><td>2</td><td>Up to half</td></tr><tr><td>3</td><td>Half or more</td></tr><tr><td>4</td><td>All</td></tr></tbody></table>	Value	Meaning	1	Not at all	2	Up to half	3	Half or more	4	All
Value	Meaning										
1	Not at all										
2	Up to half										
3	Half or more

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Not at all This option is selected if no case management goals were achieved. CODE 2 Up to half This option is used if less than half the case management goals were achieved. CODE 3 Half or more This option is selected if at least half the case management goals were achieved. CODE 4 All This option is used if all case management goals were achieved.
-----------------------	---

### Data element attributes

---

## Collection and usage attributes

<i>Collection methods:</i>	The permissible values for this data element are used to form the response categories to the question: "To what extent does the case worker think the client has achieved their goals over the past reporting period?"
<i>Comments:</i>	This item is answered from the perspective of the agency worker. It is answered at the end of a reporting period as to whether the case management goals were achieved.

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	<p>This metadata item would be collected either at an initial assessment or subsequent assessments of a person(s). Due to the variety across community services as to what constitutes a case management plan, and whether it is considered to be developed, agreed to and implemented, it is up to individual collections to further clearly specify these aspects when collecting data for their individual purposes. This could include whether or not the plan is written.</p> <p>An example of a question used by the Day Therapy Centre</p>
----------------------------	---

program (DTC) to establish whether a care plan has been developed for the client is:

Was a care plan developed for the person?

- Yes
- No

Individual collections may also have certain quality issues regarding case management plans that may be as important as whether or not one has been developed.

*Comments:*

A case management plan is a personal plan or a support agreement that usually has a statement of the person(s) problems or needs, some goals for the person(s) and strategies to achieve those goals. It is usually developed between the person and agency as a result of an assessment process.

The plan or agreement can relate to services provided by one agency or a number of agencies.

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected at the end of each reporting

period, i.e. each calendar month.

---

## Centrelink customer reference number

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – government funding identifier, Centrelink customer reference number N(9)A
<i>Synonymous names:</i>	CRN; Centrelink reference number
<i>METeOR identifier:</i>	369274
<i>Registration status:</i>	Community Services, Standard 12/08/2008 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	A unique identifier allocated to a customer or organisation, or other item of interest.
<i>Data Element Concept:</i>	Person – government funding identifier

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Identifier
<i>Data type:</i>	String
<i>Format:</i>	N(9)A
<i>Maximum character length:</i>	10

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This identifier is assigned by Centrelink. The CRN consists of nine digits and one alphabetic character, generated and validation by an internal Centrelink Algorithm.
<i>Comments:</i>	The Centrelink Reference Number (CRN) is a unique identifier assigned to people and certain organisations that have one or more recognised relationships with Centrelink. In most cases, these entities receive services provided by Centrelink. It is used by Centrelink as the primary key for a customer's record.

#### Source and reference attributes

<i>Submitting organisation:</i>	Centrelink.

---

## Commonwealth Rent Assistance (CRA) amount

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Centrelink income unit – Commonwealth Rent Assistance amount, Total Australian currency N[NNNNN].NN
<i>METeOR identifier:</i>	270141
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	The weekly amount of Commonwealth Rent Assistance (CRA) the income unit is entitled to receive in the fortnight prior to data extraction.
<i>Data Element Concept:</i>	Centrelink income unit – Commonwealth Rent Assistance amount

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[NNNNN].NN
<i>Maximum character length:</i>	8
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Collection and usage attributes

<i>Guide for use:</i>	This value domain must be expressed to two decimal places. Where there is a dollar value and no cent value, the cents must be expressed as .00 (e.g. 100.00).
-----------------------	---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	If a customer and partner are illness separated and they are entitled to CRA, they may each be paid the single rate of CRA. Therefore, some couples could be receiving up to double the single maximum rate of CRA.
<i>Comments:</i>	The rate payable varies with the type of income unit (defined by conjugal status, sharing arrangements and number of dependent children) and amount of rent paid.

#### Source and reference attributes

2	Housing cooperative										
3	Other community service organisation										
9	Not stated/inadequately described										
<i>Supplementary values:</i>											

#### Collection and usage attributes

<i>Guide for use:</i>	<p><b>Code 1 Housing association:</b> A not-for-profit organisation that is managed by a committee and is often linked to other community support services. In associations day-to-day management of the organisation is delegated to staff and/or volunteers. In some states and territories housing associations are legally incorporated and registered under state or territory community housing acts.</p> <p><b>Code 2 Housing cooperative:</b> A not-for-profit organisation that is managed by the tenants (self-managed). In cooperatives responsibility for day-to-day management is usually shared amongst tenant members on a voluntary basis. In some states and territories housing cooperatives are legally incorporated and registered under state or territory housing acts.</p> <p><b>Code 3 Other community service organisation:</b></p>
-----------------------	--

Not-for-profit organisations who provide housing assistance as part of their support services, such as welfare, church-based and local government organisations (e.g. Barnardos, St Vincent de Paul).

Guide for use/examples  
NORWOOD SA 5067

This data element is one of a number of items that can be used to create a primary address, as recommended by the AS 4590-2006 Interchange of client information standard.

Components of the primary address are:

Address site (or Primary Complex) name

Address number or number range

Road name (name/type/suffix)

Locality

State/Territory

Postcode (optional)

Country (if applicable).

### Source and reference attributes

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1 Leased tenure-nominated on lease This code is used for renters who are listed on the contract for the lease and persons having tenure with a rent/buy scheme.</p> <p>CODE 2 Lease in place - not nominated on lease This code is used for those clients living in accommodation where a lease is in place but they are not nominated on the lease agreement.</p> <p>CODE 3 Couch surfer This code is used for any person who typically moves from household to household intermittently, who is not</p>
-----------------------	---

regarded as being part of those households, and who does not have any form of leased tenure over any accommodation.

**CODE 4 Boarder**

This code is used for any person who is boarding, and who are supplied with meals and/or lodging in return for payment.

**CODE 5 Living with relative fee free**

This code is used for any person who is related to a member of a household, and who are not paying a fee for their lodging.

**CODE 6 Other**

This code is used for conditions of occupancy arrangements that are not covered by the other categories.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:*

This information is used to assess how secure the client is in their accommodation.

### Relational attributes

*Related metadata references:*

See also [Person – housing tenure type, homelessness code N](#) Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

See also [Person – residential type, homelessness code N\[N\]](#) Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

*Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service

event – last service provision date, DDMMYYYY)

- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

Please note that Leased tenure - nominated on lease (CODE 1) - and Lease in place - not nominated on lease (CODE 2) are only selected if a lease is in place. Codes 3 to 6 only apply if the person's name is not on a lease.

---

## Consent obtained indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Client – consent obtained indicator, yes/no code N
<i>Synonymous names:</i>	Consent obtained
<i>METeOR identifier:</i>	338737
<i>Registration status:</i>	Community Services, Standard 30/11/2007 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010 Indigenous, Draft 18/10/2012
<i>Definition:</i>	Whether the client has agreed to have personal information recorded, as represented by a code.
<i>Data Element Concept:</i>	Client – consent indicator

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Boolean						
<i>Format:</i>	N

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

The data collected in the Specialist Homelessness Services (SHS) NMDS will be used for policy development and agency activity reporting in a non-identifiable form. This information will enable better placement of agency services and enhance service provision to clients of homelessness agencies.

---

## Country of birth

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – country of birth, code (SACC 2011) NNNN
<i>METeOR identifier:</i>	459973
<i>Registration status:</i>	Community Services, Standard 13/10/2011 Housing assistance, Standard 13/10/2011 Health, Standard 13/10/2011 Homelessness, Standard 13/10/2011 Tasmanian Health, Draft 12/09/2012 WA Health, Draft 23/08/2012 Independent Hospital Pricing Authority, Standard 01/11/2012
<i>Definition:</i>	The country in which the person was born, as represented by a code.
<i>Data Element Concept:</i>	Person – country of birth

### Value domain attributes

---

#### Representational attributes

<i>Classification scheme:</i>	Standard Australian Classification of Countries 2011
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	NNNN
<i>Maximum character length:</i>	4

#### Collection and usage attributes

<i>Guide for use:</i>	<p>The Standard Australian Classification of Countries 2011 (SACC) is a four-digit, three-level hierarchical structure specifying major group, minor group and country.</p> <p>A country, even if it comprises other discrete political entities such as states, is treated as a single unit for all data domain purposes. Parts of a political entity are not included in different groups. Thus, Hawaii is included in Northern America (as part of the identified country United States of America), despite being geographically close to and having similar social and cultural characteristics as the units classified to Polynesia.</p>
-----------------------	--

### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	Some data collections ask respondents to specify their country of birth. In others, a pre-determined set of countries is specified as part of the question, usually accompanied by an 'other
----------------------------	--

(please specify)' category.

Recommended questions are:

In which country were you/was the person/was (name) born?

Australia

Other (please specify)

Alternatively, a list of countries may be used based on, for example common Census responses.

In which country were you/was the person/was (name) born?

Australia

England

New Zealand

Italy

Viet Nam

India

Scotland

Philippines

Greece

Germany

Other (please specify)

In either case coding of data should conform to the SACC.

Sometimes respondents are simply asked to specify whether they were born in either 'English speaking' or 'non-English speaking' countries but this question is of limited use and this method of collection is not recommended.

*Comments:*

This metadata item is consistent with that used in the [ABS collection methods](#) and is recommended for use whenever there is a requirement for comparison with ABS data (last viewed 2/6/2008).

## **Relational attributes**

*Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this data element is collected at the date of presentation. It is conditional on the client providing consent to release their personal data to the AIHW. The data element *Client – consent obtained indicator, yes/no code N*, must receive a response of Yes (CODE 1).

---

## Date accuracy indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Date – accuracy indicator, code AAA

AAE	Day and month are accurate, year is estimated																						
AAU	Day and month are accurate, year is unknown																						
AEE	Day is accurate, month and year are estimated																						
AEU	Day is accurate, month is estimated, year is unknown																						
AUU	Day is accurate, month and year are unknown																						
AUA	Day is accurate, month is unknown, year is accurate																						
AUE	Day is accurate, month is unknown, year is estimated																						
AEA	Day is accurate, month is estimated, year is accurate																						
EAA	Day is estimated, month and year are accurate																						

EAE	Day is estimated, month is accurate, year is estimated
EAU	Day is estimated, month is accurate, year is unknown
EEA	Day and month are estimated, year is accurate
EEE	Day, month and year are estimated
EEU	Day and month are estimated, year is unknown
EUA	Day is estimated, month is unknown, year is accurate
EUE	Day is estimated, month is unknown, year is estimated
EUU	Day is estimated, month and year are unknown
UAA	Day is unknown, month and year are accurate
UAE	Day is unknown, month is accurate, year is estimated
UAU	Day is unknown, month is accurate, year is unknown
UEA	Day is unknown, month is estimated, year is accurate
UEE	Day is unknown, month and year are estimated
UEU	Day is unknown, month is estimated, year is unknown
UUA	Day and month are unknown, year is accurate
UUE	Day and month are unknown, year is estimated
UUU	Day, month and year are unknown

### Collection and usage attributes

*Guide for use:*

Any combination of the values A, E, U representing the corresponding level of accuracy of each date component of the reported date.

This data element consists of a combination of three codes, each of which denotes the accuracy of one date component:

A - the referred date component is accurate

E - the referred date component is not known but is estimated

U - the referred date component is not known and not estimated.

This data element contains positional fields (DMY) that reflects the order of the date components in the format (DDMMYYYY) of the reported date:

Field 1 (D) – refers to the accuracy of the day component;

Field 2 (M) – refers to the accuracy of the month component;

Field 3 (Y) – refers to the accuracy of the year component.

Data domain	Date component (for a format DDMMYYYY)		
	(D)ay	(M)onth	(Y)ear
Accurate	A	A	A
Estimated	E	E	E
Unknown	U	U	U

This data element is valid only for use with dates that are reported/exchanged in the format (DDMMYYYY).

Example 1: A date has been sourced from a reliable source and is known as accurate then the Date accuracy indicator should be informed as (AAA).

Example 2: If only the age of the person is known and there is no certainty of the accuracy of this, then the Date accuracy indicator should be informed as (UUE). That is the day and month are “unknown” and the year is “estimated”.

Example 3: If a person was brought in unconscious to an emergency department of a hospital and the only information available was from a relative who was certain of the age and the birthday’s ‘month’ then the Date accuracy indicator should be informed as (UAA). A year derived from an accurate month and accurate age is always an accurate year.

The Date accuracy indicator can be useful for operational purposes to indicate the level of accuracy that a date has been collected at any point in time. It can indicate whether the stored date needs to be followed up until it reaches the intended minimal required accuracy. For example, if a person was brought in unconscious to an emergency department of a hospital the level of accuracy of the date collected at that point may not be satisfactory. It is likely that the correct date of birth can be obtained at a later date. The Date accuracy indicator provides information on the accuracy of the entered dates that may require further action.

For future users of the data it may also be essential they know the accuracy of the date components of a reported date.

## Data element attributes

---

### Collection and usage attributes

*Collection methods:*

Collection constraints:

If constraints for the collection of the date are imposed, such as 'a valid date must be input in an information system for unknown date components', the Date accuracy indicator should be used along with the date as a way of avoiding the contamination of the valid dates with the same value on the respective date components.

Example:

Some jurisdictions use 0107YYYY and some use 0101YYYY when only the year is known. When month and year are known some use the 15th day as the date i.e. 15MMYYYY. Where this occurs in a data collection that is used for reporting or analysis purposes there will be dates in the collection with the attributes 0107YYYY etc., that are accurate and some that are not accurate. Without a corresponding flag to determine this accuracy the analysis or report will be contaminated by those estimated dates.

*Comments:*

Provision of a date is often a mandatory requirement in data collections.

Most computer systems require a valid date to be recorded in a date field i.e. the month part must be an integer between 1 and 12, the day part must be an integer between 1 and 31 with rules about the months with less than 31 days, and the year part should include the century. Also in many systems, significant dates (e.g. date of birth) are mandatory requirements.

However, in actual practice, the date or date components are often not known (e.g. date of birth, date of injury) but, as stated above, computer systems require a valid date. This means that a date MUST be included and it MUST follow the rules for a valid date. It therefore follows that, while such a date will contain valid values according to the rules for a date, the date is in fact an 'unknown' or 'estimated' date. For future users of the data it is essential they know that a date is accurate, unknown or estimated and which components of the date are accurate, unknown or estimated.

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>If date of birth is not known or cannot be obtained, provision should be made to collect or estimate age. Collected or estimated age would usually be in years for adults, and to the nearest three months (or less) for children aged less than two years. Additionally, an estimated date flag or a date accuracy indicator should be reported in conjunction with all estimated dates of birth.</p> <p>For data collections concerned with children's services, it is suggested that the estimated date of birth of children aged under 2 years should be reported to the nearest 3 month period, i.e. 0101, 0104, 0107, 0110 of the estimated year of birth. For example, a child who is thought to be aged 18 months in October of one year would have his/her estimated date of birth reported as 0104 of the previous year. Again, an estimated date flag or date accuracy</p>
-----------------------	--

indicator should be reported in conjunction with all estimated dates of birth.

*Collection methods:*

Information on date of birth can be collected using the one question:

What is your/(the person's) date of birth?

In self-reported data collections, it is recommended that the following response format is used:

Date of birth: \_\_ / \_\_ / \_\_\_\_\_

This enables easy conversion to the preferred representational layout (DDMMYYYY).

For record identification and/or the derivation of other metadata items that require accurate date of birth information, estimated dates of birth should be identified by a date accuracy indicator to prevent inappropriate use of date of birth data. The linking of client records from diverse sources, the sharing of patient data, and data analysis for research and planning all rely heavily on the accuracy and integrity of the collected data. In order to maintain data integrity and the greatest possible accuracy an indication of the accuracy of the date collected is critical. The collection of an indicator of the accuracy of the date may be essential in confirming or refuting the positive identification of a person. For this reason it is strongly recommended that the data element Date – accuracy indicator, code AAA also be recorded at the time of record creation to flag the accuracy of the data.

*Comments:*

Privacy issues need to be taken into account in asking persons their date of birth.

Wherever possible and wherever appropriate, date of birth should be used rather than age because the actual date of birth allows a more precise calculation of age.

When date of birth is an estimated or default value, national health and community services collections typically use 0101 or 0107 or 3006 as the estimate or default for DDMM.

It is suggested that different rules for reporting data may apply when estimating the date of birth of children aged under 2 years because of the rapid growth and development of children within this age group which means that a child's development can vary considerably over the course of a year. Thus, more specific reporting of estimated age is suggested.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:* In the context of health, an activity is the execution of a task or action by an individual. An activity limitation is a difficulty an individual may have in executing an activity. Activity limitation varies with the environment, and is assessed in relation to a particular environment; the absence or presence of assistance, including aids and equipment, is an aspect of the environment.

For the 'Communication' life area, a person's level of difficulty is assessed in terms of whether they can understand, or be understood, in their native language or preferred method of communication.

*Collection methods:* It is expected that this data element will be used to collect information from the individual being assessed, or a proxy/carer or service worker answering on their behalf. The responses are phrased in answer to the question 'For each of the following activities, do you need help/supervision, have difficulty, or use aids/equipment? (choose one answer for each row)'.

## Dwelling occupancy status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Dwelling – occupancy status, code N
<i>METeOR identifier:</i>	302863
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006
<i>Definition:</i>	Whether or not a dwelling is occupied under a formal tenancy agreement by a household, as represented by a code.
<i>Data Element Concept:</i>	Dwelling – occupancy status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No
Value	Meaning						
1	Yes						
2	No						
<i>Supplementary values:</i>	<table><tbody><tr><td>9</td><td>Not stated/inadequately described</td></tr></tbody></table>	9	Not stated/inadequately described				
9	Not stated/inadequately described						

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1. Yes: A household has a formal tenancy agreement for a particular dwelling. Occupied dwellings include any structures that people actually live in regardless of its intended purpose. The structure may or may not be tenatable.</p> <p>Code 2. No: No formal tenancy agreement exists between a household and a housing provider for a particular dwelling. A not occupied structure is only a dwelling if it is intended for human residence. The structure may or may not be tenatable.</p>
-----------------------	---

Thus a shed, garage, office, etc. is counted as an occupied dwelling if people are living there, but is not counted as vacant if there are no residents as the purpose of the structure is not for human habitation.

<i>Supplementary values:</i>	99 Not stated/inadequately described																				

#### Collection and usage attributes

<i>Guide for use:</i>	<p><b>Code 1. Separate house:</b> a house separated from other houses (or other buildings or structures) by space to allow access on all sides (at least 1/2 a metre). This category also includes houses which have an attached flat (e.g. a granny flat). The attached flat will be included in the 'Flat, unit or apartment' category.</p> <p><b>Code 2. Semi-detached, row or terrace house, townhouse, etc.:</b> includes dwellings with their own private grounds</p>
-----------------------	---

and no dwelling above or below. A key feature of these dwellings is that they are either attached in some structural way to one or more dwellings or are separated from neighbouring dwellings by less than 1/2 a metre. Examples include semi-detached, row or terrace houses, townhouses, and villa units. Multi-storey townhouses or units are separately identified from those which are single storey.

**Code 3. Flat, unit or apartment:** includes dwellings in blocks of flats, units or apartments that are self-contained. These dwellings do not have their own private grounds and usually share a common entrance foyer or stairwell. This category includes houses converted into flats, and flats attached to houses such as granny flats.

**Code 4. Caravan, tent, cabin etc. in caravan park, houseboat in marina, etc.:** includes all types of accommodation within a caravan park. It also includes all occupied water craft in marinas.

**Code 5. Caravan not in caravan park, houseboat not in marina, etc.:** includes all mobile units, on water or land, occupied on a permanent or semi-permanent basis by people (e.g. caravans, campervans, mobile houses, small boats, houseboats) that are not in caravan parks or marinas.

**Code 6. Improvised home, tent, sleepers out:** includes all structures not elsewhere classified that are occupied by people on a permanent or semi-permanent basis. This category typically includes garages, sheds, tents, shacks, etc. These structures are only included in this category if they are not in a caravan park.

**Code 7. House or flat attached to a shop, office, etc.:** includes all houses or flats that are attached to a non-residential building. Examples of these dwellings are manses attached to a church, a flat or apartment over a shop, and a caretaker's house or flat attached to a school, factory or storage facility.

**Code 8. Boarding/rooming house unit:** a **boarding/rooming house unit** is a self-contained unit within a boarding house with separate cooking, bathroom, and toilet facilities. Boarding house units are usually accessed via a common entrance such as a foyer or hallway. Please note: this structure type identifies the individual rooms in a boarding/rooming house, not the complete building.

*Comments:*

Based on a modified combination of the 1996 and 2001 Australian Bureau of Statistics Census.

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS this data element is the support period start date.

---

## Financial assistance amount

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – financial assistance amount, total Australian currency N[NNNN]
<i>METeOR identifier:</i>	401991
<i>Registration status:</i>	Community Services, Standard 17/11/2010 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The amount of financial assistance provided to a person, in Australian dollars.
<i>Data Element Concept:</i>	Person – financial assistance amount

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[NNNN]
<i>Maximum character length:</i>	5
<i>Unit of measure:</i>	Australian currency (AU\$)

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This data element is collected in whole dollar amounts. If vouchers are given instead of cash the value of the voucher is to be recorded.
-----------------------	---

#### Relational attributes

<i>Related metadata references:</i>	See also <a href="#">Person – financial assistance type, homelessness code N</a> Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010
<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services financial assistance type and amount cluster</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013

#### *DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected for the current service episode only. It relates specifically to assistance provided by the specialist homelessness agency and not assistance provided by any other source.

This item is repeated 5 times to capture the total amounts for the different types of financial assistance. The client should provide dollar amounts for each type of assistance that was provided during the reference period (i.e. up to 5 valid responses).

---

## Financial assistance type (homelessness)

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – financial assistance type, homelessness code N
<i>METeOR identifier:</i>	401980
<i>Registration status:</i>	Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The type of financial assistance provided to a person by a specialist homelessness agency, as represented by a code.
<i>Data Element Concept:</i>	Person – financial assistance type

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code												
<i>Data type:</i>	Number												
<i>Format:</i>	N												
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Payment for short term or emergency accommodation</td></tr><tr><td>2</td><td>Payment for establishing/maintaining a tenancy</td></tr><tr><td>3</td><td>Payment for training/education/employment</td></tr><tr><td>4</td><td>Payment for accessing external specialist services</td></tr><tr><td>5</td><td>Other payment</td></tr></tbody></table>	Value	Meaning	1	Payment for short term or emergency accommodation	2	Payment for establishing/maintaining a tenancy	3	Payment for training/education/employment	4	Payment for accessing external specialist services	5	Other payment
Value	Meaning												
1	Payment for short term or emergency accommodation												
2	Payment for establishing/maintaining a tenancy												
3	Payment for training/education/employment												
4	Payment for accessing external specialist services												
5	Other payment												

### Data element attributes

---

#### Relational attributes

<i>Related metadata references:</i>	See also <a href="#">Person – financial assistance amount, total Australian currency N[NNNN]</a> Community Services, Standard 17/11/2010, Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010
<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services financial assistance type and amount cluster</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>DSS specific information:</i> In the Specialist Homelessness Services NMDS, this data element is collected for the current service

episode only. It relates specifically to assistance provided by the specialist homelessness agency and not assistance provided by any other source.

The client may check all types of assistance that applied during the reference period (i.e. up to 5 valid responses).

---

## First service contact date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service event – first service contact date, DDMMYYYY
<i>METeOR identifier:</i>	270163
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The date on which the agency provides the first service to the client.
<i>Data Element Concept:</i>	Service event – first service contact date

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	Due to the considerable variation in the types of services provided in the community services sector, it is not possible at this stage to define in generic terms what will constitute the first service contact date.
<i>Collection methods:</i>	For each separate service episode a separate 'Service event – first service contact date, DDMMYYYY' should be recorded.
<i>Comments:</i>	This metadata item is used in calculation of measures of periods of support and duration of assistance.

#### Source and reference attributes

<i>Submitting organisation:</i>	Australian Institute of Health and Welfare
---------------------------------	--

#### Relational attributes

<i>Related metadata references:</i>	Supersedes <a href="#">First service contact date, version 2, DE, NCSDD, NCSIMG, Superseded 01/03/2005.pdf</a> (14.7 KB)
<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected for all clients.

This data element is collected for the first service contact date within the reporting period. If the first service contact was also the start of the service episode, as recorded by the data element Service episode – episode start date, DDMMYYYY, then the same date will be recorded for both data elements. If the service episode is ongoing but the service event is new, then the actual date of the new service event should be recorded.

This data element should ascertain the actual date of service, not the date when the data is recorded.

---

## First service request indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – first service request indicator, yes/no code N
<i>METeOR identifier:</i>	400276
<i>Registration status:</i>	Community Services, Standard 17/11/2010 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	An indicator that a request for service is the first request made by a person to an Agency, as represented by a code.
<i>Data Element Concept:</i>	Person – first service request indicator

---

### Value domain attributes

---

### Collection and usage attributes

<i>Guide for use:</i>	Only formal referrals are collected in this data element. The forms of referral in the value domain are regarded as formal referrals. A formal referral is any form of verbal or written contact with the person, group or organisation from which the individual or group could be referred.
<i>Collection methods:</i>	The permissible values for this data element are used to form the response categories to the question: 'From the referral list below please select one that represents the source of formal referral for this client.'

### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>Implementation start date:</i> 01/07/2013 <i>Implementation end date:</i> 30/06/2014 <i>Conditional obligation:</i> In the Specialist Homelessness Services NMDS, this item is only asked of clients. <i>DSS specific information:</i> In the Specialist Homelessness Services NMDS, this data element is collected at the date of presentation. This collection records a response of Don't know (CODE 99), which is equivalent to the code Don't know (CODE 22) in the Standard.

9	Not stated/inadequately described										
<i>Supplementary values:</i>											

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	Health professionals who may diagnose a mental health condition include: <ul style="list-style-type: none"><li>• Psychologists</li><li>• Psychiatrists</li><li>• General practitioners</li><li>• Mental health registered nurses.</li></ul>
<i>Collection methods:</i>	Have you ever been diagnosed to have a mental health condition by a health professional? e.g. psychologist, psychiatrist, doctor, nurse.

#### Relational attributes

*Related metadata references:*

See also [Person – mental health services received timeframe, code N](#) Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

See also [Person – source of information on a mental health condition indicator, code N](#) Housing assistance, Standard 01/05/2013, Homelessness, Standard 01/05/2013

See also [Person – source of information on a mental health condition, code N](#) Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

*Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this data element is conditional on the client providing consent to release their personal data to the AIHW. The data element Client – consent obtained indicator, yes/no code N, must receive a response of Yes (CODE 1).

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected at the date of presentation. Evidence suggests that the longer persons with mental health problems are supported by specialist homelessness services, the more likely they are to move into public, or community housing or rental housing rather than return to rough sleeping. Access to a range of longer-term supports and community-based services will increase the early intervention and recovery support options for people who are homeless with a mental illness and substance abuse disorders.

---

## Full-time/part-time status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person (employed) – full-time/part-time status, code N
<i>METeOR identifier:</i>	269950
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	Whether a person in paid employment is employed full-time or part-time, as represented by a code.
<i>Context:</i>	Labour force characteristics.
<i>Data Element Concept:</i>	Person (employed) – full-time/part-time status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Full-time</td></tr><tr><td>2</td><td>Part-time</td></tr></tbody></table>	Value	Meaning	1	Full-time	2	Part-time
Value	Meaning						
1	Full-time						
2	Part-time						
<i>Supplementary values:</i>	9 Not stated/inadequately described						

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>Applies only to people whose labour force status is employed. (See metadata item Person – labour force status, code N for a definition of 'employed'). Paid employment includes persons who performed some work for wages or salary, in cash or in kind, and persons temporarily absent from a paid employment job but who retained a formal attachment to that job.</p> <p>Code 1 Full-time: Employed persons are working full-time if they:</p> <ul style="list-style-type: none"><li>(a) usually work 35 hours or more in a week (in all paid jobs) or</li><li>(b) although usually working less than 35 hours a week, actually worked 35 hours or more during the reference</li></ul>
-----------------------	--

period.

Code 2 Part-time:

Employed persons are working part-time if they usually work less than 35 hours a week (in all paid jobs) and either did so during the reference period, or were not at work in the reference period.

Code 9 Not stated/ inadequately described:

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

*Collection methods:*

Can be collected for an actual week (e.g. a particular reference period), or a usual week (e.g. a person usually works part time though they worked full-time in the last week). Note: if collected for a particular reference period, respondents may report 0 hours if on leave for the reference period. For most purposes the hours usually worked will be more appropriate.

This metadata item should be based on the number of hours worked by the person (either actual or usual). It should not be based on the self-enumerated question suggested in the Collection methods of metadata item Person – labour force status, code N. Doing so would result in inaccurate information.

*Comments:*

See the Australian Bureau of Statistics website for details regarding labour force data items and standard questions.

## Source and reference attributes

*Origin:*

Australian Bureau of Statistics 1999. Standards for Social, Labour and Demographic Variables, Labour Force Variables. Full-Time/Part-Time Status.

## Relational attributes

*Related metadata references:*

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services (SHS) NMDs, this item is only asked of clients. This item is conditional on a response of Employed (CODE 1) in the data element *Person – labour force status, code N*.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't know (CODE 3), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

---

## Funding status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service provider organisation – government funding indicator, yes/no code N
<i>METeOR identifier:</i>	388518
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	An indicator of whether a service provider organisation is currently receiving government funding to assist with providing services, as represented by a code.
<i>Data Element Concept:</i>	Service provider organisation – funding indicator

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code

2	No						

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 YES Record if the service provider organisation received funding.
	CODE 2 NO Record if the service provider organisation did not receive funding.

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Organisation file cluster (Indigenous community housing)</a> Housing assistance, Standard 01/05/2013  <i>DSS specific information:</i> In the Indigenous Community Housing (ICH) collection "Unfunded" was recorded as "0". However, in this data element "unfunded" has been recorded as "2" and should be mapped accordingly. For the purposes of this collection 'funded' refers to an organisation that received government funding for the
---	--

reference financial year, and 'unfunded' refers to an organisation that did not receive funding for the reference financial year.

In NSW, the ICH sector collects data from Aboriginal Community Housing Providers that are actively registered with the Aboriginal Housing Office, rather than by their funding status. For the purposes of this collection, active registration is used as a proxy for funding, but it should be noted that active registration does not guarantee funding.

## Data element attributes

---

### Collection and usage attributes

*Comments:*

Geographical coordinates (latitudes and longitudes) are the universal system for defining spatial position. A set of geographic coordinates on a datum is complete and unique, worldwide.

Positions of geographic features can be defined in space by a set of coordinates. In order for coordinates to be unique, the coordinate reference system needs to be fully defined.

A coordinate reference system is realised by a reference frame, which comprises a datum and a coordinate system.

Latitudes can also be expressed in degrees, minutes and seconds (e.g. + 66° 33' 39"), see METeOR for this related item. A conversion to decimal degrees from the degrees, minutes and seconds format can be calculated with the following formula: Decimal Degrees = Degrees + ((Minutes / 60) + (Seconds / 3600)). (REF:

<https://www2.landgate.wa.gov.au/slip/portal/home/Graticule.html>)

Usage example: -75° 59' 32.483" converts to -75.992356389 in decimal degrees (rounded up to 9 decimal places).

## Data element attributes

---

### Collection and usage attributes

*Comments:* Geographical coordinates (latitudes and longitudes) are the universal system for defining spatial position. A set of geographic coordinates on a datum is complete and unique, worldwide.

Positions of geographic features can be defined in space by a set of coordinates. In order for coordinates to be unique, the coordinate reference system needs to be fully defined. A coordinate reference system is realised by a reference frame, which comprises a datum and a coordinate system. Longitudes can also be expressed in degrees, minutes and seconds (e.g. 150° 54' 45".98), see METeOR for this related item. A conversion to decimal degrees from the degrees, minutes and seconds format can be calculated with the following formula: Decimal Degrees = Degrees + ((Minutes / 60) + (Seconds / 3600)). (REF: <https://www2.landgate.wa.gov.au/slip/portal/home/Graticule.html>)

Usage example: -75° 59' 32.483" converts to -75.992356389 in decimal degrees (rounded up to 9 decimal places).

---

## Geographic remoteness

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Dwelling – geographic remoteness, classification (ASGC-RA) N
<i>METeOR identifier:</i>	491575
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The remoteness of a dwelling, based on the physical road distance to the nearest urban centre and its population size, as represented by a code.
<i>Data Element Concept:</i>	Dwelling – Geographic remoteness

---

### Value domain attributes

---

#### Representational attributes

<i>Classification scheme:</i>	Australian Standard Geographical Classification 2010	
<i>Representation class:</i>	Code	
<i>Data type:</i>	String	
<i>Format:</i>	N	
<i>Maximum character length:</i>	1	
<i>Permissible values:</i>	Value	Meaning
	1	Major cities of Australia
	2	Inner regional Australia
	3	Outer regional Australia
	4	Remote Australia
	5	Very remote Australia
	6	Migratory
<i>Supplementary values:</i>	9	Not stated/inadequately described

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Major cities of Australia 'Major cities of Australia' includes Census Collection Districts (CDs) with an average Accessibility/Remoteness Index of Australia (ARIA+) index value of 0 to 0.2. CODE 2 Inner regional Australia 'Inner regional Australia' includes CDs with an average ARIA+ index
-----------------------	---

value greater than 0.2 and less than or equal to 2.4.

CODE 3 Outer regional Australia

'Outer regional Australia' includes CDs with an average ARIA+ index value greater than 2.4 and less than or equal to 5.92.

CODE 4 Remote Australia

'Remote Australia' includes CDs with an average ARIA+ index value greater than 5.92 and less than or equal to 10.53.

CODE 5 Very remote Australia

'Very remote Australia' includes CDs with an average ARIA+ index value greater than 10.53.

CODE 6 Migratory

'Migratory' is composed of off-shore, shipping and migratory CDs.

*Collection methods:*

In this value domain, physical distance is defined in terms of ARIA+ codes, rather than a simple linear distance between points.

The list of permissible values for this value domain, i.e. codes 1 to 6, is intended to be directly mappable to the values used by the ABS to describe remoteness areas, i.e. codes 0 to 5.

*Comments:*

In its initial form, as developed by GISCA and the then Department of Health and Aged Care in 1999, ARIA scores ranged from 0 to 12 and were based on proximity to 4 points of reference.

A new version, ARIA+, was introduced in 2003, with ARIA+ scores now based on proximity to 5 points of reference. Also, changes were made to allow for more accurate estimation of the cost of travelling from Tasmania to the mainland, and to increase accuracy for locations at the urban fringe.

## Greatest need date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household – greatest need date, DDMMYYYY
<i>METeOR identifier:</i>	388447
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The date on which it is determined that a household is in greatest need of access to services, expressed as DDMMYYYY.

*Data Element Concept:* Household – greatest need date

---

### Value domain attributes

#### Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

---

### Data element attributes

#### Collection and usage attributes

*Collection methods:* This metadata item should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, the date July 1 2002 should be recorded as 01072002.

*Comments:* The date when greatest need applied to a household may be the same as the date they were eligible for assistance, or the day the paperwork was submitted (i.e. the date the household was placed on the waitlist).

#### Relational attributes

*Related metadata references:* Supersedes [Date eligible for assistance, version 1, DE, NHADD, NHDAMG, Superseded 01/03/2005.pdf](#) (13.8 KB)

[Household \(housing assistance\) cluster](#) Housing assistance, Standard 01/05/2013

[Tenancy/vacancy cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

This item determines whether the household is assessed as being in greatest need at the time of allocation. In the Community Housing collection greatest needs households, are households who were subject to one or more of the following circumstances:

- they were homeless; or
- their life or safety was at risk in their accommodation; or
- their health condition was aggravated by their housing; or
- their housing was inappropriate to their needs; or
- they had very high rental housing costs.

A homeless household for the greatest need definition is a household with no housing or a household residing in temporary or emergency accommodation. It includes households who:

- lived in accommodation provided by a specialist homelessness services agency or some other form of emergency accommodation;
- were totally without permanent shelter;
- lived in shelter that was unlawful such as those who were forced to squat in derelict buildings; or
- stayed temporarily with friends or relatives in the short term.

Unknown values are recorded as "U", and should be mapped to "Code 9=Not stated/inadequately described".

5	Very high housing costs														
6	Other														
<i>Supplementary values:</i>	9 Not stated/inadequately described														

#### Collection and usage attributes

<i>Guide for use:</i>	<p><b>Code 1 Homeless</b></p> <p>Homeless, for the purpose of the priority access national standard, is defined as a household with no housing or a household residing in temporary or emergency accommodation at the time of housing allocation. It includes households who:</p> <ul style="list-style-type: none"><li>lived in accommodation provided by a Specialist Homelessness Services (SHS) agency or some other form of emergency accommodation;</li><li>were totally without permanent shelter (e.g. wandered from place to place, slept out on the street or on park benches);</li><li>lived in shelter that was unlawful such as those who</li></ul>
-----------------------	--

were forced to squat in derelict buildings; or

- stayed temporarily with friends or relatives in the short term (e.g. up to a maximum of 6 weeks duration).

**Code 2 Life or safety was at risk in their accommodation**

This includes situations where people were:

- subject to domestic violence; or
- subject to sexual/emotional abuse; or subject to child abuse; or at risk of violence or who feared for their safety in the home environment.
- Violence is defined as any incident involving the occurrence, attempt or threat of either physical or sexual assault. Physical assault involves the use of physical force with the intent to harm or frighten a person. The threat to harm should only be included if it is believed the harm is likely to be carried out. Sexual assault includes acts of a sexual nature against a person's will through the use of physical force, intimidation or coercion, or any attempts to do this.

**Code 3 Health condition aggravated by housing:**

It includes people who lived in the following situations:

- Medical condition or **disability** which rendered their housing unsuitable (e.g. disabled person who required modified accommodation, elderly persons who were housebound due to mobility problems in highset dwellings); appropriate housing stock was either not available, or not available at an affordable cost, in the private rental market (e.g. dwellings with appropriate modifications for a person with a disability); a health condition or disability which was caused or exacerbated by the living situation.

**Code 4 Housing inappropriate to needs:**

This category captures housing situations that indicate a person did not have access to safe and secure housing at the time of allocation and these situations are not included in categories 1 to 3 above (people with housing affordability issues are captured in category 5).

Inappropriate housing includes persons who:

- lived in poor housing locations that resulted in isolation from community services, social networks and support systems, and these services and supports were necessary to maintain independent living. This category includes families that were divided due to their housing situation; or lived in overcrowded situations where an additional two bedrooms was required for adequate housing according to the **proxy occupancy standard**; or were unable to access accommodation in the private rental market due to discrimination.

Discrimination refers to a person who was treated unfairly because they belonged to a particular group of people. Types of discrimination include: sex; race; age; marital status; sexual orientation; or disability (Anti-discrimination Board); or lived in situations where their tenure was insecure and they had received an eviction notice (either written or verbal) and they had no access to adequate legislative protection; or lived in housing that had severe structural or other maintenance problems (e.g. property had been declared unfit for human habitation, severe dampness, lacked essential facilities such as cooking or bathroom).

**Code 5 Very high housing costs:**

This category identifies households that paid 41% or more of their income in rent at the time of housing allocation. This definition is not intended to suggest that households paying between 30-41% of income on rent live in affordable housing situations. The definition aims to capture the group of the population who experience the more severe end of housing affordability problems and the group for which literature suggests are least able to decrease their housing costs.

## Data element attributes

---

### Collection and usage attributes

*Collection methods:*

More than one greatest need reason can be recorded for a household.

In counting the total number of greatest need households, each household should only be counted once.

*Comments:*

It should be noted that as housing assistance allocation practices vary across:

- states and territories within a collection
- data collections within states and territories.

Caution should be used when interpreting information and/or making comparisons in relation to this metadata item.

#### **Collection and usage attributes**

*Guide for use:* In the context of health, an activity is the execution of a task or action by an individual. An activity limitation is a difficulty an individual may have in executing an activity. Activity limitation varies with the environment, and is assessed in relation to a particular environment; the absence or presence of assistance, including aids and equipment, is an aspect of the environment.

The level of difficulty includes the amount of assistance a person may currently receive (such as from a carer, relative etc.) to perform tasks in each life area, not just unmet needs.

*Collection methods:* It is expected that this data element will be used to collect information from the individual being assessed, or a proxy/carer or service worker answering on their behalf. The responses are phrased in response to the question 'For each of the following activities, do you need help/supervision, have difficulty, or use aids/equipment? (choose one answer for each row)'.

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

For the purposes of this collection, a unique household identifier may be assigned by jurisdictions by prefixing the assistance agency's unique household identifier with a unique agency identifier. This modification provides for the contingency that assistance agencies coincidentally assign identical identifiers that would otherwise lead to distinct households having the same household identifier.

[Tenancy/vacancy cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

---

## Household Indigenous status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household – Indigenous status, yes/no code N
<i>METeOR identifier:</i>	460738
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	An indicator of whether any member of the household identifies as being of Aboriginal or Torres Strait Islander origin, as represented by a code.
<i>Data Element Concept:</i>	Household – Indigenous status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No
Value	Meaning						
1	Yes						
2	No						
<i>Supplementary values:</i>	9 Not stated/inadequately described						

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 YES Record if any member of the household identifies as Indigenous. CODE 2 NO Record if no members of the household identifies as Indigenous. An Indigenous household is one which contains one or more Indigenous people. This definition may not be consistent with eligibility requirements for assistance targeted to Indigenous people under a specific program. For example, some programs specify that there must be an Indigenous person aged 15 or over to be
-----------------------	--

classified as an Indigenous household.

A household excludes visitors to a household.

*Comments:*

Together with **family**, household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.

Australia's Aboriginal and Torres Strait Islander peoples occupy a unique place in Australian society and culture. In the current climate of reconciliation, accurate and consistent statistics about Aboriginal and Torres Strait Islander peoples are needed in order to plan, promote and deliver essential services, to monitor changes in wellbeing and to account for government expenditure in this area.

#### Collection and usage attributes

<i>Collection methods:</i>	<p>CODE 1 New application A household which has applied for rental housing assistance and has been deemed eligible for, but has not yet received the assistance. This includes current housing tenants who have applied for assistance different from what they currently receive.</p> <p>CODE 2 Transfer application A household which has applied to relocate from one dwelling to another dwelling within the same housing program during the financial year. This includes households that wish to transfer to another dwelling for reasons other than applying for assistance which is different from what they currently receive.</p>
----------------------------	---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This data element is used in the context of the waitlist
-----------------------	--

population. It should be used in conjunction with *Household – application date, DDMMYYYY* to determine those who have been deemed eligible for services and who are waiting to be allocated to public rental housing or state owned and managed Indigenous housing.

The waiting list population refers to applicants who meet the following criteria:

- residing in the state of application
- eligible for assistance
- wishing to pursue their application.

Potential applicants still awaiting eligibility assessment are excluded.

*Collection methods:*

Households that applied for a transfer and received housing assistance for that financial year should be counted. This includes households that wish to transfer to another dwelling for reasons other than applying for assistance different from what they currently receive. Include applications from those who have been assisted by another program such as temporary or crisis accommodation while waiting for housing assistance. Mutual exchanges and same address transfers are excluded from the count of total number of applicant households on the waiting list.

In the public rental housing and state owned and managed Indigenous housing data collections this metadata item is measured over a financial year.

#### Collection and usage attributes

*Guide for use:* This metadata item is based on the Australian Bureau of Statistics (ABS)

standard for Indigenous status. For detailed advice on its use and application please refer to the ABS Website as indicated in the Reference documents.

The classification for Indigenous status has a hierarchical structure comprising two levels. There are four categories at the detailed level of the classification which are grouped into two categories at the broad level. There is one supplementary category for 'not stated' responses. The classification is as follows:

Indigenous:

- Aboriginal but not Torres Strait Islander origin.
- Torres Strait Islander but not Aboriginal origin.
- Both Aboriginal and Torres Strait Islander origin.

Non-Indigenous:

- Neither Aboriginal nor Torres Strait Islander origin.

Not stated/ inadequately described:

This category is not to be available as a valid answer to the questions but is intended for use:

- Primarily when importing data from other data collections that do not contain mappable data.
- Where an answer was refused.
- Where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

Only in the last two situations may the tick boxes on the questionnaire be left blank.

## Data element attributes

---

### Collection and usage attributes

*Collection methods:*

The standard question for Indigenous Status is as follows:

[Are you] [Is the person] [Is (name)] of Aboriginal or Torres Strait Islander origin?

(For persons of both Aboriginal and Torres Strait Islander origin, mark both 'Yes' boxes.)

No.....

Yes, Aboriginal.....

Yes, Torres Strait Islander.....

This question is recommended for self-enumerated or interview-based collections. It can also be used in circumstances where a close relative, friend, or another member of the household is answering on behalf of the subject. It is strongly recommended that this question be asked directly wherever possible.

When someone is not present, the person answering for them should be in a position to do so, i.e. this person must know well the person about whom the question is being asked and feel confident to provide accurate information about them.

This question must always be asked regardless of data collectors' perceptions based on appearance or other factors.

The Indigenous status question allows for more than one response. The procedure for coding multiple responses is as follows:

If the respondent marks 'No' and either 'Aboriginal' or 'Torres Strait Islander', then the response should be coded to either Aboriginal or Torres Strait Islander as indicated (i.e. disregard the 'No' response).

If the respondent marks both the 'Aboriginal' and 'Torres Strait Islander' boxes, then their response should be coded to 'Both Aboriginal and Torres Strait Islander Origin'.

If the respondent marks all three boxes ('No', 'Aboriginal' and 'Torres Strait Islander'), then the response should be coded to 'Both Aboriginal and Torres Strait Islander Origin' (i.e. disregard the 'No' response).

This approach may be problematical in some data collections, for example when data are collected by interview or using screen based data capture systems. An additional response category

Yes, both Aboriginal and Torres Strait Islander...

may be included if this better suits the data collection practices of the agency or establishment concerned.

*Comments:*

The following definition, commonly known as 'The Commonwealth Definition', was given in a High Court judgement in the case of Commonwealth v Tasmania (1983) 46 ALR 625.

'An Aboriginal or Torres Strait Islander is a person of Aboriginal or Torres Strait Islander descent who identifies as an Aboriginal or Torres Strait Islander and is accepted as such by the community in which he or she lives'.

There are three components to the Commonwealth definition:

- descent;
- self-identification; and
- community acceptance.

In practice, it is not feasible to collect information on the community acceptance part of this definition in general purpose statistical and administrative collections and therefore standard questions on Indigenous status relate to descent and self-identification only.

<i>Supplementary values:</i>											

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1    Employed:</p> <p>Persons aged 15 years and over who, during the reference week:</p> <p>(a) worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (comprising 'Employees', 'Employers' and 'Own Account Workers'); or</p> <p>(b) worked for one hour or more without pay in a family business or on a farm (i.e. 'Contributing Family Worker'); or</p> <p>(c) were 'Employees' who had a job but were not at work and were:</p> <ul style="list-style-type: none"><li>• on paid leave</li><li>• on leave without pay, for less than four weeks, up to the end of the reference week</li><li>• stood down without pay because of bad weather or plant</li></ul>
-----------------------	--

breakdown at their place of employment, for less than four weeks up to the end of the reference week

- on strike or locked out
- on workers' compensation and expected to be returning to their job, or
- receiving wages or salary while undertaking full-time study; or

(d) were 'Employers', 'Own Account Workers' or 'Contributing Family Workers' who had a job, business or farm, but were not at work.

#### CODE 2 Unemployed:

Unemployed persons are those aged 15 years and over who were not employed during the reference week, and:

(a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week. Were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week). Or were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then; or

(b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown. Note: Actively looking for work includes writing, telephoning or applying in person to an employer for work. It also includes answering a newspaper advertisement for a job, checking factory or job placement agency notice boards, being registered with a job placement agency, checking or registering with any other employment agency, advertising or tendering for work or contacting friends or relatives.

#### CODE 3 Not in the Labour Force:

Persons not in the labour force are those persons aged 15 years and over who, during the reference week, were not in the categories employed or unemployed, as defined. They include persons who were keeping house (unpaid), retired, voluntarily inactive, permanently unable to work, persons in institutions (hospitals, gaols, sanatoriums, etc.), trainee teachers, members of contemplative religious orders, and persons whose only activity during the reference week was jury service or unpaid voluntary work for a charitable organisation.

#### *Collection methods:*

## Data element attributes

---

### Collection and usage attributes

*Comments:* Labour force status is one indicator of the socio-economic status of a person and is a key element in assessing the circumstances and needs of individuals and families.

### Source and reference attributes

*Origin:* Health Data Standards Committee

### Relational attributes

*Related metadata references:* Supersedes [Labour force status, version 3, DE, Int. NCSDD & NHDD, NCSIMG & NHIMG, Superseded 01/03/2005.pdf](#) (19.5 KB)

*Implementation in Data Set Specifications:* [Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

This data element reflects the ABS Labour force status standard variable. Consequently, the value domain definitions explicitly exclude anyone aged under 15.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't Know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

---

## Last service provision date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element

#### Relational attributes

<i>Related metadata references:</i>	Supersedes <a href="#">Last service contact date, version 2, DE, NCSDD, NCSIMG, Superseded 01/03/2005.pdf</a> (14.6 KB)
<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>Implementation start date:</i> 01/07/2013 <i>Implementation end date:</i> 30/06/2014 <i>Conditional obligation:</i> In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected for all clients.

This data element is collected for the last service provision date within the reporting period. If the last provision of a service was also the end of the service episode, as recorded by the data element Service episode – episode end date, DDMMYYYY, then the same date will be recorded for both data elements.

If the last provision of a service is not the end of the service episode (i.e. where other services continue to be provided) the actual date of the end of the service event should be recorded. However if the service event within the service episode is ongoing to the next reporting period, i.e. ongoing to the following month, then the Service event – last service provision date, DDMMYYYY will be recorded as the last day of the current month.

This data element should ascertain the actual date of service, not the date when the data is recorded.

---

## Letters of family name

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – letters of family name, text XXX
<i>METeOR identifier:</i>	349481
<i>Registration status:</i>	Community Services, Standard 27/03/2007 Housing assistance, Standard 23/08/2010 Health, Standard 07/12/2011 Early Childhood, Standard 21/05/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	The combination of 2nd, 3rd and 5th letters of a person's family name.
<i>Data Element Concept:</i>	Person – letters of family name

---

### Value domain attributes

#### Representational attributes

<i>Representation class:</i>	Text
<i>Data type:</i>	String
<i>Format:</i>	XXX
<i>Maximum character length:</i>	3

---

### Data element attributes

#### Collection and usage attributes

<i>Guide for use:</i>	<p>In the three spaces, the agency should record the 2nd, 3rd and 5th letters of the client's family name.</p> <p>For example: If the client's family name is Brown, the reported value should be RON. If the client's family name is Thompson, the reported value should be HOP.</p> <p>If the client's family name includes non-alphabetic characters – for example hyphens (as in Lee-Archer), apostrophes (as in O'Mara) or blank spaces (as in De Vries) – these non-alphabetic characters should be ignored when counting the position of each character.</p> <p>Regardless of the length of a person's name, the reported value should always be three characters long. If the legal family name is not long enough to supply the requested letters (i.e. a legal family name of less than five letters) then agencies should substitute the number '2' to reflect the missing letters. The placement of a number '2' should always correspond to the same space that the missing letter would have within the 3-digit field. A number (rather than</p>
-----------------------	--

a letter) is used for such a substitution in order to clearly indicate that an appropriate corresponding letter from the person's name is not available.

For example: If a person's family name is Farr, then value reported would be AR2 because the 2 is substituting for a missing 5th letter of the family name. Similarly, if the person's family name was Hua, then the value reported would be UA2 because the 2 is substituting for the missing 5th letter of the family name.

If a client's family name is missing altogether the agency should record the number 999 for all three spaces associated with the family name, (not the number 2). In some cultures it is traditional to state the family name first. To overcome discrepancies in recording/reporting that may arise as a result of this practice, agencies should always ask the person to specify their legal first given name and their legal family name separately. These should then be recorded as first given name and family name as appropriate, regardless of the order in which they may be traditionally given.

*Comments:*

The selected *Letters of family name* can be used in combination with *Letters of given name*, *Date of birth* and *Sex* to develop a statistical linkage key to facilitate the linkage of records for statistical purposes only. This key will also enable linkage to other related databases that either have the same linkage key or the fundamental information to form the same key. The linkage is to assist research and analysis of the data, not for tracking of individuals through the system for case management.

The provision of letters of a person's name can be a sensitive issue because of privacy and confidentiality concerns. The use of this information will be in accordance with privacy principles.

*Conditional obligation:*

This is conditional on additional information being required for the dwelling address, other than street number, street name, postcode etc.

---

## Lot number

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Address – lot number, identifier X[XXXXXX]
<i>Synonymous names:</i>	Allotment number
<i>METeOR identifier:</i>	429543
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The reference number, forming part of an address, allocated to a property for subdivision administration purposes prior to road numbering, as represented by an alphanumeric identifier.
<i>Data Element Concept:</i>	Address – lot number

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Identifier
<i>Data type:</i>	String
<i>Format:</i>	X[XXXXXX]
<i>Maximum character length:</i>	6

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	Where an official Road number has not been assigned, this field may be used for postal purposes as well as the physical identification of an address site.
<i>Collection methods:</i>	While the word 'LOT' should not appear within this data element, for identification purposes, the word 'LOT' must precede the lot number.

#### Source and reference attributes

<i>Submitting organisation:</i>	Australian Institute of Health and Welfare
<i>Origin:</i>	Standards Australia 2006. AS 4590 – 2006 Interchange of client information. Sydney: Standards Australia.

#### Relational attributes

---

## Maintenance expenditure

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service provider organisation – housing maintenance expenditure, total Australian currency N[N(8)].NN
<i>METeOR identifier:</i>	464813
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The cost incurred by a service provider organisation to maintain the value of the asset or to restore the asset to its original condition, expressed in dollars and cents.
<i>Data Element Concept:</i>	Service provider organisation – housing maintenance expenditure

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[N(8)].NN
<i>Maximum character length:</i>	11
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Data element attributes

---

#### Collection and usage attributes

<i>Comments:</i>	This data element is included in the calculation of the average costs of providing rental housing assistance (excluding capital).
------------------	---

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Organisation file cluster (Indigenous community housing)</a> Housing assistance, Standard 01/05/2013 <i>DSS specific information:</i> Unknown dollar values are recorded as "U". Includes all housing maintenance expenses from the organisation's financial reporting statement. This includes: day-to-day maintenance reflecting general wear and tear; cyclical maintenance which is part of a planned maintenance program; and other maintenance (e.g. repairs due to vandalism).
---	---

---

## Market rent weekly value

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Dwelling – weekly market rent value, total Australian currency N[NNNNN].NN
<i>METeOR identifier:</i>	444432
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The value of the weekly rent that would be charged for a dwelling in a private rental market, in dollars and cents.
<i>Data Element Concept:</i>	Dwelling – weekly market rent value

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[NNNNN].NN
<i>Maximum character length:</i>	8
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Collection and usage attributes

<i>Guide for use:</i>	This value domain must be expressed to two decimal places. Where there is a dollar value and no cent value, the cents must be expressed as .00 (e.g. 100.00).

---

### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	Permissible values for this data element are captured using the following question: "Have you ever accessed or tried to access any services from this agency before?"
----------------------------	--

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>Implementation start date:</i> 01/07/2013 <i>Implementation end date:</i> 30/06/2014 <i>Conditional obligation:</i> In the Specialist Homelessness Services NMDS, this item is only asked of clients.
---	---

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is used to gain an idea of the 'trend of homelessness'. It does this by collecting data as to whether or not the presenting person has accessed a specialist homelessness agency before.

---

## Number of applicants on waiting list

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service provider organisation – waiting list, total people N[NNN]
<i>METeOR identifier:</i>	480133
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The total number of people on service provider organisation's record or list of applicants waiting for the provision of services.
<i>Data Element Concept:</i>	Service provider organisation – waiting list

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Number
<i>Format:</i>	N[NNN]
<i>Maximum character length:</i>	4
<i>Supplementary values:</i>	Value      Meaning
	9999      Inadequately described/not stated
<i>Unit of measure:</i>	Person

### Data element attributes

---

#### Relational attributes

*Implementation in Data Set Specifications:* [Community housing waiting list cluster](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

This item is collected twice:

- on its own to ascertain the total number of people on the waiting list
- in combination with Person – application type, housing assistance code N and Household – greatest need indicator, yes/no code N to ascertain the number of new applicants on the waiting list who are in greatest need.

Unknowns are collected as "U", and should be mapped to Code 9999 - Not stated/inadequately described.

---

## Number of bedrooms

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Dwelling – number of bedrooms, total N[NN]
<i>METeOR identifier:</i>	479778
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The total number of rooms within a dwelling which are used or intended to be used primarily for sleeping.
<i>Data Element Concept:</i>	Dwelling – number of bedrooms

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total				
<i>Data type:</i>	Number				
<i>Format:</i>	N[NN]				
<i>Maximum character length:</i>	3				
<i>Supplementary values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>999</td><td>Not stated/inadequately described</td></tr></tbody></table>	Value	Meaning	999	Not stated/inadequately described
Value	Meaning				
999	Not stated/inadequately described				
<i>Unit of measure:</i>	Bedroom				

#### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	Count bedrooms designed for use as bedrooms and other rooms permanently modified and intended for use as bedrooms (such as a sleep out or built in veranda). Bedsits should be counted as a 1 bedroom dwelling. In the case of <b>boarding house buildings</b> , the unit of counting is the <b>boarding house room</b> which usually has only one bedroom.  Where reporting the number of bedrooms at the tenancy level, the number of bedrooms should be reported for each tenancy rental unit.

[Private rent assistance DSS 2011-12](#) Housing assistance,  
Standard 01/05/2013

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

*DSS specific information:*

In the Private Rental Assistance collection, this item refers to the unique identifier for the main applicant.

The main applicant identifier should be the same person identifier that is used by the social housing authority across different housing programs. This field may be used to link private rent assistance records with corresponding public rental housing, state owned and managed Indigenous housing, and/or home purchase assistance records. If no such identifier exists, this field should be left blank.

## Physical address indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Address – physical address indicator, yes/no code N
<i>Synonymous names:</i>	Physical address type code
<i>METeOR identifier:</i>	428950
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standard 01/05/2013
<i>Definition:</i>	An indicator of whether an address reflects a geographical place, as represented by a code.
<i>Data Element Concept:</i>	Address – physical address indicator

---

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code								
<i>Data type:</i>	Number								
<i>Format:</i>	N								
<i>Maximum character length:</i>	1								
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr><tr><td>9</td><td>Not stated/inadequately described</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No	9	Not stated/inadequately described
Value	Meaning								
1	Yes								
2	No								
9	Not stated/inadequately described								
<i>Supplementary values:</i>	9 Not stated/inadequately described								

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Yes The address is a physical address and reflects a geographical place, e.g. a property. CODE 2 No The address is a virtual address, e.g. a PO Box. The address type code can only exist if an associated address has been entered. Usage Examples: 12 Smith St (physical address) PO Box 123 (virtual address)

---

## Collection and usage attributes

### *Guide for use:*

This data element is used in conjunction with *Address – postal delivery number, identifier [X(11)]*.

The recommended code description is the list of postal delivery type codes in the Australia Post Address Presentation Standards.

This data element is used where mail is to be delivered to a box, bag or agent for pick-up by the intended recipient or to the rural mail box number where no other address exists.

It is also used where mail is being sent to an area where normal mail delivery is unavailable, or not preferred.

Additionally it may be used in some rural areas where no other formal addressing structure exists to identify delivery addresses.

## Source and reference attributes

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013
---	---

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected a minimum of twice (for the client):

- within the previous month
- within the previous year.

If a client has indicated that they were homeless in the last month, then by default they should be recorded as homeless in the last 12 months.

This question allows the client to check all responses that apply, and therefore the client may have up to 3 valid responses for each instance of this question.

This collection records a response of Don't know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

### Data element attributes

---

#### Source and reference attributes

<i>Origin:</i>	Australian Bureau of Statistics. <a href="#">Standards for Social, Labour and Demographic Variables</a> . Viewed 3 November 2012.
----------------	---

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013 <i>Implementation start date:</i> 01/07/2013 <i>Implementation end date:</i> 30/06/2014 <i>Conditional obligation:</i> In the Specialist Homelessness Services NMDS, this item is only asked of clients. This data element reflects the ABS Sources of income standard variable. Consequently, the value domain
---	---

definitions explicitly exclude anyone aged under 15.

If income information on children under 15 years is sought for the Specialist Homelessness Services (SHS) NMDS, these persons may also be asked the sources of income questions. However, if comparability with ABS collections is required, the SHS data can be filtered using the age data element to remove responses for children aged under 15.

*DSS specific information:*

In the Specialist Homelessness Services (SHS) NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

For the purposes of the SHS collection the following list is used which aggregates to the ABS Sources of Income Classification.

### **Government pensions and allowances**

Newstart Allowance

Parenting Payment

Disability support pension (Centrelink)

Youth allowance

Age pension

Austudy/ ABSTUDY

Disability Pension (DVA)

Service pension (DVA)

War Widow(er)'s Pension (Including income support supplement) (DVA)

Sickness allowance

Carer Allowance

Carer Payment

Other government pensions and allowances

### **Other sources of income**

Employee income

Unincorporated business income

Other income nec

Nil income

Not stated/not known/inadequately described

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1 Client did not agree to one This option is used if the client was asked about formulating a plan, but they did not agree.</p> <p>CODE 2 Service episode too short Case management plans may not be appropriate for all clients, for example, when a client is supported for a 24 hour period or less. Support may include accommodation or other services.</p> <p>CODE 3 Part of another person's case management plan The client is covered by another client's case management plan.</p>
-----------------------	--

CODE 8 Other

If a case management plan was not formulated for a client for some other reason. This other reason should be collected.

CODE 9 Not stated/inadequately described

This code is not for use in primary data collections.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:*

This metadata item is answered from the perspective of an agency worker.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

"Why does a case management plan not exist?"

Responses of "other" should request further information by use of the words "please specify".

### Relational attributes

*Related metadata references:*

See also [Client – case management goal status, code N](#) Community Services, Standard 17/11/2010, Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

## Collection and usage attributes

### *Guide for use:*

#### CODE 1 Financial difficulties

Financial difficulties is selected if the person sought assistance because the person had insufficient money to pay for accommodation, food, bills or other essentials; if the person has adequate financial resources but has difficulties managing these resources; or if the person doesn't have the financial resources to meet rental commitments.

#### CODE 2 Housing affordability stress

Housing affordability stress is selected if the person sought assistance as a result of the current rent on the leased property being too high, or they are having difficulty meeting mortgage repayments, creating stress with general living expenses.

#### CODE 3 Housing crises

Housing crises is selected if the person was formally evicted from her/his previous accommodation arrangement (for example, by a landlord or public housing official) or if the person was asked to leave their previous accommodation (for example, if the person was asked to leave by flatmates).

#### CODE 4 Inadequate or inappropriate dwelling conditions

Inadequate or inappropriate dwelling conditions is selected if the person sought assistance as a result of household stress from overcrowded, unsuitable or unsafe dwelling conditions.

#### CODE 5 Previous accommodation ended

Previous accommodation ended is selected if the person's previous accommodation was no longer available (for

example the breakup of a group home or rental property being sold by owner).

**CODE 6 Time out from family/other situation**

Time out from family/other situation is selected if the person needed some time away from her/his family or if the person needed some time away from non-related individuals.

**CODE 7 Relationship/family breakdown**

Relationship/family breakdown is selected if the person sought assistance because of the dissolution of a spouse/partner relationship or other family relationship.

**CODE 8 Sexual abuse**

Sexual abuse is selected if the person sought assistance as a result of sexual abuse inflicted on the client by a family member or non-related individual.

**CODE 9 Domestic and family violence**

Domestic/family violence is selected if the person sought assistance as a result of physical or emotional abuse inflicted on the person by a family member.

**CODE 10 Non-family violence**

Non-family violence is selected if the person sought assistance as a result of physical or emotional abuse inflicted on the client by a non-related individual; or if the person was homeless or sought assistance as a result of violence or a threat of violence inflicted by a non-related individual.

**CODE 11 Mental health issues**

Mental health issues is selected if the person sought assistance because of their mental health. This does not include a situation in which the person sought assistance as a result of another person's mental health issues.

**CODE 12 Medical issues**

Medical issues is selected if the person sought assistance because of any conditions that are, or have been treated or diagnosed by a health professional.

**CODE 13 Problematic drug or substance abuse**

Problematic drug or substance use is selected if the person sought assistance as a result of his/her drug related problem. This does not include a situation in which the person sought assistance as a result of drug abuse by another person.

**CODE 14 Problematic alcohol use**

Problematic alcohol use is selected if the person sought assistance as a result of his/her alcohol related problem. This does not include a situation in which the person sought assistance as a result of alcohol use by another person.

#### CODE 15 Employment difficulties

Employment difficulties is selected where the person is experiencing difficulties or changes to their employment, that negatively impacts on their ability to work or on their life outside work. This includes cases where employment difficulties are creating current or future financial problems. Examples include difficulty maintaining employment; recently losing employment, or a change in employment conditions, such as reduction in pay/hours etc; bullying or harassment; unsafe employment conditions, (i.e. health safety risks), or unfair or illegal workplace practices/conditions (i.e. excessive workload, inflexible hours).

#### CODE 16 Unemployment

Unemployment is selected where the person sought assistance because of difficulties obtaining or maintaining employment and is currently unemployed.

#### CODE 17 Problematic gambling

Problematic gambling is selected if the person was homeless or sought assistance because they had insufficient means to cover the cost of living as a consequence of a one-off instance or an ongoing gambling problem.

#### CODE 18 Transition from custodial arrangements

Transition from custodial arrangements is selected if the person was recently released from a custodial institution such as a prison or detention centre.

#### CODE 19 Transition from foster care and child safety residential placements

Child safety placements include a range of services provided to children and young people under 18 years of age who are in need of care and protection. This service provides alternative overnight accommodation for children and young people who are unable to live with their parents. These arrangements include foster care, placements with relatives or kin, and residential care.

#### CODE 20 Transition from other care arrangements

Transition from other care arrangements is selected if the person was recently released from a care institution such as a hospital or disability care arrangement.

#### CODE 21 Discrimination including racial and sexual discrimination

Discrimination including racial and sexual discrimination is selected if the person was homeless or sought assistance because of discrimination based on their sex, age, race, religion or other personal attributes.

#### CODE 22 Itinerant

Itinerant is selected if the person was moving from place to

place or had no fixed address.

CODE 23 Unable to return home due to environmental reasons

Unable to return home due to environmental reasons is selected if the person is unable to return home due to environmental reasons; (e.g. wet season flooding).

CODE 24 Disengagement with school or other education and training

Disengagement with school or other education and training is selected where the person sought assistance for their difficulty with engaging within their education or training, creating difficulties for the person to establish connection with community and develop skills that will help them for future employment.

CODE 25 Lack of family and/or community support

The person has no family or community support structure which has led them to seek agency support.

CODE 26 Other

Other is selected if the person sought assistance because s/he recently arrived in the area (from another town or another country) and had nowhere to stay; if the person's previous accommodation was no longer available (for example, the death of a family member); if the person sought assistance as a result of his/her sexuality or sexual identification, or if the person is seeking assistance for a reason not listed above. The reason should be specified.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:*

This data element is intended to focus on the reason(s) the person presented to the agency as opposed to the underlying reasons or causes that may have built up over a lifetime.

There may be more than one reason why a person seeks assistance. This data element may be used to collect the main presenting reason or all presenting reasons.

If this data element is used to collect both, the main reason should be collected second, that is after 'all' reasons have been ascertained.

If a person does not nominate a list category record their response as 'Other' and record the description.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question(s):

'Which reason(s) listed, best describes why you are seeking assistance?'

and

'Of the reasons you have identified as why you are seeking assistance, which one, do you consider, to be the main reason?'

## Source and reference attributes

*Submitting organisation:* Australian Institute of Health and Welfare

## Relational attributes

*Related metadata references:* Supersedes [Person – reason for seeking assistance, homelessness code N\[N\]](#) Housing assistance, Superseded 01/05/2013, Homelessness, Superseded 01/05/2013

*Implementation in Data Set Specifications:* [Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services (SHS) NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected at the date of presentation.

This data element is collected twice (for the client):

- for all the presenting reasons for seeking assistance; and subsequently
- for the main presenting reason for seeking assistance

In both cases the reasons are those nominated by the client.

This question allows the client to check all responses that apply for all the presenting reasons for seeking assistance (up to 26 valid responses). The client should also select one main reason for seeking assistance.

## Rebated household status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household – rebated rent status, code N
<i>METeOR identifier:</i>	302581
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006
<i>Definition:</i>	Whether the household receiving housing assistance who as part of the assistance, pay less than the market rent value of the dwelling, as represented by a code.
<i>Data Element Concept:</i>	Household – rebated rent status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No
Value	Meaning						
1	Yes						
2	No						
<i>Supplementary values:</i>	9      Not stated/inadequately described						

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9    Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p><b>Code 1 Yes:</b> record if the household receiving housing assistance who as part of the assistance, pay less than the market rent value of the dwelling.</p> <p><b>Code 2 No:</b> record if the household receiving housing assistance who as part of the assistance, do not pay less than the market rent value of the dwelling.</p> <p>For example, a public housing dwelling may be assessed as having a market rent value of \$200 per week. On assessing the applicant household though, the State housing authority calculates that this household should pay no more than \$100 per week on rent. If this household is then allocated to this dwelling with a rent of \$100, (while the</p>
-----------------------	--

market rent value is \$200), then the household is considered to be rebated.

*Collection methods:*

For those jurisdictions who use a 'full rent' concept, a rebated household is one which pays less than full rent.

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	Please see the DSS specific information for each collection for a list of inclusions and exclusions of expenses.
<i>Collection methods:</i>	Measurement on an accrual accounting basis is preferred to measurement on a cash accounting basis. Expenditure is usually measured for an accounting period, typically a financial year (1 July to 30 June the following year).

#### Source and reference attributes

<i>Submitting organisation:</i>	National Housing Data Development Committee
<i>Origin:</i>	AIHW. Indigenous community housing 2009-10 collection manual. AIHW. Mainstream community housing 2009-10 collection manual.

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Organisation file cluster (Indigenous community housing)</a> Housing assistance, Standard 01/05/2013
---	---

*DSS specific information:*

Net recurrent expenses include all administration and operational costs such as:

- employee expenses (e.g. wages and salaries, superannuation, compensation, accrued leave, payroll tax, training)
- housing maintenance property-related expenses (e.g. rates, costs of disposals)
- office supplies and services (e.g. stationery, postage, telephone, office equipment, vehicle expenses, insurance)
- borrowing costs (e.g. interest) depreciation and amortisation
- other expenses

Net recurrent expenses exclude:

- depreciation on rental buildings (on tenancy rental units only, depreciation and amortisation on all other assets to be included)
- unrealised losses on financial assets
- recoverable expenses
- **Non-cash expenses**, including:
  - loss on disposal of assets
  - loss on revaluation of assets
  - impairment expenses
  - assets and services provided free of charge
  - cost of sale of inventory
  - grants and subsidies

This data element collects net recurrent expenditure over the financial year. See inclusions and exclusions for details on how to count **Other non-salary expenses**.

Unknown dollar values are recorded as "U".

[Service provider organisation cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

This item records the net recurrent cost to the service provider organisation.

**Includes:**

- Employee expenses (e.g. wages and salaries, payroll tax, superannuation, compensation, accrued leave, and training);
- Supplies and service expenses (e.g. stationery, postage,

telephone, vehicle, office equipment, information technology, auditing and accounting);

- Office rent;
- General accounting and personnel function costs (e.g. training costs or levies paid to community housing training authority or peak body);
- Grants and subsidies (excluding rental subsidies);
- Contracted community housing management services;
- Repairs and maintenance (e.g. day to day, cyclical or other);
- Rates (e.g. water or council/shire) where the provider is responsible for payment;
- Strata-title or body corporate charges;
- Costs of removal, sale or disposal of properties and inspections and building insurance where the provider is responsible for payment and public liability insurance; and
- Market rent paid (such as from head leasing) and interest expense (e.g. interest on loans).

**Excludes:**

- Costs used for the purposes of capital (stock provision);
- The purchase of dwellings; and
- Construction costs.

Unknown dollar values are recorded as "U".

##### Collection and usage attributes

<i>Guide for use:</i>	<p>Total expenditure includes all administration and operational costs, such as:</p> <ul style="list-style-type: none"><li>• employee expenses (e.g. wages and salaries, superannuation, compensation, accrued leave, payroll tax, training)</li><li>• housing maintenance; property-related expenses (e.g. rates, costs of disposals)</li><li>• office supplies and services (e.g. stationery, postage, telephone, office equipment, vehicle expenses, insurance)</li><li>• borrowing costs (e.g. interest)</li><li>• depreciation and amortisation</li><li>• and other expenses</li><li>• depreciation on rental buildings (on tenancy rental units only, depreciation and amortisation on all other assets to be included)</li><li>• loss on disposal of assets</li></ul>
-----------------------	--

- loss on revaluation of assets
- unrealised losses on financial assets
- impairment expenses assets and services provided free of charge
- recoverable expenses
- cost of sale of inventory
- grants and subsidies.

*Collection methods:*

Measurement on an accrual accounting basis is preferred to measurement on a cash accounting basis.  
Expenditure is usually measured for an accounting period, typically a financial year (1 July to 30 June the following year).

## Registered/awaiting government payment indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – registered/awaiting government payment indicator, code N
<i>METeOR identifier:</i>	506085
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013
<i>Definition:</i>	Whether a person has applied for a government benefit, pension or allowance, but is still awaiting their first payment, as represented by a code.
<i>Data Element Concept:</i>	Person – registered/awaiting government payment indicator

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No
Value	Meaning						
1	Yes						
2	No						
<i>Supplementary values:</i>	9 Not stated/inadequately described						

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	This data element may be collected twice: <ol style="list-style-type: none"><li>1. if a person has applied for a government benefit, pension or allowance, and is still awaiting their first payment before the support period starts; and</li><li>2. if a person has applied for a government benefit, pension or allowance, and is still awaiting their first payment after the support period commences.</li></ol>
<i>Collection methods:</i>	The permissible values for this data element are used to form the response categories to the questions:

"Have you applied for a government benefit?"; and  
"Are you waiting for the benefit?"

## Source and reference attributes

*Submitting organisation:* Australian Institute of Health and Welfare

## Relational attributes

*Implementation in Data Set Specifications:* [Specialist Homelessness Services NMDS 2013-14 Housing assistance, Standard 01/05/2013](#)  
Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

### *Conditional obligation:*

In the Specialist Homelessness Services NMDS, this data element is only collected for clients who report nil income (CODE 17) in Person – principal source of cash income, code NNNN.

This question establishes whether clients may have applied for a government benefit, pension or allowance, but are still awaiting their first payment.

### *DSS specific information:*

This data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

#### Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Self This code is selected if one person presents
-----------------------	---

CODE 2 Spouse/partner

This code is selected if a person has a relationship to the presenting unit head akin to a 'married' or 'partner' relationship. This includes same sex couples.

CODE 3 Parent/Guardian

This code is selected if the person is the parent or guardian of the presenting unit head.

CODE 4 Child

This code is selected if the person is natural or adopted child of the presenting unit head.

CODE 5 Step Child

This code is selected if the person is the step child of the presenting unit head.

CODE 6 Foster child

This code is selected if the person is the foster child of the presenting unit head.

CODE 7 Sibling

This code is selected if the person is either the brother or sister of the presenting unit head.

CODE 8 Aunt or Uncle

This code is selected if the person is either the aunt or uncle of the presenting unit head.

CODE 9 Niece or nephew

This code is selected if the person is either the niece or nephew of the presenting unit head.

CODE 10 Grandparent

This code is selected if the person is a grandparent of the presenting unit head.

CODE 11 Grandchild

This code is selected if the person is the grandchild of the presenting unit head.

CODE 12 Other relative

This code is selected if the person is a more distant relative to the presenting unit head, e.g. cousin, second cousin etc.

CODE 13 Unrelated person

This code is selected if the person accompanying the presenting unit head is not related to them. This would include those people who are friends of the person.

CODE 14 Unrelated flatmate or co-tenant

This code is selected if the person is either a flatmate or co-tenant with the presenting unit head.

CODE 15 Other relationship

This code is selected if the person has another type of relationship to the presenting unit head that has not been described above.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:*

This question is asked of the presenting unit head. It captures the relationship of the unit head to others with whom he/she is presenting.

If 'Other relative' is nominated ask what the relationship is and record it. This will enable coding of the relationship to the classification.

The standard question module for self-completed collections consists of two questions.

The presenting unit head is identified via the relationships within the presenting unit. If there is a child(ren) present (under 18 years old), the presenting unit head is the spokesperson which is:

- The parent/guardian representing any child(ren) (under 18 years old), or If there is no parent/guardian, present the most direct relationship representing any child(ren) (under 18 years old).
- If two siblings presented to an agency the presenting unit head would be the one that was regarded as the spokesperson for the two.

If there are no child(ren) present (under 18 years old), the presenting unit head is the spokesperson who is:

- The spouse/partner of another person within the presenting unit, or
- Is related in some way to another person within the presenting unit.

Obtaining this information does not require a response for the presenting unit head. For each subsequent person, the respondent is required to fill in the appropriate tick box in response to the above instruction. The set of response categories for Person 2 differs from those used for Person 3 and onwards, depending on their relationship to the presenting unit head.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

'Which category best describes your relationship to the presenting unit head?'

What is person's 1 relationship to Person 2?

Person 1 (Presenting unit head)

**Self** once identified - see Guide for Use guidelines.

Person 2

**Spouse/partner** of Person 1

**Parent** of Person 1

**Child** of Person 1  
**Step-child** of Person 1  
**Foster child** of Person 1  
**Sibling** of Person 1  
**Aunt or uncle** of Person 1  
**Niece or nephew** of Person 1  
**Grandparent** of Person 1  
**Grandchild** of Person 1  
**Other relative** of Person 1 please specify  
**Unrelated flatmate or co-tenant** of Person 1  
**Other relationship** to Person 1 please specify  
Questions used for person 2 are repeated for each person within the presenting unit.

### **Relational attributes**

-----------------------	---

son(s)/daughter(s) (step son(s)/daughter(s)), non-related carer, other non-related and non-family member(s).

## Data element attributes

---

### Collection and usage attributes

*Collection methods:*

Collecting this data is quite complex, due to inter-relationships that may exist in a household. Refer to *ABS: Directory of concepts and standards for social, labour and demographic statistics, 1995* for standard questions and approach to collecting data on this metadata item.

This metadata item is used to derive **tenancy composition** for public rental housing and state owned and managed Indigenous housing.

### Source and reference attributes

*Submitting organisation:*

National Housing Data Development Committee

*Reference documents:*

Australian Bureau of Statistics. Standards for statistics on the Family (Cat. No. 1286.0).

## Relationship within income unit

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person (income unit member) – relationship to reference person (income unit), code N
<i>METeOR identifier:</i>	301840
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006
<i>Definition:</i>	The relationship of a member of an income unit to the reference person in that same income unit, as represented by a code.
<i>Data Element Concept:</i>	Person (income unit member) – relationship to reference person (income unit)

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code										
<i>Data type:</i>	Number										
<i>Format:</i>	N										
<i>Maximum character length:</i>	1										
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Income unit reference person/tenant</td></tr><tr><td>2</td><td>Spouse/partner</td></tr><tr><td>3</td><td>Dependant aged less than 16 years</td></tr><tr><td>4</td><td>Dependant aged between 16 and 24 years</td></tr></tbody></table>	Value	Meaning	1	Income unit reference person/tenant	2	Spouse/partner	3	Dependant aged less than 16 years	4	Dependant aged between 16 and 24 years
Value	Meaning										
1	Income unit reference person/tenant										
2	Spouse/partner										
3	Dependant aged less than 16 years										
4	Dependant aged between 16 and 24 years										
<i>Supplementary values:</i>	9 Not stated/inadequately described										

#### Collection and usage attributes

<i>Guide for use:</i>	<p>Income unit reference person is usually the main income recipient for the income unit. There can be more than one income unit per household, such as other family members, e.g. grandparents, aunt or uncle.</p> <p>A dependant is defined as someone who lives in the primary care of parent(s), carer or guardian, is aged 24 years and under, and:</p> <ul style="list-style-type: none"><li>• is studying full-time (ages 5 and over); and/or</li><li>• is not in receipt of a pension, payment or benefit (e.g. Youth Allowance) or a Prescribed Education Scheme payment (e.g. ABSTUDY); and/or</li><li>• has an annual income of no more than the amount specified by Centrelink for basic eligibility for Family Tax Benefit Part A.</li></ul>
-----------------------	---

## Source and reference attributes

*Origin:* Centrelink 2005. A guide to Australian Government payments-20 March to 30 June 2005.

## Data element attributes

---

### Source and reference attributes

*Submitting organisation:* National Housing Data Development Committee

### Relational attributes

*Related metadata references:* See also [Income unit – income unit type, code N{.N}](#) Housing assistance, Standard 01/03/2005

*Implementation in Data Set Specifications:* [Person \(housing assistance\) cluster](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

In the Public Housing and State owned and managed Indigenous housing (SOMIH) collections this item is not collected according to the standard. The data file includes persons aged 25 years and over in Code 4, which is a deviation from the standard and inconsistent with the definition of income unit.

---

## Rent charged

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household – rent charged (weekly), total Australian currency N[NNNNN].NN
<i>METeOR identifier:</i>	302600
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006
<i>Definition:</i>	The amount of rent charged to a household in dollars and cents.
<i>Data Element Concept:</i>	Household – rent charged

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[NNNNN].NN
<i>Maximum character length:</i>	8
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Collection and usage attributes

<i>Guide for use:</i>	This value domain must be expressed to two decimal places. Where there is a dollar value and no cent value, the cents must be expressed as .00 (e.g. 100.00).
-----------------------	---

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	The rent charged is the amount of money the household is required to pay. It may differ from market rent and may not have been received.
<i>Collection methods:</i>	As the rent charged to a household may change over time, this metadata item should be linked to the date rent is due. Rent charged to household is typically recorded on a weekly basis. For the housing assistance national data collections, it is recorded as rent charged for the week of 30 June.

#### Source and reference attributes

<i>Submitting organisation:</i>	National Housing Data Development Committee
---------------------------------	---

## Relational attributes

*Related metadata references:*

See also [Household – rebated rent status, code N](#) Housing assistance, Standard 10/02/2006

Supersedes [Rent charged to tenant, version 2, DE, NHADD, NHDAMG, Superseded 01/03/2005.pdf](#) (14.1 KB)

See also [Service provider organisation – total household rent charged, Australian currency N\[N\(8\)\].NN](#) Housing assistance, Standard 01/05/2013

*Implementation in Data Set Specifications:*

[Household \(housing assistance\) cluster](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

The weekly rent charged refers to the amount at 30 June.

[Tenancy/vacancy cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

The amount of rent charged per week was collected for the week of 30 June. The rent charged is the amount of money the household has been asked to pay. It may differ from market rent and may not have been received. The amount of rent charged should exclude Commonwealth Rent Assistance (CRA), charges for utilities, meals, cleaning, laundry or other facility costs in the rent charged to tenant.

Unknown values are recorded as "U".

---

## Rent paid

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household – rent paid (weekly), total Australian currency N[NNNNN].NN
<i>Synonymous names:</i>	Weekly rent payment
<i>METeOR identifier:</i>	302612
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006
<i>Definition:</i>	The actual amount of rent paid by a household in dollars and cents.
<i>Data Element Concept:</i>	Household – rent paid

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[NNNNN].NN
<i>Maximum character length:</i>	8
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Collection and usage attributes

<i>Guide for use:</i>	This value domain must be expressed to two decimal places. Where there is a dollar value and no cent value, the cents must be expressed as .00 (e.g. 100.00).
-----------------------	---

### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	Households may make multiple payments to cover one rent period or may pay multiple rent periods in one payment. However, rents are typically recorded on a weekly basis.  In order to accurately measure rent arrears, this metadata item should be linked to the Household – rent paid date, DDMMYYYY metadata item.
<i>Comments:</i>	In the <i>Census of Income Support Customers</i> including Commonwealth Rent Assistance (CRA) this metadata item is referred to as <i>Weekly rent payment</i> .

#### Source and reference attributes

## Collection and usage attributes

### *Guide for use:*

CODE 1 House/townhouse/flat

Includes bedsits, flats attached to houses or shops etc.

CODE 7 No dwelling/street/park/in the open

Includes those people who are sleeping in public transport, e.g. riding on trains/buses etc. because they have no other option.

CODE 10 Emergency accommodation

Includes night shelter/women's refuge/youth shelter.

CODE 12 Hospital (excluding psychiatric)

Includes hospitals and other health care facilities but not specialised prison health facilities.

CODE 13 Psychiatric hospital/unit

Includes mental health units and forensic health units of corrective services systems.

CODE 14 Disability support

Includes all units whose primary role is disability support.

CODE 15 Rehabilitation facility

Includes facilities that cater for drug and alcohol rehabilitation. Excludes rehabilitation in prisons and correctional facilities.

CODE 16 Adult correctional facility

Includes those facilities whose main role is to detain and rehabilitate adult prisoners.

CODE 17 Youth/juvenile justice correctional centre

Includes those facilities whose main role is to detain and rehabilitate youth or juveniles. Community custodial facilities are included in this category.

CODE 19 Aged care facility

Nursing home, aged care hostel or non-self contained accommodation for the aged.

## Data element attributes

---

### Collection and usage attributes

#### *Guide for use:*

The question in 'Collection Methods' could be used for different contexts, i.e. before, during and immediately after assistance as the question can be adapted for past and present tenses. The context as to when the question is asked dictates the time period to which it relates, that being during or after assistance. By using the word 'did'

instead of 'do' the question can be used for the period before assistance.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

'What category, from the list best describes the type of residence/dwelling did/do you live in?'

**Relational attributes**

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 99) in the Standard.

---

## Road name

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Address – road name, text X[(45)]
<i>Synonymous names:</i>	Street name
<i>METeOR identifier:</i>	429747
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standard 01/05/2013 Health, Standard 07/12/2011
<i>Definition:</i>	The name of the road or thoroughfare applicable to the address site or complex, as represented by text.
<i>Data Element Concept:</i>	Address – road name

### Value domain attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	In the Specialist Homelessness Services NMDS, this data element is collected for clients.
-----------------------	---

CODE 1 Client referred to another specialist homelessness agency

Selected when the client is referred to another Specialist Homelessness agency or to another program within the same organisation/agency that has a different organisation identifier.

CODE 2 Client referred to another mainstream agency

Selected when the client referred is referred to an agency other than a Specialist Homelessness agency and no longer requires support from your agency.

CODE 3 Client's immediate needs met/ case management goals achieved

Selected when the client no longer requires support because their immediate needs have been met and/or case management goals have been achieved.

CODE 4 Maximum service period reached

This is selected when the agency has ended a support period because the maximum time period for which they can provide a service has been reached. That is, an agency may have conditions placed on their services relating to how long they can provide support to a client, for example 6 months.

CODE 5 Service withdrawn from client and no referral made

Selected when the client's support period is ended because the client has not complied with agency's rules or behaved inappropriately.

CODE 6 Client no longer requested assistance

Selected when the client has decided that they no longer require assistance or they have moved from the state/territory or region.

CODE 7 Client did not turn up

Selected when the client had an appointment with the agency and failed to show up and at the end of the collection period, there is no contact with the client the support period is closed.

CODE 8 Lost contact with client

Selected when the client has moved without notifying the agency and the agency has not been able to contact the client.

CODE 9 Client institutionalised

This is selected when a client has been placed in an institution, either voluntarily or involuntarily, for example a rehabilitation facility, or Psychiatric ward of a hospital, and as a result the client no longer requires a service, or the service can no longer be provided to the client.

CODE 10 Client incarcerated

This is selected when a client has been placed in a facility whose main role is to detain and rehabilitate either adult prisoners, or youth/juveniles, and as a result no longer requires a service, or the service can no longer be provided to the client.

CODE 11 Client died

Selected when the client has died during the period he/she was receiving assistance from your agency.

CODE 12 Other

Selected when the support period ended for a reason not covered by the categories above.

2	Other housing/accommodation										
3	General assistance and support										
4	Specialised services										
<i>Supplementary values:</i>	9 Not stated/inadequately described										

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1 Short-term or emergency accommodation Assistance with accommodation in a refuge, a crisis shelter, or in emergency accommodation arranged in hotels, motels by a specialist homelessness agency.</p> <p>CODE 2 Other housing/accommodation Other housing/accommodation should be selected where a person is requiring assistance for any other form of housing or accommodation that is not short term or emergency accommodation. This may include assistance to access other forms of accommodation, such as medium term or transitional accommodation, or assistance to maintain their current form of housing/accommodation (i.e. prevent foreclosure on a mortgage, assistance with rental arrears, etc.).</p>
-----------------------	---

### CODE 3 General assistance and support

General assistance and support refers to a wide range of support provided by an agency worker that it is not a specialised service. That is, the support is provided without the expectation that the worker has completed formal, specialised training in that area of assistance. General assistance may cover a range of assistance from financial assistance/information, employment/training assistance, to assistance for domestic/family violence and family/relationship assistance. For a more comprehensive list of possible services see, Service activity - type of service activity.

### CODE 4 Specialised services

Specialised services refer to assistance that can be provided only by a person with formal, specialised training in that area of assistance. Specialised services may range from Psychological/psychiatric services to Professional legal services (For a more comprehensive list of possible specialised services see, Service activity - type of service activity). Specialised services may be provided by agency workers, or may require an agency worker to assist the client in receiving external services.

#### *Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

'Please indicate the service(s) the person requires from your agency, from the list below:'

### **Relational attributes**

#### *Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

#### *Conditional obligation:*

In the Specialist Homelessness Services NMDS, this data element is only collected for 'turnaways'. Turnaways are people who have not received the requested services or assessment.

#### *DSS specific information:*

This question allows the client to check all responses that apply, and therefore the client may have up to 4 valid responses for this question.

#### Collection and usage attributes

<i>Guide for use:</i>	Diagnosis and procedure codes should be checked against the national ICD-10-AM sex edits, unless the person is undergoing, or has undergone a sex change or has a genetic condition resulting in a conflict between sex and ICD-10-AM code. CODE 3 Intersex or indeterminate Intersex or indeterminate, refers to a person, who because of a genetic condition, was born with reproductive organs or sex chromosomes that are not exclusively male or female or whose sex has not yet been determined for whatever
-----------------------	--

reason.

Intersex or indeterminate, should be confirmed if reported for people aged 90 days or greater.

*Comments:*

The definition for Intersex in Guide for use is sourced from the ACT Legislation (Gay, Lesbian and Transgender) Amendment Act 2003.

## Source and reference attributes

*Origin:*

## Data element attributes

---

### Collection and usage attributes

*Collection methods:*

Operationally, sex is the distinction between male and female, as reported by a person or as determined by an interviewer.

When collecting data on sex by personal interview, asking the sex of the respondent is usually unnecessary and may be inappropriate, or even offensive. It is usually a simple matter to infer the sex of the respondent through observation, or from other cues such as the relationship of the person(s) accompanying the respondent, or first name. The interviewer may ask whether persons not present at the interview are male or female.

A person's sex may change during their lifetime as a result of procedures known alternatively as sex change, gender reassignment, transsexual surgery, transgender reassignment or sexual reassignment. Throughout this process, which may be over a considerable period of time, the person's sex could be recorded as either Male or Female.

In data collections that use the ICD-10-AM classification, where sex change is the reason for admission, diagnoses should include the appropriate ICD-10-AM code(s) that clearly identify that the person is undergoing such a process. This code(s) would also be applicable after the person has completed such a process, if they have a procedure involving an organ(s) specific to their previous sex (e.g. where the patient has prostate or ovarian cancer).

CODE 3 Intersex or indeterminate

Is normally used for babies for whom sex has not been determined for whatever reason.

Should not generally be used on data collection forms

completed by the respondent.

Should only be used if the person or respondent volunteers that the person is intersex or where it otherwise becomes clear during the collection process that the individual is neither male nor female.

CODE 9 Not stated/inadequately described

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

## Single/couple status

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person – household single/couple status, code N
<i>METeOR identifier:</i>	456321
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	Whether or not a person identifies as being involved in a couple relationship with another household member, as represented by a code.
<i>Data Element Concept:</i>	Person – household single/couple status

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code						
<i>Data type:</i>	Number						
<i>Format:</i>	N						
<i>Maximum character length:</i>	1						
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Single status OR couple relationship with non-household member</td></tr><tr><td>2</td><td>Couple relationship with another household member (de facto or married)</td></tr></tbody></table>	Value	Meaning	1	Single status OR couple relationship with non-household member	2	Couple relationship with another household member (de facto or married)
Value	Meaning						
1	Single status OR couple relationship with non-household member						
2	Couple relationship with another household member (de facto or married)						
<i>Supplementary values:</i>	9 Not stated/inadequately described						

#### Data element attributes

---

#### Collection and usage attributes

*Guide for use:* A relationship status is assigned to each member of the household, including children.

#### **CODE 1 Single status OR couple relationship with non-household member**

This code includes individuals that identify as being single, and those that are involved in a couple relationship but the partner is not a member of the household (i.e. not nominated on the tenancy agreement).

#### **CODE 2 Couple relationship with another household member**

This code includes individuals that identify as being in a couple relationship, and live in the same dwelling (i.e. both nominated as a household member on the tenancy agreement).

### **CODE 9 Not stated/inadequately described**

This code is not for use in primary data collections.

#### *Comments:*

This item is used to determine whether overcrowding exists in a dwelling, under the Canadian National Occupancy Standard (CNOS). CNOS guidelines use age, sex and relationship status of the tenants and number of bedrooms in the dwelling, to determine whether the household is overcrowded.

The standard specifies:

- no more than two people shall share a bedroom
- parents or couples may share a bedroom
- children under 5 years, either of the same sex or opposite sex may share a bedroom
- children under 18 years of the same sex may share a bedroom
- a child aged 5 to 17 years should not share a bedroom with a child under 5 of the opposite sex
- single adults 18 years and over and any unpaired children require a separate bedroom.

If the total number of bedrooms required by a household exceeds the number of bedrooms available to the household by one or more, then the household is deemed overcrowded.

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>All sources of cash income are included in this concept. Cash income may be received from employment (Employee cash income), as a profit or loss from an unincorporated enterprise (<b>Unincorporated business</b> cash income), from the ownership of assets (Property cash income). Income may also be derived from current transfers from government (pensions and benefits) or from private sources, such as superannuation funds. An individual may receive cash income from more than one source.</p> <p>Excluded from this concept is income in kind e.g. barter for goods or services.</p>
-----------------------	---

*Collection methods:*

If the person has multiple sources of income, all sources should be counted.

This question is not asked of persons aged less than 15 years because they are generally dependants.

The 4-digit level is detailed below, including two supplementary codes:

Detailed (four-digit) level of sources of cash income

- 1101 Employee income
- 2101 Unincorporated business income
- 3101 Age pension
- 3102 Newstart Allowance
- 3103 Service pension (DVA)
- 3104 Disability support pension (Centrelink)
- 3105 Wife Pension
- 3106 Sickness allowance
- 3107 Widow Allowance (Centrelink)
- 3108 Special Benefit
- 3109 Partner Allowance
- 3110 Carer Payment
- 3111 Family Tax Benefit
- 3112 War Widow(er)'s Pension (Including income support supplement) (DVA)
- 3113 Disability Pension (DVA)
- 3114 Parenting Payment
- 3115 Carer Allowance
- 3116 Youth allowance
- 3117 Austudy/ ABSTUDY
- 3118 Pensions and allowances from overseas governments
- 3199 Other Government pensions and allowances nec (not elsewhere classified)
- 9101 Interest
- 9102 Dividends
- 9103 Rent
- 9104 Royalties
- 9199 Investment income nec
- 9201 Superannuation pensions and annuities
- 9301 Workers' compensation
- 9302 Payments from accident/sickness insurance
- 9303 Transfers from other households
- 9304 Scholarships
- 9399 Other current transfers nec
- 9499 Other income nec
- 8888 Nil income
- 9999 Not stated/not known/inadequately described

### Data element attributes

---

#### Collection and usage attributes

*Guide for use:* All sources of cash income are included in this concept. Cash income may be received from employment (Employee cash income), as a profit or loss from an unincorporated enterprise (**Unincorporated business** cash income), from the ownership of assets (Property cash income). Income may also be derived from current transfers from government (pensions and benefits) or from private sources, such as superannuation funds. An individual may receive cash income from more than one source.

Excluded from this concept is income in kind e.g. barter for

goods or services.

Income source is used to derive low income status of households and whether they may be eligible to receive Commonwealth rent assistance if the same household was living in the private rental market.

*Collection methods:*

If the person has multiple sources of income, all sources should be counted.

This question is not asked of persons aged less than 15 years because they are generally dependants.

## Statistical linkage key 581

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Record – linkage key, code 581 XXXXXDDMMYYYYN
<i>METeOR identifier:</i>	349895
<i>Registration status:</i>	Community Services, Standard 21/05/2010 Housing assistance, Standard 23/08/2010 Health, Standard 07/12/2011 Early Childhood, Standard 21/05/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	A key that enables two or more records belonging to the same individual to be brought together. It is represented by a code consisting of the second, third and fifth characters of a person's family name, the second and third letters of the person's given name, the day, month and year when the person was born and the sex of the person, concatenated in that order.
<i>Data Element Concept:</i>	Record – linkage key

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Code
<i>Data type:</i>	String
<i>Format:</i>	XXXXXDDMMYYYYN
<i>Maximum character length:</i>	14

### Data element attributes

---

#### Collection and usage attributes

<i>Collection methods:</i>	Information about whether or not the person's date of birth is accurate should be noted. By knowing that date of birth is accurate it is possible to reduce underestimation of total service user numbers and overestimation of service users' ages.
<i>Comments:</i>	The linkage key is designed to make it possible to count number of clients and services they received, without counting the same client more than once. It can also be used for linking to other related data collections. It is for statistical linkage purposes only, not for case management or the tracking of individual persons. This may be done using a range of identifiers and/or keys.

*Specifications:*

assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

---

## Student type

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1 Preschool student This option refers to a person who is enrolled, either full-time or part-time, in an accredited preschool teaching institution, during the school year.</p> <p>CODE 2 Primary school student This option refers to a person who is enrolled, either full-time or part-time, in an accredited teaching institution providing instruction up to the end of primary school. The school year is counted from January 1 to December 31, so a school student finishing school and waiting to go on to further training would still be considered a school student.</p> <p>CODE 3 Secondary school student</p>
-----------------------	---

This option refers to a person who is enrolled, either full-time or part-time, in an accredited teaching institution providing instruction from the start of secondary schooling up to year 12. The school year is counted from January 1 to December 31, so a school student finishing school and waiting to go on to further training would still be considered a school student. This option also includes any person undertaking secondary school education at a TAFE.

CODE 4 University student

This option refers to part-time or full-time attendance at university; it excludes vocational education students.

CODE 5 Vocational education and training

This option includes:

- a person who receives a training allowance such as Newstart or are required by their employer to attend a post-secondary institution for job training
- a person participating in education in order to enhance employment opportunities (such as migrant English classes and job readiness training)
- a person enrolled in a vocational education course at a TAFE or other type of vocational institution. It excludes students studying secondary school education at a TAFE or Vocational Education and Training (VET) institution, these students are classified to CODE 3
- a person undertaking an apprenticeship.

CODE 6 Other education or training

This option refers to a person undertaking any other education and training not classified above, ie. non-award study (including Post-school Options).

CODE 9 Not stated/inadequately described

Not stated/inadequately described is chosen if there is insufficient information to determine a person's student status either before or after support, or if a client did not want to answer this question.

## Data element attributes

---

### Collection and usage attributes

*Guide for use:*

Collection of this data element should be preceded by the collection of the data element Person – student/employment training indicator, code N.

Because reference periods may vary it is possible that more than one category of the Value Domain may be a valid response to a question on student type. For example over a number of months a student may move from primary to secondary education. Therefore it is preferable for this Data Element to refer to a specific point in time rather than a

period of time. When a period of time is referenced it should be precisely specified.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

"Which category below best describes your education or training status?"

## **Relational attributes**

*Related metadata references:*

See also [Person – student/employment training indicator, code N](#) Community Services, Standard 30/11/2007, Housing assistance, Standard 23/08/2010, Homelessness, Standard 23/08/2010

*Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

Conditional on responding to *Person – student/employment training indicator, code N with a Yes (CODE 1)*.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

This collection records a response of Don't Know (CODE 99), which is equivalent to the code Not stated/inadequately described (CODE 9) in the Standard.

#### Collection and usage attributes

<i>Guide for use:</i>	<p>CODE 1 Daily living support</p> <p>Covers assistance that provides support for personal or social functioning in daily life. The purpose of the assistance is generally to enable recipients to live and function in their own homes or normal places of residence (where this is an independent living setting). Such support includes assistance with personal tasks, e.g. showering, dressing and grooming, and domestic tasks, e.g. washing, cooking, cleaning, , shopping, gardening, and companionship.</p> <p>CODE 2 Personal support</p>
-----------------------	---

Covers assistance that provides support for successful functioning as an individual or as a family member, e.g. individual advocacy, needs assessment and management, counselling.

**CODE 3 Community living support**

Covers assistance that provides support or develops the capacity for independent living and/or social interaction within the community through the provision of opportunities for learning, developing and maintaining personal and social surviving skills. Includes living skills development, community transport, social and personal development, recreation/leisure.

**CODE 4 Support for children, families and carers**

Covers the provision of care, educational, developmental and recreational activities for children usually between the ages of 0 and 12 years by paid workers. Includes carer support which refers to assistance received by a carer from a substitute carer who provides supervision and assistance to their care recipient in their absence. Includes child care, respite care, parenting skills.

**CODE 5 Training, vocational rehabilitation and employment**

Covers assistance to support people who are disadvantaged in the labour market by providing training, job search skills, help in finding work, placement and support in open employment or, where appropriate, supported employment. Excludes health rehabilitative activities aimed at improvement in functional capacity.

**CODE 6 Financial and material assistance**

Covers assistance that is designed to enhance personal functioning and to facilitate access to community services through the provision of emergency, or immediate, financial assistance and material goods. Includes financial relief, household goods, clothing, furniture and food. Excludes income support provided by Centrelink, such as pensions and benefits, and concessions through the taxation system.

**CODE 7 Information, advice and referral**

Covers assistance that provides information, advice and referral to support personal or social functioning and/or to facilitate access to and use of community services and resources. Includes provision of housing/tenancy, consumer and legal, financial, general service availability information, advice and referral.

**CODE 88 Other**

Covers any other areas of assistance able to be offered to a household or tenant.

#### Collection and usage attributes

*Guide for use:* Agency workers may select multiple support services to meet the identified needs of the client.

*Comments:* This information can be used to show the range of support services that agencies provide, and whether the needs of clients can be met either through direct service provision at the agency or through referrals to other services. This is important information for service and program planning.

An unmet need is indicated where, a client has been identified as needing a support service, but the support has not been provided directly by the agency, and there has been no referral arranged to another service in order to receive services that cannot be provided by the agency.

#### Relational attributes

*Implementation in Data Set Specifications:* [Service provider organisation cluster \(Mainstream community housing\)](#) Housing assistance, Standard 01/05/2013

*DSS specific information:*

Survey responses recorded as Y=Yes and N=No. For jurisdictions providing all unit record data using the Australian Institute of Health and Welfare survey: If the organisation hasn't returned a survey (survey response = N), then we would only expect admin organisation and dwelling data (supplied by jurisdictions). If the organisation has returned the survey (survey response = Y), we would expect the survey variables in addition to the admin variables in the organisation and dwelling files. Additionally we would also expect a tenancy file and person file from the organisation. Note that NT does not survey the sector and so all survey responses are set to N.

For jurisdictions providing finalised figures (NSW and Qld):

Jurisdictions who provide finalised figures only ever provide unit record organisation and dwelling admin data (the information provided by non responding organisation as above). NSW uses their own survey to collect the data from organisations. Their survey response indicates those organisations who have completed their survey. Qld also uses its own survey however they do not indicate which organisations have completed their survey or not (all survey responses are N). Qld provide coverage information separately.

-----------------------	---

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Household (housing assistance) cluster</a> Housing assistance, Standard 01/05/2013
---	--

##### *DSS specific information:*

This metadata item is used in calculation of measures of periods of support and duration of assistance and for measuring various point in time data.

The date on which provision of housing assistance by an agency was completed, ceased or terminated.

This metadata item should always be recorded as an 8 digit valid date comprising day, month and year. Year should always be recorded in its full 4 digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, if an episode is completed on July 1 2002 date should be recorded as 01072002.

Tenancy end date must be related to a particular housing

assistance episode. For each separate housing assistance episode a separate date should be recorded.

For the public rental housing and state owned and managed Indigenous housing data collections the tenancy end date should be taken from the date specified on the tenancy agreement. Tenants may actually move out prior to this date.

---

## Tenancy start date

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service event – tenancy start date, DDMMYYYY
<i>Synonymous names:</i>	Date assistance commenced
<i>METeOR identifier:</i>	474692
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The date at which a tenancy agreement between the client and a service provider organisation commences.
<i>Data Element Concept:</i>	Service event – tenancy start date

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Date

#### Collection and usage attributes

<i>Guide for use:</i>	This item may be used to record the date that housing assistance commenced.
-----------------------	---

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Household (housing assistance) cluster</a> Housing assistance, Standard 01/05/2013
---	--

##### *DSS specific information:*

This metadata item is used in calculation of measures of periods of support and duration of assistance and for measuring various point in time data.

The date on which the provision of housing assistance to a household by an agency commenced, as distinct from the date the household applies and is entered on the waiting list or assessed for eligibility. The date recorded should be the date on which the client has begun to receive some form of assistance.

This metadata item should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the

required 8 digits. For example, if an episode starts on July 1 2000 the date should be recorded as 01072000.

For each separate tenancy, a separate start date should be recorded. Same address transfers, mutual exchanges and succession of tenancy of dwellings are not considered separate housing assistance events.

For the public rental housing and state owned and managed Indigenous housing data collections the tenancy start date should be taken from the date specified on the tenancy agreement. Tenants may actually move in at a later date than this date.

## Collection and usage attributes

*Guide for use:*

### **Renter**

CODE 1 Renter - private housing

A person paying money in the private rental market in return for accommodation.

CODE 2 Renter - public housing

A person paying money to a housing authority or housing assistance agency in return for accommodation.

CODE 3 Renter - community housing

A person paying money to a housing association, housing cooperative or other not-for-profit community service organisation in return for accommodation.

CODE 4 Renter - transitional housing

A person paying money to occupy accommodation for transition towards independent living or towards returning home. The accommodation is generally more stable and provided for longer than crisis accommodation, and is linked to external support through another agency.

CODE 5 Renter - caravan park

A person paying money to rent a cabin or caravan in a caravan park.

CODE 6 Renter - boarding/rooming house

A person paying money to rent a place, room or rooms in a boarding or rooming house.

CODE 7 Renter - Emergency accommodation/night shelter/women's refuge/youth shelter where rent is charged.

CODE 8 Other renter

### **Rent Free**

CODE 9 Rent free - private housing

A person paying no money, in exchange for accommodation in the private rental market. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 10 Rent free - public housing

A person paying no money, in exchange for accommodation from a housing authority or housing assistance agency. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 11 Rent free - community housing

A person paying no money, in exchange for accommodation, to a housing association, housing cooperative or other not-for-profit community service organisation. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 12 Rent free - transitional housing

A person paying no money, in exchange for accommodation for transition towards independent living or towards returning home. The accommodation is generally more stable and provided for longer than crisis accommodation, and is linked to external support through another agency.

CODE 13 Rent free - caravan park

A person paying no money, in exchange for accommodation, to occupy a cabin or caravan in a caravan park. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 14 Rent free - boarding/rooming house

A person paying no money, in exchange for accommodation, to occupy a place, room or rooms in a boarding or rooming house. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 15 Rent free - emergency accommodation/night shelter/women's refuge/youth shelter where no rent is charged.

CODE 16 Rent free - other

A person paying no money, in exchange for accommodation, to occupy any other dwelling. Excludes owners with or without a mortgage, house-sitters, and those paying accommodation in goods and services.

CODE 17 Life tenure scheme

A person with a contract to live in the dwelling for the term of his/her life but without the full rights of ownership and

usually with limited or no equity in the dwelling. This is a common arrangement in retirement villages.

#### **Owner**

CODE 18 Owner - shared equity or rent/buy scheme

A person purchasing a proportion of the equity in the dwelling, and paying rent for the remainder.

CODE 19 Owner - being purchased/with mortgage

A person who owns their dwelling and is repaying a mortgage or loans secured against the dwelling, regardless of the purpose of the mortgage or secured loan.

CODE 20 Owner - fully owned

A person who owns their dwelling and is not making any payments on mortgages or loans secured against the dwelling. (Thus persons who have repaid a loan but technically not discharged the associated mortgage are included in this category).

CODE 21 Other tenure type not elsewhere specified

The tenure does not fit any of the above categories. For example: house-sitting, payment in kind, for a specific service.

CODE 22 No tenure

## **Data element attributes**

---

### **Collection and usage attributes**

*Guide for use:*

This data element is intended for use specifically for data collections on homeless persons and those at risk of homelessness.

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question: 'Which of the following best describes your tenure?'

### **Relational attributes**

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected four times, for the following points in time:

- one week before the start of the support period (the Service episode – episode start date, DDMMYYYY)
- at the date of presentation
- at the end of the reporting period (the Service event – last service provision date, DDMMYYYY)
- at the end of the support period (the Service episode – episode end date, DDMMYYYY).

Only one permissible value is selected in each case.

---

## Time since most recent address

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	<p>This data element allows a calculation of the length of time a person has experienced homelessness.</p> <p>A permanent place to live is defined as a conventional dwelling, typically with its own residential address. It refers to a person's usual residence that lasts for at least 3 months. The characteristics of the accommodation must be such, that it is considered outside the scope of the definition of homelessness.</p> <p>Ascertaining that a person did at some time have a permanent place to live indicates that their experience of homelessness commenced subsequently. Thus the length of the period of homelessness is measured from that time.</p>
-----------------------	--

*Collection methods:*

The permissible values for this data element are used to form the response categories to the question:

"How long is it since you had a permanent place to live?"

## **Relational attributes**

*Implementation in Data Set Specifications:*

[Specialist Homelessness Services NMDS 2013-14](#) Housing assistance, Standard 01/05/2013

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

In the Specialist Homelessness Services NMDS, this data element is collected at the date of presentation.

This collection records a response of Don't Know (CODE 99), which is equivalent to the code Don't know/Not sure (CODE 9) in the Standard.

---

## Total capital expenditure

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service provider organisation – gross capital expenditure, total Australian currency N[N(8)].NN
<i>METeOR identifier:</i>	461534
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The total expenditure on the acquisition or enhancement of a <b>non-financial asset</b> by a service provider organisation, expressed in dollars and cents.
<i>Data Element Concept:</i>	Service provider organisation – gross capital expenditure

### Value domain attributes

---

#### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Organisation file cluster (Indigenous community housing)</a> Housing assistance, Standard 01/05/2013
---	---

*DSS specific information:*

In the Indigenous Community Housing (ICH) collection, capital expenditure is defined according to the following parameters:

**Include:**

- Total expenditure on non-financial assets defined as net expenditure on new and second-hand fixed assets, land and intangible assets excluding capitalised interest. Fixed assets are durable goods intended to be employed in the production process for longer than a year. Expenditure on non-financial assets includes:
  - Total expenditure on purchases of existing dwellings.
  - Total expenditure on purchases of new non-financial assets:

The purchase of assets intended to be used in the production process for longer than a year. Includes: fixed assets constructed on own account, valued at cost of materials, capitalised salaries and wages, reimbursements received by public authorities for amounts spent on capital works while acting as an agent for other government and private bodies.

Total expenditure on purchases of second-hand non-financial assets:

The purchase of assets which have been previously used in production in the country.

Total expenditure on sales of non-financial assets:

The disposal of previously rented dwellings, non-residential buildings, used plant and equipment. Refers to the sale of land (including the sale of residential leases in the ACT). The sale of land and buildings as a package is treated as sales of fixed assets unless a separate value can be determined for the land component. Also refers to the outright sales of intangible assets and disposal of motor vehicles.

Total expenditure on assets acquired under finance leases defined as assets acquired under leases and other arrangements, which effectively transfer most of the risks and benefits associated with ownership of the leased property from the lessor to the lessee.

**Exclude:**

- Expenditure on the acquisition of financial assets
- Second-hand assets imported into the country for the first time which are regarded as new.
- Assets acquired under finance lease arrangements.
- From total expenditure on purchases of new non-financial assets:

Capitalised interest;

Houses built for sale; and

Assets acquired under finance lease arrangements.

---

## Total household rent collected

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Service provider organisation – total household rent collected, Australian currency N[N(8)].NN
<i>METeOR identifier:</i>	412868
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The total amount of rent collected from all households by a service provider organisation, in dollars and cents.
<i>Data Element Concept:</i>	Service provider organisation – total household rent collected

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[N(8)].NN
<i>Maximum character length:</i>	11
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	2

#### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	Include: <ul style="list-style-type: none"><li>rent arrears collected in the year ending 30 June for the current and previous years; and</li><li>prepaid rent collected in the year ending 30 June for the current and subsequent years.</li></ul> Exclude: <ul style="list-style-type: none"><li>arrears still outstanding at the end of the period.</li></ul> Rent paid by individual households is defined as <i>Household – rent paid (weekly), total Australian currency N[NNNNN].NN</i> .

## Unstructured address line

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Address – unstructured address line, text X[(50)]
<i>Synonymous names:</i>	Overseas address line
<i>METeOR identifier:</i>	430158
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standard 01/05/2013 Tasmanian Health, Draft 12/09/2012
<i>Definition:</i>	A description of an address, written in an unstructured address line format, as represented by text.
<i>Data Element Concept:</i>	Address – unstructured address line

### Value domain attributes

---

#### Representational attributes

<i>Representation class:</i>	Text
<i>Data type:</i>	String
<i>Format:</i>	X[(50)]
<i>Maximum character length:</i>	50

#### Data element attributes

---

#### Collection and usage attributes

*Guide for use:* Where there is a need to transfer an Australian address that does not conform with the commonly used address format, the unstructured address lines may be used. These data elements should not be used except when it is impossible to use the other more structured address data elements.

#### Example

Cabin 44 Block 7 (Unstructured Address Line 1)  
HMAS Watson (Unstructured Address Line 2)  
Watsons Bay Wharf (Unstructured Address Line 3)  
WATSONS BAY NSW 2030 (Unstructured Address Line 4)

Overseas addresses have many formats. To accommodate this the use of unstructured lines of detail are used. While 4 lines have been provided for overseas address details, not all lines need to be used.

Overseas addresses may follow different formats to that of Australian addresses.

Common differences are:

- Street name preceding street number
- Postcode format

- Postcode preceding locality name

Example:

32, Kasumigaseki 1 Chome (Overseas Address Line 1)

Chiyoda-ku (Overseas Address Line 2)

TOKYO 100-90 (Overseas Address Line 3)

JAPAN (Country name. Note: for client data interchange this standard uses the country code)

*Collection methods:*

Unstructured address may be repeated up to 4 lines.

While 4 lines have been provided for unstructured Australian address details, not all lines need to be used.

Where there is an overseas address the country name code becomes mandatory.

Unstructured address lines, when used, should contain the entire address.

### Source and reference attributes

<i>Maximum character length:</i>	8

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	In housing collections the vacancy start and end dates are used to measure the average time taken for tenantable vacant stock to be occupied by a tenant. The vacancy end date is the day that the next household starts their tenancy in the dwelling (i.e. equal to dt_start on the household file). However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy start date should be set equal to the date the previous household ended their tenancy, (i.e. equal to dt_end of the previous household on the household file. Such a vacancy episode has a duration of zero days).

### Data element attributes

---

#### Collection and usage attributes

<i>Guide for use:</i>	In housing assistance a vacancy episode occurs when a dwelling is untenanted, but is available to be tenanted. The number of days in each vacancy episode is calculated by subtracting the date the dwelling was last occupied from the date the dwelling was first vacated. The vacancy start date is generally the day after the previous household has ended their tenancy, i.e. equal to <i>Dwelling – vacancy start date</i> , DDMMYYYY on the Household (housing assistance) cluster. The vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to <i>Dwelling – vacancy end date</i> , DDMMYYYY of the previous household.

### Data element attributes

#### Collection and usage attributes

<i>Collection methods:</i>	Actual year of arrival in Australia. Recommended question: In what year did you/the person first arrive in Australia to live here for one year or more? (Write in the calendar year of arrival or mark the box if here less than one year) Calendar year of arrival Will be here less than one year It is anticipated that for the majority of people their response to the question will be the year of their only arrival in Australia. However, some respondents may have multiple arrivals in Australia. To deal with these cases in self-enumerated collections, an instruction such as 'Please indicate the year of first arrival only' should be included with the question. While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or
----------------------------	---

community service, the information may be ascertained using different means. However, the recommended question should be used wherever practically possible.

## Community housing and Indigenous community housing service provider organisation address details cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	497755
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Community housing and Indigenous community housing address details cluster is used to collect information pertaining to the address of the service providers in the Community Housing DSS and the Indigenous Community Housing DSS.

The fields to be reported for address are:

The fields to be reported for address are:

- Address – road number 1, road number X[6]
- Address – road name, text X[45]
- Address – road type, code AA[AA]
- Address – suburb/town/locality name, text X[46]
- Address – Australian postcode, code (Postcode datafile) {NNNN}
- Service provider organisation – Australian state/territory identifier, code N.

All other data elements are to be reported if that data element is a component of the address of the service provider organisation.

Where the given address is a P.O. Box or G.P.O. Box, the road number, road name, and road type should be replaced with the following items:

- Address – postal delivery service type identifier, code AA[A(9)]
- Address – postal delivery number, identifier [X(11)].

The unstructured address line may be used, if the service provider address does not easily conform to the standard.

### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Organisation file cluster (Indigenous community housing)</a> Housing assistance, Standard 01/05/2013
---	---

#### *DSS specific information:*

The data elements in this cluster provide a detailed description of the individual components used to create a dwelling address as described by AS4590. This cluster enables the collection of street name, street number, suburb, postcode and state/territory identifier.

Additional items have been provided to describe other

common aspects of address, such as building or complex name, post office boxes etc., if required.

This collection collected address information in an alternative manner, with a single 40 character alphanumeric field.

Service provider organisation cluster (Mainstream community housing) Housing assistance, Standard 01/05/2013

*DSS specific information:*

The data elements in this cluster provide a detailed description of the individual components used to create an address as described by AS 4590 – 2006 Interchange of client information standard.

The collection records address information in an alternative manner, as follows:

- Dwelling address (concatenated number and street name) - 40 character alphanumeric field
- Dwelling suburb -40 character alphanumeric
- Postcode - 4 character numeric and unknown postcodes are recorded as "U".

## Dwelling history (housing assistance) cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	478915
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	<p>The Dwelling history cluster describes one record for each vacancy episode during the financial year for dwellings that are occupied or vacant at 30 June, and are managed by the public rental housing and State owned and managed Indigenous housing (SOMIH) programs.</p> <p>Include:</p> <ul style="list-style-type: none"><li>• Vacancy episodes from the date the certificate of occupancy was completed for newly constructed dwellings or the date when the keys were received for newly purchased dwellings</li><li>• Vacancy episodes of <b>dwellings headleased from private market</b> or other programs used to house public rental housing and SOMIH households and managed by the jurisdiction.</li></ul> <p>Exclude:</p> <ul style="list-style-type: none"><li>• Vacancy episodes of dwellings earmarked for demolition, sale or cancellation, unless subsequently re-tenanted</li><li>• Dwellings owned but not administered by the jurisdiction (e.g. leased to other program areas and not administered by state housing authority).</li></ul>

### Collection and usage attributes

<i>Collection methods:</i>	<p>Data qualifications:</p> <ul style="list-style-type: none"><li>• Where a dwelling has had a period of vacancy during with more than one vacancy reason the vacancy should be recorded as follows: if a dwelling's vacancy has both 'available to let' (vacancy reason code 1.X) and 'not available to let' (vacancy reason code 2.X) periods it should be recorded as multiple vacancy episodes with the new episode starting each time the reason changes from 1.X to 2.X; if a dwelling's vacancy has multiple contiguous 'available to let' reason periods then they should be recorded as a single vacancy, reporting the vacancy reason as the one that was applicable for the greatest number of days; and if a dwelling's vacancy has multiple contiguous 'not available to let' reason periods then they should be recorded as a single vacancy, reporting the vacancy reason as the one that was applicable for the greatest number of days</li></ul>
----------------------------	---

- Vacancy start date is generally the day after the previous household has ended their tenancy, i.e. equal to dt\_end on the household file. Vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to dt\_start on the household file. However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy start date should be set equal to the date the previous household ended their tenancy, i.e. equal to dt\_end of the previous household on the household file. (Such a vacancy episode has duration 0 days)
- The following formula should be used to calculate the number of vacant days:  $VACDAYS = (VACEND - VACSTART)$
- Dwellings still vacant at 30 June of the current financial year are excluded from P10 calculations. However, jurisdictions must assign a value to VAC\_DDV (vacancy reason) for EVERY vacancy episode, both ongoing and non-ongoing.

*Comments:*

Refer to the collection period of the data set to determine the reference year for this cluster.

Note: The data items VACRSN, VADCESC and VACTYPE have been removed and replaced by a new variable VAC\_DDV which is populated with a standard set of vacancy reason codes (see [Dwelling – vacancy reason, code N.N](#)).

As a result of this change the following data elements from the Public Housing 2009-10 DSS and SOMIH 2009-10 DSS have been discontinued.

- [Dwelling – vacancy reason \(jurisdiction\), text \[X\(70\)\]](#)
- [Dwelling – vacancy reason \(jurisdiction\), identifier XXXXXX](#)
- [Dwelling – normal vacancy indicator, yes/no code N](#)

## Home purchase assistance DSS 2011-12

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480487
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Set Specification (DSS)
<i>Scope:</i>	Home purchase assistance for the purpose of this collection relates to the provision of financial assistance to households to improve their access to home ownership.

#### **Includes:**

- direct lending (including government loans, shared equity loans and bridging loans)
- deposit assistance
- interest rate assistance
- mortgage relief
- other assistance grants.

#### **Excludes:**

- non-financial assistance, e.g. home purchase advisory and counselling services
- home renovation/maintenance services
- sale to tenant programs
- any assistance that does not directly facilitate the purchase of a home.

Any household that had monies outstanding on repayable home purchase assistance provided in a previous period at the commencement of the 2011-12 financial year are within the scope of this collection.

Any households that received transfers of home purchase assistance in the 2011-12 financial year are within the scope of this collection.

Households that received transfers of home purchase assistance in the 2011-12 financial year are those that commenced receiving home purchase assistance in the 2011-12 financial year and those that commenced receiving ongoing home purchase assistance in a previous financial year and continued to receive that assistance in the 2011-12 financial year.

### Collection and usage attributes

*Statistical unit:* [Households](#)

*Collection methods:* **Include:**

- households that received transfers of assistance in the 2011-12 financial year

- household that had monies outstanding on repayable assistance provided in a previous period at the commencement of the 2011-12 financial year.

**Include:**

The value of assistance provided to a household during the 2011–12 financial year for:

- all households who commenced receiving assistance for the year ending 30 June 2012 regardless of the form of assistance (i.e. whether assistance is one-off, ongoing, repayable or non-repayable)
- all households who commenced receiving an ongoing form of assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance from 1 July 2011.

**Exclude:**

- Related administrative and operational costs associated with providing the home purchase assistance
- The value of assistance provided to a household prior to 1 July 2011 (i.e. for households continuing to receive ongoing forms of assistance that commenced prior to 1 July 2011)
- The value of outstanding repayable monies where a repayable form of assistance was provided prior to 1 July 2011 and outstanding monies had not been repaid by 30 June 2011 (i.e. report HPA\_TYPE, HPA\_PAYMENT and HPA\_DATE but do not report HPA\_AMOUNT).

**Data qualifications:**

- For those households who commenced receiving assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, include only the value of assistance provided for the year ending 30 June 2012 (i.e. disregard the value of assistance provided prior to 1 July 2011)
- For those households who commenced receiving assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, report the originating date of the assistance (i.e. the date the household first received the assistance)
- A separate record should be provided for each type of assistance provided to a household
- Households receiving ongoing assistance should be counted once for the financial year only for each program type where assistance was provided – regardless of which financial year assistance commenced
- The main applicant identifier should be the same person identifier that is used by the social housing authority across different housing programs. This field may be used to link home purchase assistance records with corresponding

public rental housing, state owned and managed Indigenous housing, and/or private rent assistance records. If no such identifier exists, this field should be left blank.

Jurisdictions are requested to provide details of all programs of home purchase assistance (financial only) available to households during the 2011-12 reporting period, excluding those specified as outside the scope of the collection, i.e. home renovation/maintenance services and sale to tenant programs. An Excel spreadsheet is provided for this purpose and includes the following fields:

- name of program
- description of program
- eligibility criteria.

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

## Indigenous community housing dwelling address details cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	498022
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Indigenous community housing address details cluster is used to collect information pertaining to the address of dwellings included in the Indigenous Community Housing DSS.

The fields to be reported for address are:

- Address – road number 1, road number X[6]
- Address – road number 2, road number X[6]
- Address – road name, text X[45]
- Address – road type, code AA[AA]
- Address – lot number, identifier X[XXXXX]
- Address – suburb/town/locality name, text X[46]
- Address – Australian postcode, code (Postcode datafile) {NNNN}
- Address – geocode latitude, decimal degrees XN[N][.N(9)]
- Address – geocode longitude, decimal degrees XN[NN][.N(9)]
- Address – location descriptor, text X[50]
- Dwelling – Australian state/territory identifier, code N
- Dwelling – geographic remoteness, classification (ASGC-RA) N.

The unstructured address line may be used, if the dwelling address does not easily conform to the standard.

---	--

*DSS specific information:*

The data elements in this cluster provide a detailed description of the individual components used to create a dwelling address as described by AS4590. This cluster enables the collection of street name, street number, suburb, postcode and state/territory identifier etc.

Additional items have been provided to describe other common aspects of address, such as building or complex

name, post office boxes etc.

In the Indigenous Community Housing collection, the dwelling address details were collected in an alternative manner:

- House/lot number - 4 numeric characters
- Street name - 40 alphanumeric characters
- Suburb - 15 alphanumeric characters
- Postcode - 4 numeric characters. Unknown values recorded as "U"
- Dwelling Longitude - 15 alphanumeric characters. Unknown values recorded as "U"
- Dwelling Latitude - 15 alphanumeric characters. Unknown values recorded as "U"
- Dwelling remoteness - ASCG code set and Unknown values recorded as "U"
- Dwelling other (location) - 40 alphanumeric characters.

# Indigenous community housing dwelling occupancy status cluster

## Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	494607
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	In the Indigenous Community Housing collection this item is used to measure the number of dwellings that are currently occupied, available to be tenanted and those in need of maintenance or repairs.

## Collection and usage attributes

*Collection methods:* The current standards for dwelling occupancy and tenantability status have been added to this data set, to align the Indigenous community housing collection with other housing collections. The Indigenous Housing collection does not collect all concepts described in the standard data elements for occupancy and tenantability (i.e. does not collect whether a dwelling is tenantable). Alternate code values are also used by the collection, which differ from the METeOR standards. The following table shows the codes and labels collected for the Indigenous Community Housing Collection (ICH), against the mappable METeOR standard values:

<b>METeOR standard code</b>	<b>METeOR standard label</b>	<b>ICH Code</b>	<b>ICH Label</b>
<i>Occupancy standard</i>			
1	Occupied	1	Occupied
2	Unoccupied	0	Unoccupied
<i>Tenantability standard</i>			
1	Tenantable	-	-
2	Untenantable	2	Untenantable
<i>Supplementary values (applicable to both standards)</i>			
9	Not stated/inadequately described	U	Unknown

**Code 1. Occupied** - A household has a formal tenancy agreement for a particular dwelling. Occupied dwellings include any structures that people actually live in regardless of its intended purpose. The structure may or may not be tenatable.

**Code 2. Untenatable** - Record if the dwelling is not tenatable. An untenatable dwelling does not meet the required minimum level of basic amenity and maintenance.

**Code 0. Unoccupied** - No formal tenancy agreement exists between a household and a housing provider for a particular dwelling. An unoccupied structure is only a dwelling if it is intended for human residence. The structure may or may not be tenatable. Thus a shed, garage, office, etc. is counted as an occupied dwelling if people are living there, but is not counted as vacant if there are no residents as the purpose of the structure is not for human habitation.

**Code U. Unknown** - Code if Unknown.

## Person (housing assistance) cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	459133
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	<p>The Person cluster describes details of all persons who received assistance during the year (ongoing and non-ongoing).</p> <p>Include:</p> <ul style="list-style-type: none"><li>• 1 record for each person in each Household – household identifier, X[X(14)] (i.e. where persons are attached to two households then there should be two records for that individual)</li><li>• Persons in dwellings headleased from private market or other programs and managed by the jurisdiction.</li></ul> <p>Exclude:</p> <ul style="list-style-type: none"><li>• Persons in households residing in dwellings owned but not administered by the jurisdiction (e.g. leased to other program areas and not administered by state housing authority).</li></ul>

### Collection and usage attributes

<i>Statistical unit:</i>	<a href="#">Dwellings</a> and <a href="#">Households</a>
<i>Guide for use:</i>	<p>All jurisdictions are asked to supply the single/couple codes in the reference period data extractions. Previously, a household's bedroom requirement has been calculated using the Proxy Occupancy Standard (POS), however under National Affordable Housing Agreement (NAHA) reporting requirements, the match of a dwelling to household size is based on Canadian National Occupancy Standard (CNOS). New low income cut-off measures for low income households based on new definition under NAHA.</p>
<i>Collection methods:</i>	<p>Data qualifications:</p> <ul style="list-style-type: none"><li>• If records for persons in ended household cannot be supplied, special needs status for the ended household should be set in the household file to ensure all households are captured in the P5 special needs indicator.</li></ul>
<i>Comments:</i>	Refer to the collection period of the data set to determine the reference year for this cluster.

## Private rent assistance DSS 2011-12

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480492
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Set Specification (DSS)
<i>Scope:</i>	<p>Private rent assistance relates to the provision of financial assistance to enable households to access and maintain accommodation in the private rental market and <b><u>includes</u></b>:</p> <ul style="list-style-type: none"><li>• bond loans</li><li>• rental grants</li><li>• rental subsidies</li><li>• relocation expenses and</li><li>• other assistance grants.</li></ul> <p>The collection <b><u>excludes</u></b> non-financial assistance, for example, tenancy support services and tenancy guarantees.</p>

### Collection and usage attributes

<i>Statistical unit:</i>	<a href="#">Households</a>
<i>Guide for use:</i>	<p>Households receiving ongoing assistance should be counted once for the financial year only for each program type where assistance was provided – regardless of which financial year assistance commenced.</p>
<i>Collection methods:</i>	<p>Include:</p> <ul style="list-style-type: none"><li>• all households who received private rent assistance during the 2011–12 financial year.</li></ul> <p>The value of assistance provided to a household during the 2011–12 financial year for:</p> <ul style="list-style-type: none"><li>• all households who commenced receiving assistance for the year ending 30 June 2012 regardless of the form of assistance (i.e. whether assistance is one-off, ongoing, repayable or non-repayable)</li><li>• all households who commenced receiving an ongoing form of assistance in a previous financial year (i.e. prior to 1 July 2011) and continued to receive this assistance from 1 July 2011.</li></ul> <p>Exclude:</p> <ul style="list-style-type: none"><li>• Households with outstanding monies to repay for assistance provided in a previous financial year, where no new assistance was provided for year ending 30 June 2012</li><li>•</li><li>• Related administrative and operational costs associated with providing the private rent assistance</li></ul>

- The value of assistance provided to a household prior to 1 July 2011 (i.e. for households continuing to receive ongoing forms of assistance that commenced prior to 1 July 2011)
- The value of outstanding repayable monies where a repayable form of assistance was provided prior to 1 July 2011 and outstanding monies had not been repaid by 30 June 2011.

Data qualifications:

- For those households who commenced receiving assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, include only the value of assistance provided for the year ending 30 June 2012 (i.e. disregard the value of assistance provided prior to 1 July 2011)
- For those households who commenced receiving assistance in a previous financial year (i.e. prior to 1 July 2011) and they continued to receive this assistance, report the originating date of the assistance (i.e. the date the household first received the assistance).

Jurisdictions are requested to provide details of all programs of private rent assistance (financial only) available to households during the 2011-12 reporting period. An Excel spreadsheet is provided for this purpose and includes the following fields:

- name of program
- description of program
- eligibility criteria.

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

## Public rental housing DSS 2011-12

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480520
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Set Specification (DSS)
<i>Scope:</i>	<p>The purpose of the Public rental housing data set specification is to describe information about tenants in public rental housing covered by the National Affordable Housing Agreement (NAHA). Included are households residing in public rental housing dwellings where the dwelling is either:</p> <ul style="list-style-type: none"><li>• owned by the housing authority; or</li><li>• leased from the private sector or other housing program areas and used for provision of public rental housing.</li></ul> <p>Public rental housing dwellings leased to other program areas such as community housing or crisis and emergency accommodation programs are not included in this collection.</p> <p>Dwellings no longer under the administration of the property manager/agency at 30 June 2012, (including dwellings demolished, sold or disposed of) and dwellings not yet available to the property manager/agency at 30 June 2012, (such as those still under construction or being purchased) are excluded.</p>

### Collection and usage attributes

<i>Statistical unit:</i>	Persons, Households, <a href="#">Dwellings</a> and Vacancy episodes.
<i>Guide for use:</i>	Low income cut-off measures for low income households based on definition under NAHA.
<i>Collection methods:</i>	<p>State and territory housing authorities provide the data to the Australian Institute of Health and Welfare for national collation on an annual basis.</p> <p>Include:</p> <ul style="list-style-type: none"><li>• Dwellings headleased from private market or other programs and managed by the jurisdiction.</li></ul> <p>Exclude:</p> <ul style="list-style-type: none"><li>• Dwellings no longer under the administration of the property manager/agent at 30 June 2012.</li><li>• Dwellings not yet available to the property manager/agency at 30 June 2012, such as those still under construction or being purchased</li><li>• Dwellings owned but not administered by the</li></ul>

jurisdiction (e.g. leased to other program areas and not administered by state housing authority).

Data qualifications:

- Bedsits are to be reported as 1 bedroom AND counted as 1 bedroom for performance indicator calculations
- Occupied dwellings can be tenantable or untenable.

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

## Service provider organisation support type cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	462322
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	Data elements in this cluster are used to identify whether support services other than housing assistance are provided and the type of services available. A code set is used to identify common support types, and a secondary text field is used to identify other support services.

### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Service provider organisation cluster (Mainstream community housing)</a> Housing assistance, Standard 01/05/2013
---	--

### Metadata items in this Data Set Specification

<i>Seq No.</i>	<i>Metadata item</i>	<i>Obligation</i>	<i>Max occurs</i>
1	<a href="#">Assistance/support other than housing assistance indicator</a>	Mandatory	1
2	<a href="#">Support service type</a>	Conditional	8
3	<a href="#">Other support service type</a>	Conditional	1

## Specialist Homelessness Services accommodation type and start/end date cluster

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	508932
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Specialist Homelessness Services accommodation type and start/end date cluster captures information on the accommodation provided to a client during a collection month. The cluster collects: <ul style="list-style-type: none"> <li>the type of accommodation (e.g. short term/emergency, medium term/transitional, or long term) the client was provided</li> <li>the date the accommodation period commenced (record the date in the format DDMMYYYY)</li> <li>the date the accommodation period ceased (record the date in the format DDMMYYYY).</li> </ul>

**Table 1: Accommodation types by date**

	Accommodation calendar dates														
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	Etc.
Short term															
Medium term															
Long term															

### Collection and usage attributes

<i>Guide for use:</i>	Only one type of accommodation should be recorded for each night. If a client is marked down as staying in two different types of accommodation for the same date, it will be recorded as an error. If a client crosses the whole month check box, the first of the month should be recorded as the start date, and the last valid calendar day for that month should be recorded as the end date.
-----------------------	---

<i>Implementation start date:</i>	10/12/2012
-----------------------------------	------------

### Relational attributes

<i>Implementation in Data Set</i>	<a href="#">Specialist Homelessness Services NMDS 2013-14</a> Housing assistance, Standard 01/05/2013
-----------------------------------	---

*Specifications:*

Homelessness, Standard 01/05/2013

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

*Conditional obligation:*

In the Specialist Homelessness Services NMDS, this item is only asked of clients.

*DSS specific information:*

Clients may enter start and end dates for each of the accommodation types provided during the collection month. Multiple accommodation types, start dates and end dates may be entered. In a month of 31 days, up to 16 accommodation types, and related start dates or end dates are possible. The dates selected should be valid for the collection month (i.e. For September the 30th is a valid date, but the 31st is not a valid date.)

## Specialist Homelessness Services activity cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	508815
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Specialist Homelessness Services activity cluster (the service activity type cluster) captures information on the assessed need for service activities for a client in a Specialist Homelessness Agency setting. Specifically it details the types of service activities, and whether they have been assessed as a requirement for a client, provided to a client, or the client has been referred to another agency in order to receive those services.

### Collection and usage attributes

<i>Guide for use:</i>	This data cluster is designed to facilitate the collection of data from Specialist Homelessness Services clients. Agency workers indicate any service activity which the worker and the client assess together as being needed. Subsequent referral for or provision of those services are also recorded. Information is recorded for this data cluster for each reporting period, i.e. each calendar month.

## Specialist Homelessness Services disability flag cluster

---

### Identifying and definitional attributes

*Metadata item type:* Data Set Specification

*METeOR identifier:* 509290

*Registration status:* Housing assistance, Standard 01/05/2013  
Homelessness, Standard 01/05/2013

*DSS type:* Data Element Cluster

*Scope:* In the Specialist Homeless Services NMDS, these data elements are used together to assess the functional status of a person across a range of life areas.

The cluster combines the two data elements: *Person – activity and participation life area, disability flag homelessness code N* and *Person – need for assistance with activities in a life area, disability flag homelessness code N*, to complete the following matrix:

	Always/ sometimes need help and/or supervision	Have difficulty, but don't need help/supervision	Don't have difficulty, but use aids/ equipment	Have no difficulty
Self-care				
Mobility				
Communication				

### Collection and usage attributes

*Collection methods:* It is expected that the data elements in this cluster will be used to collect information from the individual being assessed, or a proxy/carer or service worker answering on their behalf. The responses are phrased in answer to the question 'For each of the following activities, do you need help/supervision, have difficulty, or use aids/equipment? (choose one answer for each row)'.  
Also required is the following preamble to the question:

'The next question is about whether a long-term health condition or disability restricts your everyday activities. A long-term health condition is one that has lasted, or is expected to last, 6 months or more. Examples of long-term health conditions that might restrict your everyday activities include severe asthma, epilepsy, hearing loss, arthritis, depression, autism, kidney disease, chronic pain, speech impairment, stroke.'

## Specialist Homelessness Services NMDS 2013-14

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	505626
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013 Homelessness, Standard 01/05/2013
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>The Specialist Homelessness Services (SHS) National Minimum Data Set (NMDS) aims to provide quality information about people who are either homeless or at risk of homelessness and who are seeking services from specialist homelessness agencies. This collection is intended to obtain information about clients receiving ongoing or short term support as well as people who are seeking assistance but did not receive any services. Data collection includes basic socio-demographic information and the services required by and provided to each client. Details about accompanying children are also recorded. Additionally, information is obtained about the client circumstances before, during and after receiving support.</p> <p>The base unit of this collection is a person who present to a Specialist Homelessness Services (SHS) agency requesting a service or services. A person becomes a client once they receive a service or services. The period of time a client receives assistance from a SHS agency is commonly referred to as a support period. It relates to the provision of assistance and/or supported accommodation. A support period is considered finished when the relationship between the client and the agency ends or the client has reached their maximum amount of support.</p> <p>During a support period there are, in most cases, a series of service episodes or assistance, other than supported accommodation, provided to the client by the SHS agency. For the purposes of the Specialist Homelessness Services NMDS, assistance also includes contact with a client, or work on behalf of a client.</p> <p>The SHS NMDS has three 'views' for collection purposes, they are: Unassisted person, Client and Specialist homelessness agency.</p> <p>An 'Unassisted person' in the context of this collection is any person who seeks assistance from an agency and is not successful in obtaining that assistance. A 'Client' is a person who receives services either directly or indirectly from an agency. A 'Specialist homelessness agency' is an organisation which receives government funding to deliver a specialist homelessness service to a client. If clients present collectively</p>

information is collected for each client but the group is referred to as a 'Presenting unit'.

The 2011 SHS NMDS was developed to support the collection of data under the Intergovernmental Agreement on Federal Financial Relations for Homelessness. It replaced the Supported Accommodation Assistance Program (SAAP) collection from July 2011.

In 2008 the Council of Australian Governments (COAG) agreed to reform federal financial relations to improve the quality and effectiveness of government services. These reforms led to the establishment of the National Affordable Housing Agreement (NAHA) and the National Partnership Agreement on Homelessness (NPAH), which includes specific performance measures in relation to homelessness.

In conjunction with these reforms, the Australian Government initiated a comprehensive policy review, setting out a national approach to reducing homelessness in the White Paper: The Road Home, A National Approach to Reducing Homelessness. The 2013-14 SHS NMDS continues to reflect the outcome based performance framework promoted by the COAG Reforms and White Paper. It supports the collection, analysis and reporting of client-based data. This allows for the production of statistical information about clients' circumstances, the assistance they receive and the outcomes that are achieved for them. This information can be used to inform policy design, evaluation, service improvement and monitoring of specialist homelessness services in Australia.

In addition the 2013-14 SHS NMDS provides for the collection of information about SHS clients with disabilities. This information will be used to better understand the circumstances and experiences of clients with disabilities who access SHS agencies.

## Collection and usage attributes

*Guide for use:* For jurisdictions who have high volume central intake or localised entry point agencies (for example ACT and Victoria), data for unmet demand and unassisted requests for services are not directly comparable with other states and territories.

*Implementation start date:* 01/07/2013

*Implementation end date:* 30/06/2014

## Source and reference attributes

*Submitting organisation:* Housing and Homelessness Information Management Group.

## State owned and managed Indigenous housing (SOMIH) DSS 2011-12

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480485
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Set Specification (DSS)
<i>Scope:</i>	<p>The purpose of the State owned and managed Indigenous housing (SOMIH) data set specification is to describe information about tenants in SOMIH dwellings covered by the National Affordable Housing Agreement (NAHA). Included are households residing in SOMIH dwellings where the dwelling is either:</p> <ul style="list-style-type: none"><li>• owned by the housing authority</li><li>• leased from the private sector or other housing program areas and used for provision of public rental housing</li></ul> <p>SOMIH dwellings leased to other program areas such as community housing or crisis and emergency accommodation programs are not included in this collection.</p> <p>Dwellings no longer under the administration of the property manager/agency at 30 June 2012, (including dwellings demolished, sold or disposed of) and dwellings not yet available to the property manager/agency at 30 June 2012, (such as those still under construction or being purchased) are excluded.</p>

### Collection and usage attributes

<i>Statistical unit:</i>	Persons, Households, <a href="#">Dwellings</a> and Vacancy episodes.
<i>Guide for use:</i>	<p>All jurisdictions are asked to supply the single/couple codes in 2011-12 data extractions. Previously, a household's bedroom requirement has been calculated using the Proxy Occupancy Standard (POS), however under NAHA reporting requirements, the match of a dwelling to household size is based on Canadian National Occupancy Standard (CNOS).</p> <p>New low income cut-off measures for low income households based on new definition under NAHA.</p>
<i>Collection methods:</i>	State and territory housing authorities provide the data to the Australian Institute of Health and Welfare for national collation on an annual basis. The SOMIH program is not applicable to Victoria, Western Australia, Australian Capital Territory, and Northern Territory.

Include:

- Dwellings headleased from private market or other programs and managed by the jurisdiction.

Exclude:

- Dwellings no longer under the administration of the property manager/agent at 30 June 2012
- Dwellings not yet available to the property manager/agency at 30 June 2012, such as those still under construction or being purchased
- Dwellings owned but not administered by the jurisdiction (e.g. leased to other program areas and not administered by state housing authority).

Data qualifications:

- Bedsits are to be reported as 1 bedroom AND counted as 1 bedroom for performance indicator calculations
- Occupied dwellings can be tenantable or untenable.

*Implementation start date:* 01/07/2011

*Implementation end date:* 30/06/2012

## Statistical linkage key 581 cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	349510
<i>Registration status:</i>	Community Services, Standard 21/05/2010 Housing assistance, Standard 23/08/2010 Health, Standard 07/12/2011 Early Childhood, Standard 21/05/2010 Homelessness, Standard 23/08/2010
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	<p>Statistical data linkage refers to the bringing together of data from different sources to gain a greater understanding of a situation or individual from the combined (or linked) dataset. This facilitates a better understanding of the patterns of service use by groups of clients for research, statistical or policy analysis, planning and evaluation purposes.</p> <p>Its form is: <b>XXXXXDDMMYYYYN</b></p> <p>The sequence in which the linkage key is completed is as follows:</p> <ul style="list-style-type: none"><li>Family name (the first 3 Xs)</li><li>Given name (the 4th and 5th X)</li><li>Date of birth by day, month and four-digit year</li><li>Sex</li></ul> <p><b>XXX 2nd, 3rd and 5th letters of the family name.</b></p> <p>In the first three spaces the agency should record the 2nd, 3rd and 5th letters of the client's family name.</p> <p>For example: If the client's family name is Smith the reported value should be MIH. If the client's family name is Jones the reported value should be ONS.</p> <p>Regardless of the length of a person's name, the reported value should always be three characters long. If the legal family name is not long enough to supply the requested letters (i.e. a legal family name of less than five letters) then agencies should substitute the number '2' to reflect the missing letters. The placement of a number '2' should always correspond to the same space that the missing letter would have within the 3-digit field. A number (rather than a letter) is used for such a substitution in order to clearly indicate that an appropriate corresponding letter from the person's name is not available.</p> <p>Cases where the family name has less than 5 letters:</p> <p>If a person's family name is Farr, then value reported would be AR2 because the 2 is substituting for a missing</p>

5th letter of the family name. Similarly, if the person's family name was Hua, then the value reported would be UA2 because the 2 is substituting for the missing 5th letter of the family name.

If a client's family name is missing altogether the agency should record the number 999 for all three spaces associated with the family name, (not the number 2). In some cultures it is traditional to state the family name first. To overcome discrepancies in recording/reporting that may arise as a result of this practice, agencies should always ask the person to specify their legal first given name and their legal family name separately. These should then be recorded as first given name and family name as appropriate, regardless of the order in which they may be traditionally given.

If the client's family name includes non-alphabetic characters – for example hyphens (as in Lee-Archer), apostrophes (as in O'Mara) or blank spaces (as in De Vries) – these non-alphabetic characters should be ignored when counting the position of each character.

#### **XX 2nd and 3rd letters of given name**

In the fourth and fifth spaces the agency should record the 2nd and 3rd letters of the client's given name.

For example: If the client's given name is Elizabeth the reported value should be LI. If the client's given name is Robert the reported value should be OB.

If the client's given name includes non-alphabetic characters – for example hyphens (as in Jo-Anne) or apostrophes (as in D'Arcy), these non-alphabetic characters should be ignored when counting the position of each character.

Regardless of the length of a person's given name, the reported value should always be two characters long. If the given name of the person is not long enough to supply the requested letters (i.e. a name of less than three letters) then agencies should substitute the number '2' to reflect the missing letters. The placement of a number '2' should always correspond to the same space that the missing letter would have within the 2-digit field. A number (rather than a letter) is used for such substitutions in order to clearly indicate that an appropriate corresponding letter from the person's name is not available.

For example: If the person's legal name was Jo then the value reported would be O2 because the 2 is substituting for the missing 3rd letter of the given name.

If the person's given name is missing altogether the agency should record 99 for the two spaces associated with the given name. In some cultures it is traditional to state the

family name first. To overcome discrepancies in recording/reporting that may arise as a result of this practice, agencies should always ask the person to specify their given name and their family name separately. These should then be recorded as first given name and family name as appropriate, regardless of the order in which they may be traditionally given.

### **Date of Birth**

DD represents the day in the month a person was born  
MM represents the month in the year a person was born  
YYYY represents the year a person was born

If date of birth is not known or cannot be obtained, provision should be made to collect or estimate age. Collected or estimated age would usually be in years for adults and to the nearest three months (or less) for children aged less than two years. Additionally, an estimated date flag or a date accuracy indicator should be reported in conjunction with all estimated dates of birth.

For data collections concerned with children's services, it is suggested that the estimated date of birth of children aged under 2 years should be reported to the nearest 3 month period, i.e. 0101, 0104, 0107, 0110 of the estimated year of birth. For example, a child who is thought to be aged 18 months in October of one year would have his/her estimated date of birth reported as 0104 of the previous year. Again, an estimated date flag or date accuracy indicator

<http://meteor.aihw.gov.au/content/index.phtml/itemId/294429> should be reported in conjunction with all estimated dates of birth.

### **Sex**

N represents whether or not the person is a 1. Male or 2. Female.

Operationally, sex is the distinction between male and female, as reported by a person or as determined by an interviewer.

When collecting data on sex by personal interview, asking the sex of the respondent is usually unnecessary and may be inappropriate, or even offensive. It is usually a simple matter to infer the sex of the respondent through observation, or from other cues such as the relationship of the person(s) accompanying the respondent, or first name. The interviewer may ask whether persons not present at the interview are male or female.

A person's sex may change during their lifetime as a result of procedures known alternatively as sex change, gender reassignment, transsexual surgery, transgender reassignment or sexual reassignment. Throughout this

process, which may be over a considerable period of time, the person's sex could be recorded as either Male or Female.

In data collections that use the ICD-10-AM classification, where sex change is the reason for admission, diagnoses should include the appropriate ICD-10-AM code(s) that clearly identify that the person is undergoing such a process. This code(s) would also be applicable after the person has completed such a process, if they have a procedure involving an organ(s) specific to their previous sex (e.g. where the patient has prostate or ovarian cancer).

**Code 3 Intersex or indeterminate**

Is normally used for babies for whom sex has not been determined for whatever reason.

Should not generally be used on data collection forms completed by the respondent.

Should only be used if the person or respondent volunteers that the person is intersex or where it otherwise becomes clear during the collection process that the individual is neither male nor female.

**Code 9 Not stated/inadequately described**

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

Data that has been produced by linkage for statistical and research purposes should not be used subsequently for client management purposes.

This data cluster contains a set of specific data elements to be reported on in a predetermined combination.

## **Collection and usage attributes**

*Guide for use:* Where a date of birth is estimated the date accuracy indicator should be used. Please see Relational attributes.

## Tenancy/vacancy cluster (Mainstream community housing)

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480127
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	This file captures information about tenancies in housing provided for low to moderate income or special needs households. These dwellings are managed by community-based organisations that have received capital or recurrent subsidy from government. Community housing models vary across jurisdictions, and the housing stock may be owned by a variety of groups including government.

### Collection and usage attributes

<i>Statistical unit:</i>	<a href="#">Dwelling</a> , <b>Tenancy rental unit</b> and <a href="#">Households</a>
<i>Collection methods:</i>	Data is collected via a survey of community housing providers and forwarded to state or territory housing authorities. State and territory housing authorities provide the data to the Australian Institute of Health and Welfare for national collation on an annual basis.

### Relational attributes

<i>Implementation in Data Set Specifications:</i>	<a href="#">Mainstream community housing 2011-12</a> Housing assistance, Standard 01/05/2013 <i>Implementation start date:</i> 01/07/2011 <i>Implementation end date:</i> 30/06/2012 <i>Conditional obligation:</i> This cluster is conditional on the basis of an active tenancy in mainstream community housing during the collection period.

## Waitlist (housing assistance) cluster

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	459131
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Waitlist cluster describes all households who were on the public rental housing and State owned and managed Indigenous housing (SOMIH) waitlist as a transfer applicant or new applicant in the financial year. This includes households who are still waiting at 30 June or were first housed during the financial year.

### Collection and usage attributes

<i>Statistical unit:</i>	<b>Household</b>
<i>Guide for use:</i>	Include: <ul style="list-style-type: none"><li>• 1 Waitlist applicant – waitlist applicant identifier, X[X(14)] per applicant household per program</li><li>• 1 record per Waitlist applicant – waitlist applicant identifier, X[X(14)]</li><li>• Indigenous applicants to be placed under one program (either PH or SOMIH)</li><li>• New applicants</li><li>• Transfer applicants.</li></ul> Exclude: <ul style="list-style-type: none"><li>• Mutual exchanges</li><li>• Same address transfers.</li></ul>
<i>Comments:</i>	Refer to the collection period of the data set to determine the reference year for this cluster.

# Client

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Client
<i>METeOR identifier:</i>	268969
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 23/08/2010 Health, Standard 01/03/2005 Homelessness, Standard 23/08/2010 Indigenous, Draft 18/10/2012
<i>Definition:</i>	A person, group or organisation eligible to receive services either directly or indirectly from an agency.
<i>Context:</i>	<p>Agencies may provide assistance to individual persons, groups of persons (e.g. support groups) or to other organisations. All of these may be considered clients of an agency. Specific data collections may circumscribe the Type of clients that are included in the collection. For example, at the current stage of development of the Home and Community Care (HACC) Minimum Data Set (MDS), HACC funded agencies are only required to report on clients who are individual persons. Future developments may extend the coverage of the HACC MDS collection to include organisational or group clients.</p> <p>The definition of a 'client' may also be circumscribed by the definition of 'assistance'. What is included as 'assistance' may depend on what activities are considered significant enough to warrant separate recording and reporting of the nature and/or amount of the assistance provided to a person. For example, an agency worker answering a telephone call from an anonymous member of the public seeking some basic information (e.g. a phone number for someone) would not usually consider that this interaction constituted assistance of sufficient significance to warrant recording that person as a 'client'.</p> <p>Furthermore, what constitutes 'assistance' may be influenced by the type of assistance the agency was established to provide. In the above example, the agency in question was funded specifically to provide telephone advice, and referral information, to members of the public or specific sub-groups of the public. The agency may have a policy that all persons telephoning the agency for information are classified as clients, albeit anonymous clients.</p> <p>The level of support or the amount of support given to a person by an agency can also be used to define them as a</p>

client or not. For example in the Supported Accommodation Assistance Program (SAAP) National data collection, clients are defined by either taking up an amount of time of an agency; being accommodated by an agency; or by entering an ongoing support relationship with an agency.

# Dwelling

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Dwelling
<i>METeOR identifier:</i>	268982
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 01/03/2005
<i>Definition:</i>	A structure or a discrete space within a structure intended for people to live in or where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.
<i>Context:</i>	Dwellings are the main counting unit in the housing sector. Dwellings are reported for a variety of purposes including number of untenable or tenable, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including headleased stock from <b>private</b> and <b>government</b> sources. A dwelling includes a <b>boarding house building</b> and <b>boarding house units</b> .
<i>Specialisation of:</i>	Environmental factors

## Collection and usage attributes

<i>Guide for use:</i>	<b>Boarding house rooms</b> or beds are not identified as separate dwellings unless they are self-contained. Self-contained rooms are therefore defined as units and are counted as a separate dwelling.  For the public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting the number of dwellings.

# Household

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	268977
<i>Registration status:</i>	Community Services, Superseded 27/04/2007 Housing assistance, Standard 01/03/2005 Health, Standard 04/05/2005
<i>Definition:</i>	A group of two or more related or unrelated people who usually reside in the same dwelling, and who make common provision for food or other essentials for living. Or a single person living in a dwelling who makes provision for his or her own food and other essentials for living, without combining with any other person.
<i>Context:</i>	Together with family, household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.
<i>Specialisation of:</i>	Person/group of persons

## Collection and usage attributes

<i>Guide for use:</i>	For housing data collections, the number of tenancy agreements is a practical proxy for calculating the number of households receiving housing assistance. The persons in the group may pool their incomes and have a common budget to a greater or lesser extent: they may be related or unrelated persons, or a combination of both. Only usual residents of the household are included as members of the household. Visitors to a household are, by definition, excluded from the household.

### Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Income unit
<i>METeOR identifier:</i>	268986
<i>Registration status:</i>	Community Services, Standard 31/08/2007 Housing assistance, Standard 01/03/2005
<i>Definition:</i>	One person or a group of related persons within a household, whose command over income is shared, or any person living in a non private dwelling who is in receipt of personal income.
<i>Context:</i>	Income units are restricted to relationships of marriage (registered or de facto) and of parent/ <b>dependant</b> who usually reside in the same household. This means that an income unit can be defined as: <ul style="list-style-type: none"><li>• a married couple or sole parent, and dependent children only</li><li>• a married couple only with no dependent children present</li><li>• a person who is not related to any other household member either by marriage or by the parent/<b>dependant</b> relationship.</li></ul> This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and families.
<i>Specialisation of:</i>	Person/group of persons

## Service episode

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	320994
<i>Registration status:</i>	Community Services, Standard 29/04/2006 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	A period of time during which a client receives assistance from an agency.
<i>Context:</i>	<p>Service provision and planning:</p> <p>The concept of a service episode (and associated metadata items) is necessary for the analysis, of the length of provision of assistance to clients. In conjunction with information about the amount and type of assistance received by clients, information about the length of the service episode also gives some indication of the intensity of assistance provided by agencies.</p> <p>A client's service episode always begins and ends with dates that mark the first and last time that the person received assistance from the agency. That is, a service episode will always begin and end with service event (see metadata item the service event).</p> <p>The pathway or process followed by a person entering or exiting from a service episode varies from one agency to another and from one type of assistance to another. It cannot be assumed, for example, that every client has undergone an assessment (or the same type of assessment) before entering a service episode. At times, a client may receive services from an agency on the basis of a referral from an established source with which the agency has well-developed referral protocols. At other times, a client who has been previously assisted by the agency may begin to receive services again without undergoing the same level of assessment on entry into a subsequent service episode.</p> <p>The definition of service episode has not assumed that any standard sequence of events applies to all service episodes for all clients across all types of agencies and across all programs. Rather, the definition of a service episode allows for the receipt of any of the types of assistance to serve as a trigger for the beginning of a service episode. That is, the service activity associated with the beginning of a service episode (i.e. the first service event) will vary across agencies.</p> <p>While agency policies and practices will impact upon the determination of a Service episode to some extent (e.g.</p>

different policies for taking clients 'off the books') the basic feature across agencies remain the first and the last Service events received by a client within a period of receipt of assistance. Establishing greater consistency in the determination of Service episodes would require a national cross-program approach to standardising entry and exit procedures across the community service sector.

## Service event

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	320989
<i>Registration status:</i>	Community Services, Standard 07/03/2006 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	An instance or occasion of assistance received by a client from a service provider.
<i>Context:</i>	<p>Information about individual instances of the receipt of assistance by a client from a service agency is of fundamental interest to service providers, but may or may not be required for national reporting purposes. However, information about an individual service event is a basic building block for other information that is of relevance to national reporting and statistical analysis. For example, if information about the length of time that certain types of persons have received particular types of assistance from specific types of agencies is required, then information about each instance of service provision should be recorded in a standard way. This should enable reliable, valid and comparable data to be reported nationally. Generally, a service event is described by a cluster of data elements that provide information about when it happened, where it happened, what assistance was received, how much and from whom. The need for information about service events reflects an interest in locating community service assistance to clients in time. This information may help to identify the intensity of assistance received by a person during a time period. Knowing when a person received assistance from an agency also helps to identify those records that are of interest to particular data collections. For example, an agency may be required to report on all assistance provided to clients during, say 1999-2000.</p> <p>As with the definition of <i>client</i>, what constitutes a <i>service event</i> is influenced by the definition of 'assistance'. That is, every interaction between an agency and a client may not be considered of sufficient significance to warrant recording as a <i>service event</i>. Furthermore, decisions about what is included or excluded from the definition of 'assistance' may be affected by specific program requirements as well as practical considerations related to the amount of time and resources it takes to record every interaction between an agency and a client.</p>

## Geographic remoteness

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Property
<i>METeOR identifier:</i>	396537
<i>Registration status:</i>	Community Services, Standardisation pending 22/03/2013 Housing assistance, Standard 01/05/2013 Health, Standard 07/12/2011
<i>Definition:</i>	The remoteness of a location, based on the physical road distance to the nearest urban centre and its population size.
<i>Context:</i>	Geographic remoteness is essentially a measure of a physical location's level of access to goods and services. Large population centres tend to have a greater range of goods and services available than small centres. Typically, a population centre is not likely to provide a full range of goods and services until its population reaches around 250,000 people.
<i>Property group:</i>	Location characteristics

## Gross capital expenditure

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Property
<i>METeOR identifier:</i>	269024
<i>Registration status:</i>	Housing assistance, Standard 10/02/2006 Health, Standard 01/03/2005
<i>Definition:</i>	Expenditure on the acquisition or enhancement of a <b>non-financial asset</b> .
<i>Property group:</i>	Financial characteristics

### Collection and usage attributes

<i>Guide for use:</i>	National health data dictionary specific: Gross capital expenditure is capital expenditure as reported by the particular establishment having regard to state health authority and other authoritative guidelines as to the differentiation between capital and recurrent expenditure. (A concise indication of the basis on which capital and recurrent expenditure have been differentiated is to form part of national minimum data sets). National housing assistance data dictionary specific: Expenditure on the acquisition or enhancement of an asset (excluding financial assets). A non-financial asset is an entity functioning as a store of value, over which ownership may be derived over a period of time, and which is not a financial asset. Capital includes: acquisitions (purchase of properties); construction costs; redevelopment and improvement (of properties); land acquisitions and development; joint ventures.

### Identifying and definitional attributes

<i>Metadata item type:</i>	Property
<i>METeOR identifier:</i>	479686
<i>Registration status:</i>	Housing assistance, Standard 01/05/2013
<i>Definition:</i>	The number of permanent dwellings under the management of an organisation. A permanent dwelling has fixed walls, roof and doors. They usually have kitchen and bathroom facilities, though this is not necessary provided these facilities could be built into the structure. These structures are made from regular building materials and are intended for long-term residential use.
<i>Property group:</i>	Material resource characteristics

# Classification schemes

---

# Australian and New Zealand Standard Classification of Occupations, First edition, 2006

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Classification Scheme
<i>Synonymous names:</i>	ANZSCO 1st edition
<i>METeOR identifier:</i>	350882
<i>Registration status:</i>	Community Services, Standard 27/03/2007 Health, Standard 04/07/2007
<i>Definition:</i>	The Australian Bureau of Statistics (ABS) classification for occupations.
<i>Classification structure:</i>	<p>The structure of ANZSCO has five hierarchical levels - major group, sub-major group, minor group, unit group and occupation. The categories at the most detailed level of the classification are termed 'occupations'. These are grouped together to form 'unit groups', which in turn are grouped into 'minor groups'. Minor groups are aggregated to form 'sub-major groups' which in turn are aggregated at the highest level to form 'major groups'.</p> <p>These are the same hierarchical levels that are used in ASCO Second Edition and NZSCO 1999.</p>

### Conceptual model

ANZSCO is a skill-based classification used to classify all occupations and jobs in the Australian and New Zealand labour markets.

To do this, ANZSCO identifies a set of occupations covering all jobs in the Australian and New Zealand labour markets, defines these occupations according to their attributes and groups them on the basis of their similarity into successively broader categories for statistical and other types of analysis. The individual objects classified in ANZSCO are jobs.

In ANZSCO, occupations are organised into progressively larger groups on the basis of their similarities in terms of both skill level and skill specialisation.

The conceptual model adopted for ANZSCO uses a combination of skill level and skill specialisation as criteria to design major groups which are meaningful and useful for most purposes. The eight major groups are formed by grouping together sub-major groups using aspects of both skill level and skill specialisation. In designing the major groups, intuitive appeal and usefulness in both statistical and administrative applications were also important considerations.

The skill level criterion is applied as rigorously as possible at the second level of the classification, the sub-major group

level, together with a finer application of skill specialisation than that applied at the major group level. Each sub-major group is made up of a number of minor groups.

Minor groups are distinguished from each other mainly on the basis of a finer application of skill specialisation than that applied at the sub-major group level. Within minor groups, unit groups are distinguished from each other on the basis of skill specialisation and, where necessary, skill level.

Virtually all unit groups are at one skill level. There are only eight unit groups which contain occupations at more than one skill level. In all but two of these unit groups, the vast majority of jobs classified to the unit group are at one skill level only. Data stored at unit group level can therefore be aggregated by skill level with a high degree of validity.

Within unit groups, the distinction between occupations amounts to differences between tasks performed in occupations. All occupations are at one skill level.

As a result, data classified at the major group level will provide only a broad indication of skill level. Data at the sub-major group level will provide a satisfactory indication of skill level for many analytical purposes. Data classified at the unit group level will provide an accurate indication of skill level. Unit groups can, therefore, be aggregated by skill level to provide an indicative measure of occupations classified by skill level.

## Australian Classification for Source of Income 2010

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Classification Scheme
<i>METeOR identifier:</i>	412558
<i>Registration status:</i>	Housing assistance, Standard 23/08/2010
<i>Definition:</i>	<p>The Australian Bureau of Statistics (ABS) classification for sources from which persons, income units, families and households receive income. 'Sources of income' applies to all persons, income units, families and households reporting a value for 'Total income' in surveys.</p>
<i>Classification structure:</i>	<p>The classification is a three level hierarchal classification that groups sources of income at the broad, narrow and detailed levels.</p> <p>At the broad, or top, level of the classification for 'Total income', the income components are grouped according to whether they are received from:</p> <ul style="list-style-type: none"><li>• an employer, including their own incorporated business</li><li>• a profit or loss from their own unincorporated business</li><li>• a government pension or allowance paid by a government entity under social security and related government programs</li><li>• any other source. This is output as 'Other income'.</li></ul> <p>At the narrow, or second, level of the classification, 'Any other source' is classified according to whether income is received from:</p> <ul style="list-style-type: none"><li>• investments, that is income received as a result of the ownership of financial and non-financial assets</li><li>• superannuation pensions and annuities</li><li>• other current transfers.</li></ul> <p>At the detailed, or third, level of the classification, investment income, government pensions and allowances and other current transfers are further broken down into their component groupings.</p>

### Collection and usage attributes

<i>Guide for use:</i>	<p>An individual may receive income from more than one source. 'Total income' is the sum of the following income components, before income tax and the Medicare Levy are taken out:</p> <ul style="list-style-type: none"><li>• employee income</li><li>• profit or loss from self employment (own unincorporated business income)</li><li>• government pensions and allowances</li><li>• investment income</li></ul>
-----------------------	---

- superannuation pensions and annuities
- other current transfers received.

## Assistance received

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327202
<i>Registration status:</i>	Community Services, Standard 01/03/2005
<i>Definition:</i>	The goods or services, or time or money received by a person (client) during a service episode or event.
<i>Context:</i>	This is important for client centred collections. It may be used to measure the amounts and nature of assistance that are received directly by clients, which can be used to help assess the appropriateness and effectiveness of programs.

### Collection and usage attributes

<i>Comments:</i>	<p>This is a client centred measure of amounts of assistance. This is not necessarily the same as an agency's total outlay to a particular client as it does not include administration costs, travel time for service providers, etc.</p> <p>For example, a client that receives meals from a meals on wheels service. In this instance only that which is directly received by the client is recorded (i.e. the number of meals). The administration costs of providing this service, the costs of making the meal and the time and costs of the person delivering the meal are not included in the amount of assistance received.</p> <p>This is only a measure of money, time or quantity of goods or services directly received by clients. It will not accrue to give a total of assistance provided on an agency basis (in terms of money, time or quantity of goods or services). Therefore it should not be used for National Accounts reporting.</p>

## Assistance request reason

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327204
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 02/08/2010 Homelessness, Standard 02/08/2010
<i>Definition:</i>	The reason(s) why a person has sought or requires assistance from an agency.
<i>Context:</i>	To better identify the needs of clients, to identify needs that are not being met and to target assistance to clients more effectively.

### Collection and usage attributes

<i>Comments:</i>	<p>A person may seek or require assistance for a number of reasons, some of which are the immediate presenting reason, while others will be underlying or longer term reasons. These will require particular and usually different responses and services.</p> <p>For example, a person's immediate reason for seeking assistance may be that they have lost their accommodation and require accommodation support. However, the underlying reasons as to why they have no accommodation may be because of a psychiatric condition, alcohol or drug dependency, a gambling addiction, or because they are being abused at home. These underlying reasons may or may not have directly resulted in the homelessness, but have been contributing factors.</p> <p>Underlying reasons for a person requiring a service are likely to be complex and more difficult to ascertain than the immediate presenting reason.</p> <p>A second example is in child protection. Many children that come to the attention of community services agencies as being in need of care and protection come from families in crisis (for example, parents have psychiatric illnesses, financial stress, domestic violence etc.). Without providing a service to the family as well as the child then the child is likely to be re-notified.</p> <p>Providing a service for the client's immediate need will not necessarily assist the client in the longer term, resulting in the client continually requiring short term assistance, while at the same time continuing to have an underlying problem or need that is not being addressed.</p> <p>Therefore by attempting to collect information on both the immediate and the underlying reasons for a person's</p>
------------------	--

current situation, agencies may be able to better assist them both in the short and longer term, while at the same time more effectively utilising the services available.

Many children that come to the attention of community services agencies as being in need of care and protection come from families in crisis (for example, parents have psychiatric illnesses, financial stress, domestic violence etc.).

Further research is required to develop a data domain to enable the measurement of this concept.

It is possible that a number of data elements could be developed out of this concept, such as 'Immediate reason for seeking assistance' and 'Underlying reason for seeking assistance'. Such items would need a great deal of consultation with input from community service agencies to develop meaningful and well structured data domains.

<i>Context:</i>	The identification of individual <b>boarding house bedrooms</b> or units from <b>boarding house buildings</b> is important in calculating the operational costs for this type of dwelling.

### Collection and usage attributes

<i>Guide for use:</i>	<p>Section 5A of the Social Security Act 1991 states that:</p> <p>5A(5A) A person's accommodation is exempt accommodation (i.e. they are eligible for Commonwealth Rent Assistance at the full single rate) if it is in premises that are, in the Secretary's opinion, a boarding house, guest house, hostel, private hotel, rooming house, lodging house or similar premises.</p> <p>5A(5B) In forming an opinion about a person's accommodation for the purpose of subsection (5A), the Secretary is to have regard to the characteristics of the accommodation including, in particular, whether or not the following are characteristics of the accommodation:</p> <ul style="list-style-type: none"><li>(a) the premises are known as a boarding house, guest house, hostel, hotel, private hotel, rooming house, lodging house or similar premises;</li><li>(b) a manager or administrator (other than a real estate agent) is retained to manage the premises or administer the accommodation on a daily or other frequent regular basis;</li><li>(c) staff are retained by the proprietor or manager of the premises to work in the premises on a daily or other frequent regular basis;</li><li>(d) the residents lack control over the day-to-day management of the premises;</li><li>(e) there are house rules, imposed by the proprietor or manager, that result in residents having rights that are more limited than those normally enjoyed by a lessee of private residential accommodation (for example, rules limiting the hours of residents' access to their accommodation or limiting residents' access to cooking facilities in the</li></ul>
-----------------------	--

premises);

(f) the person does not have obligations to pay for his or her costs of gas, water or electricity separately from the cost of the accommodation;

(g) the accommodation is not private residential accommodation, having regard to:

- the number and nature of bedrooms in the premises; or
- the number of people who are not related to one another living at the premises; or
- the number and nature of bathrooms in the premises;

(h) the person's accommodation has not been offered to the person on a leasehold basis;

(i) there is no requirement that the person pay a bond as security for either the payment of rent or the cost of any damage caused by the person, or for both;

(j) the person's accommodation is available on a daily or other short-term basis.

5A(5C) Each of the characteristics set out in subsection 5(B) points towards the accommodation in question being exempt accommodation (i.e. the person is eligible for CRA at the full single rate)

# Disability

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327304
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 01/03/2005 Health, Standard 29/11/2006
<i>Definition:</i>	<p>Disability is the umbrella term for any or all of: an impairment of body structure or function, a limitation in activities, or a restriction in participation.</p> <p>Disability is a multi-dimensional and complex concept and is conceived as a dynamic interaction between health conditions and environmental and personal factors (WHO 2001:6).</p>

## Collection and usage attributes

<i>Comments:</i>	<p>Many different 'definitions' of disability are used in Australia, both in administrative data collections and in Acts of Parliament. The consistent identification of disability in national data collections has been recommended in a number of reports, for instance to enable:</p> <ul style="list-style-type: none"><li>• the monitoring of access to generic services by people with disability</li><li>• the collection of more consistent data on disability support and related services, including data on service use by different groups</li><li>• population data and service data to be related, thereby improving the nation's analytical capacity in relation to the need for and supply of services</li><li>• improved understanding of the relationship between disability, health conditions and other health outcomes.</li></ul> <p>Defining disability makes it possible to determine the number of people who are accessing services, both disability specific and generic, and also those with a disability in the general population with unmet need. Better definition of disability will aid better targeting of resources to those in need.</p> <p>Disability arises from the interaction between health conditions and environmental and personal factors. A health condition may be a disease (acute or chronic), disorder, injury or trauma. Environmental factors make up the physical, social and attitudinal environment in which people live and conduct their lives. Personal factors relate to the individual, such as age, sex and Indigenous status.</p>
------------------	---

The concept 'Disability' can be described using a combination of related metadata items as building blocks. The metadata items selected may vary depending on the definition of disability used. For example, in hospital rehabilitation, the focus may be on the impairment and **activity** dimensions and in community-based care the focus may be primarily on participation. Some applications may require a broad scope for inclusion (e.g. discrimination legislation). Data collections relating to services will select combinations of the data elements, which best reflect the eligibility criteria for the service.

This glossary item is based on the International Classification of Functioning, Disability and Health (ICF). The ICF was endorsed by the World Health Assembly in 2001 as a reference member of the WHO Family of International Classifications and of the Australian Family of Health and Related Classifications (endorsed by the National Health Information Management Group in 2002). The ICF provides a framework for the description of human functioning and disability. The components of ICF are defined in relation to a health condition. A health condition is an 'umbrella term for disease (acute or chronic), disorder, injury or trauma' (WHO 2001). A health condition may be recorded, for example, as Episode of care principal diagnosis, code (ICD-10-AM 3rd Edn) ANN{.N[N]} and Episode of care additional diagnosis, code (ICD-10-AM 3rd Edn) ANN{.N[N]}.

## Geographic indicator

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327306
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 22/10/2005 Health, Standard 01/03/2005 Homelessness, Standard 22/10/2005
<i>Definition:</i>	<p>A classification scheme that divides an area into mutually exclusive sub-areas based on geographic location. Some geographic indicators are:</p> <ul style="list-style-type: none"><li>• Australian Standard Geographical Classification (ASGC, ABS Cat No. 1216.0)</li><li>• administrative regions</li><li>• electorates</li><li>• Accessibility/Remoteness Index of Australia (ARIA)</li><li>• Rural, Remote and Metropolitan Area Classification (RRMA)</li><li>• country.</li></ul>
<i>Context:</i>	<p>To enable the analysis of data on a geographical basis. Facilitates analysis of service provision in relation to demographic and other characteristics of the population of a geographic area.</p>

### Collection and usage attributes

<i>Comments:</i>	<p>Person (address) – Australian postcode (Postcode datafile), code [NNNN] is not included in the above listing, as it is, strictly speaking, not a geographic indicator. Sometimes postcodes are used in the analysis of data on a geographical basis, which involves a conversion to Statistical Local Area (an Australian Bureau of Statistics geographical structure). This conversion results in some inaccuracy of information. However, in some data sets Person (address) – Australian postcode (Postcode datafile), code [NNNN]; is the only geographic identifier, therefore the use of other more accurate indicators (for example, conversion from address line to Statistical Local Area) is not always possible.</p>

## Head-leased dwelling (private)

---

### Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327414
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	Dwellings owned by private individuals or private corporations that are leased to Commonwealth-State Housing Agreement (CSHA) housing providers via head-leasing arrangements. The CSHA housing provider is usually responsible for tenant selection and tenancy management functions.
<i>Context:</i>	Head-leasing involves at least two leases: one between the dwelling owner and the lessee, and one between the provider and the tenant. The Residential Tenancies Act applies to both leases.

### Collection and usage attributes

<i>Comments:</i>	Head-leasing is commonly undertaken in the community housing sector, where non-Government organisations head-lease housing stock from the private sector and state and territory Governments, and sublease it directly to the tenants. It is important to identify those dwellings that are head-leased from the private sector, as maintenance and other management costs are generally incurred by the owner, and therefore may not be captured in the annual CSHA data collections.

# Homeless

---

## Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327244
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 23/08/2010 Health, Standard 01/03/2005 Homelessness, Standard 23/08/2010
<i>Definition:</i>	<p>A person is homeless if he or she does not have access to safe, secure and stable housing. Hence even if a person has a physical home, they would be considered homeless if:</p> <ul style="list-style-type: none"><li>• they were not safe at home,</li><li>• they had no legal right to continued occupation of their home (security of tenure), or</li><li>• the home lacked the amenities or resources necessary for living.</li></ul>
<i>Context:</i>	<p>There is considerable concern over the number of homeless people in society and the assistance they require. Collecting information on homeless people is problematic, as the concept of 'homelessness' encompasses elements in addition to whether, someone resides in a dwelling or not.</p>

# Companion guide

## What are the national data dictionaries?

The national data dictionaries contain standard data definitions and data elements for use in any Australian community services, health, and housing and homelessness data collection. The National Community Services Data Dictionary, the National health data dictionary and the National housing and homelessness data dictionary are the authoritative source of information about endorsed national metadata standards and provide the basis for consistent national collection and reporting. The national metadata standards are approved by the Australian Government and all state and territory relevant community services and health departments, as well as the Australian Bureau of Statistics (ABS) and the Australian Institute of Health and Welfare (AIHW). This work is funded under the auspices of the Community and Disability Services Ministers' Advisory Council (CDSMAC), the Australian Health Ministers' Advisory Council (AHMAC), and the Housing Ministers' Advisory Committee (HMAC),

Where possible, metadata standards in the dictionary are consistent with other national standard classifications to ensure overall comparability of national data. The ABS is the source of many key socioeconomic classifications used in data collections, for example, the Australian Standard Classification of Languages (ASCL), the Australian Standard Geographic Classification (ASGC) and the Australian and New Zealand Standard Classifications of Occupations (ANZSCO).

The data dictionaries have been downloaded from METeOR, which is an online metadata registry for developing, registering and disseminating metadata based on the second edition of the international standard ISO/IEC 11179 Information Technology–Metadata registries in 2003 (ISO/IEC 11179:2003). For more information about METeOR, see the METeOR section on page 753. The national community services, health, and housing and homelessness data dictionaries are also available online at <<http://meteor.aihw.gov.au>>.

## Governance

The national community services, health, and housing and homelessness data dictionaries are, respectively, initiatives under the National Community Services Information Infrastructure Agreement; the National Health Information Agreement; and the National Housing and Homelessness Information Infrastructure Agreement.

Under these agreements, all parties agree to ensure that the collection, compilation and interpretation of national information are appropriate and carried out efficiently. This requires agreement on definitions, standards and rules for collecting information, and agreement on guidelines for coordinating the access, interpretation and publication of national community services, health, and housing and homelessness information.

# Why use metadata standards?

## Making data count

Metadata standards promote the quality, accuracy, interpretability, reliability, relevance, interchangeability, transparency, currency, accessibility, coherence and comparability of data and information.

Without metadata standards there is the potential for data to fail to measure what it is supposed to measure, or not be comparable across collections or over time.

Metadata standards enable consistent and comparable reporting of information about services, including describing what services are available, where they are located and how much they cost. Such standards also achieve consistency when reporting about people, for instance, who delivered a service and when, who received the service, and what happened to them as a result.

By making endorsed metadata standards readily available, users are assured that they can use these standards with confidence and that the standards will enable the maximum reuse of their data for future research: 'create once, use often'.

## How are metadata standards developed?

Creating metadata standards is part of data development. Data development is the process of building a data set for a specific purpose. For example, a person might wish to build a data set that supports research into cancer diagnoses, treatment and outcomes, or that supports statistical reporting about specialist homelessness services.

Data development demands a clear understanding of why the data are needed; for example, to underpin the design and evaluation of community services policy, to assess the performance of services, or to support research into social inclusion.

It also requires an assessment of the practicalities of collecting the data. Building almost any data set will demand the assembly of data from multiple sources. Thus, there must be an understanding of the diverse information systems from which data are drawn, and there must be an effort to apply or develop common standards for concepts, classifications, terminologies, data values and so on.

The quality of data, including its consistency and comparability, is enhanced when metadata standards are used to support the collection and use of a data set.

## Metadata standards development process

### Stage 1: Project proposal

A submission is made to the relevant data committee outlining:

- the purpose and scope of the project
- a business case for adoption
- details of national consultation, including the composition of the data working group, (comprising members with expertise in the subject area of the data development project)
- the nominated project manager responsible for managing the data development project
- expected time frames for completion of the data development project.

### **Stage 2: Data development**

The project manager works with the AIHW's METeOR and Metadata Unit and the data working group to develop the metadata items that will be stored in the national metadata registry system, METeOR.

Data collected for national reporting purposes must be defined in a standardised way. The standard adopted for community services data is the International Standards Organisation's metadata registry standard (ISO/IEC 11179:2003).

For more information about the data development process, see the AIHW publication *A guide to data development*, available at: <<http://www.aihw.gov.au/publication-detail/?id=6442467947>>.

### **Stage 3: Metadata standards review**

The AIHW's METeOR and Metadata Unit undertakes a quality assurance review of the proposed metadata standards. This involves assessing all metadata standards for issues such as technical integrity, compliance with ISO/IEC 11179 and consistency with other standards, and the clarity of the content.

During this stage, the project manager receives feedback, makes adjustments and reports back to the data working group if required.

### **Stage 4: Endorsement of metadata standards**

Once a final metadata assessment has been conducted, and the METeOR and Metadata Unit has provided a certification of the quality of the metadata standards, the metadata is submitted to the relevant endorsing body for final endorsement as a national standard.

## Registration status progression

The registration status is the value assigned to a metadata item as it progresses through the standards development and review process. The registration statuses in METeOR are:

### Proposed

- A developer has submitted this item for consideration by the METeOR registrar.

### Recorded

- The METeOR registrar has conducted an initial technical review and determined that the item meets basic quality criteria.

### Candidate

- The item has been compliance checked by the METeOR registrar and is ready for further development or review by the data developer.

### Standardisation pending

- The item has undergone a final compliance check by the METeOR registrar and the data working group has recommended the item to a registration authority for approval as a standard.

### Standard

- The item has been endorsed by a registration authority as a national data standard.

### Superseded

- A registration authority has superseded this item with another standard.

### Retired

- The item has been nominated by registration authority as retired.

### Not progressed

- The item will no longer be considered by the registrar, a data committee or a registration authority.

## Who benefits from using metadata standards?

**Information managers** use standard formats and definitions to support the receipt, transfer, storage and management of data.

**Program managers** use data standards as the basis for describing information requests (that is, data required under formal service or funding agreements, and contracts); measuring service activity, client flows, client characteristics and service usage; understanding demand; better planning of services; describing unmet need (need comparability of population and survey data); and understanding ways to integrate service delivery, resulting in better targeting and usage of services and ultimately cost savings.

**Researchers** use data standards as the common language to support survey work, as well as to integrate data from other sources.

**Policy makers** need aggregated information for future policy, management and funding decisions, that is, information to support comparisons across jurisdictions, programs and sectors.

**Statisticians** use data standards for interpreting and analysing data, analysing results, linking data sets for statistical purposes, and carrying out time series analysis (over a period of time) and longitudinal studies (over a period of time within groups).

# Metadata structure

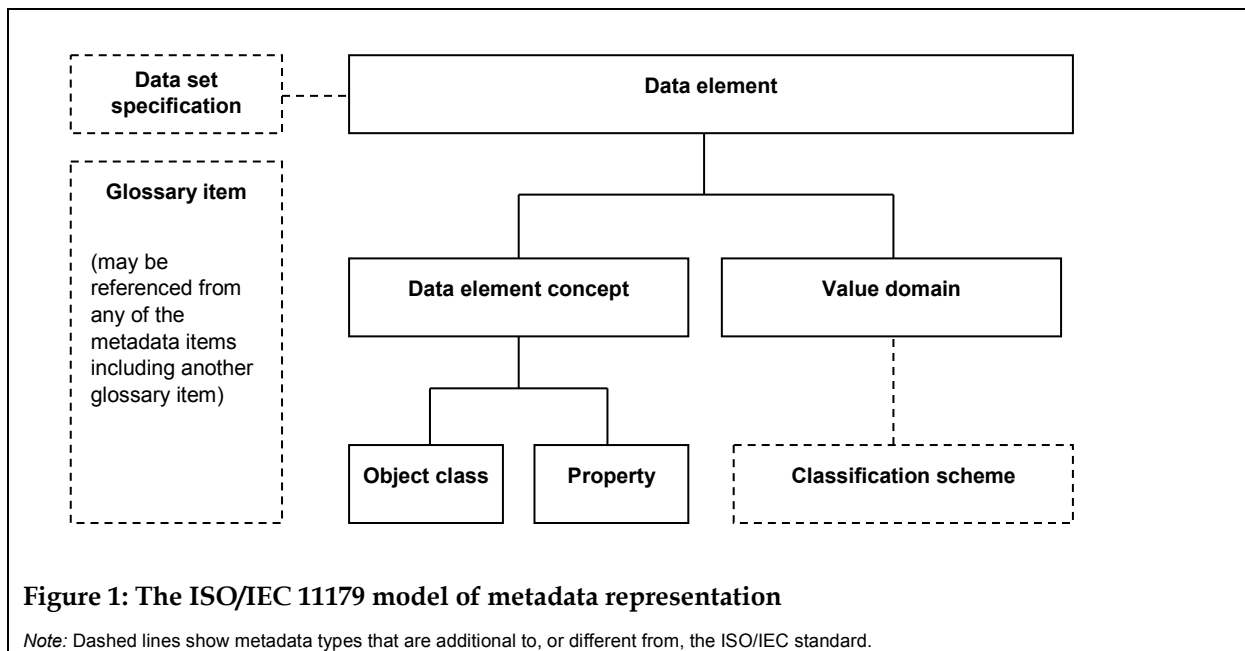

The metadata standards are based on the 2003 version of the ISO/IEC 11179 international standard for metadata registries. Part three of the standard is a model for a metadata registry and the formulation of metadata items.

There are six types of metadata defined by ISO/IEC 11179 that have been applied to METeOR and the data dictionaries:

- object class
- property
- data element concept
- data element
- value domain
- classification scheme.

The structure underlying a data element in the dictionary is illustrated in Figure 1.

## Types of metadata

**Figure 1: The ISO/IEC 11179 model of metadata representation**

*Note:* Dashed lines show metadata types that are additional to, or different from, the ISO/IEC standard.

## Components of data elements

The things that we want to know about include ideas (knowledge), persons, organisations, the environment and events. These things are termed *object classes*. Some examples of object classes are 'Person', 'Dwelling' and 'Service provider organisation'. A characteristic of the object class is known as a *property*. It is normally the item of interest. For example, the object class 'Person' can have properties such as 'Sex' and 'Date of birth'.

A *data element concept* is defined as a concept created by the union of an object class and a property. Only one object class and one property can be joined for each data element concept, for example, 'Person – date of birth'.

As can be seen from Figure 1, a *data element* is formed when a data element concept is represented in the real world by a set of values (a *value domain*).

A value domain specifies how something is to be represented. It can specify:

- the range of permitted values, for example, a measure of weight in grams represented by three numeric characters
- all permissible values as a set of codes, for example, 'Code 1 Male', 'Code 2 Female', 'Code 3 Intersex'
- all supplementary codes, for example 'Code 9 Not stated/inadequately described'
- the values referenced from a nationally or internationally endorsed classification, such as all codes in the Australian Standard Classification of Languages (ASCL) 2011, Standard Australian Classification of Countries (SACC) 2011, or all activity codes listed in the International statistical classification of diseases and related health problems, tenth revision, Australian modification, 7th edition.

A *glossary item* defines the meaning of a term within a specific context. Examples of glossary items include 'Adoption' and 'Family'. These are not currently defined as object classes but their meaning must be clarified as part of the data development process.

## Data set specifications

A data set specification (DSS) is a grouping of a number of data elements and the conditions under which they are collected. A DSS defines:

- the scope of the collection, that is, the population that is the target of the data development
- the level at which the data will be collected and reported
- whether the inclusion of each data element is mandatory, optional or conditional, and the sequence in which data elements are included.

### National minimum data sets

A national minimum data set (NMDS) is a type of DSS made up of a minimum set of data elements agreed by the national community services or health information groups for mandatory collection and reporting at a national level. An NMDS may include data elements that are also included in another NMDS.

An NMDS is contingent upon a national agreement to collect uniform data and to supply it as part of the national collection, but does not preclude agencies and service providers from collecting additional data to meet their own specific needs.

An example of an NMDS is the Specialist homelessness services NMDS, which aims to provide quality information about people who are either homeless or at risk of homelessness, and are seeking services from specialist homelessness agencies.

### Non-mandatory data set specifications

DSSs are data sets that are not mandated for national collection and reporting, but are recommended as best practice.

For example, the Diabetes (clinical) data set specification is a non-mandatory data set that aims to ensure national consistency in defining, monitoring and recording information on patients diagnosed with diabetes.

## Integration of data elements in data dictionaries

The national community services, health, housing and homelessness data dictionaries contain about 25 integrated data items that can be used consistently across the community services, health, housing and homelessness sectors. This is especially important for services that straddle sector boundaries, such as aged care, mental health, drug and alcohol services, and services for people with a disability.

Examples of integrated data items are:

[Address—address site name, text X\[\(50\)\]](#)

[Address—Australian postcode, code \(Postcode datafile\) {NNNN}](#)

[Address—complex road name, text X\[\(45\)\]](#)

[Address—complex road number 1, road number X\[\(6\)\]](#)

[Address—complex road number 2, road number X\[\(6\)\]](#)

[Address—complex road type, code AA\[AA\]](#)

[Address—level number, identifier X\[XXXX\]](#)

[Address—road name, text X\[\(45\)\]](#)

[Address—road number 1, road number X\[\(6\)\]](#)

[Address—road number 2, road number X\[\(6\)\]](#)  
[Address—road type, code AA\[AA\]](#)  
[Address—secondary complex name, text X\[\(50\)\]](#)  
[Address—suburb/town/locality name, text X\[\(46\)\]](#)  
[Address—sub-dwelling unit number, identifier \[X\(7\)\]](#)  
[Date—accuracy indicator, code AAA](#)  
[Person—Australian state/territory identifier, code N](#)  
[Person—country of birth, code \(SACC 2011\) NNNN](#)  
[Person—date of birth, DDMMYYYY](#)  
[Person—letters of family name, text XXX](#)  
[Person—labour force status, code N](#)  
[Person—Indigenous status, code N](#)  
[Person—sex, code N](#)  
[Person—year of first arrival in Australia, date YYYY](#)  
[Record—linkage key, code 581 XXXXXDDMMYYYYN](#)  
[Service provider organisation—Australian state/territory identifier, code N](#)

# Formulation of good data standards

## Box 1: Guidelines for good data standards

These seven principles are based on the ISO/IEC 11179 guide for creating good definitions. The official ISO/IEC 11179 guide can be viewed on the website < <http://metadata-standards.org/11179/>>.

1. A metadata item must have, at least, a name and a definition.
2. A metadata item can have an explicitly stated context within which the definition has meaning.
3. The name of the standard version of the metadata item must follow certain criteria:
  - a. the name must be unique within the context of the metadata item
  - b. the name must be stated in the singular
  - c. the name must reflect the concept being defined
  - d. the name must avoid the use of abbreviations or acronyms other than those widely accepted (e.g. radar, laser, pH etc.)
  - e. the name should avoid the use of words that imply a preselected single instance

### 4. Definition rules and guidelines

A definition must

- a. be stated in the singular
- b. state what the concept is, not only what it is not
- c. be stated as a descriptive phrase or sentence(s)
- d. contain only commonly understood abbreviations
- e. be expressed without embedding definitions of other data or underlying concepts

A data definition should:

- f. be expressed without embedding rationale, functional usage, domain information, or procedural information
- g. state the essential meaning of the concept
- h. be precise and unambiguous
- i. be concise
- j. be able to stand alone
- k. avoid circular reasoning
- l. use the same terminology and consistent logical structure for related definitions
- m. contain information appropriate for the type of metadata item being defined
- n. use a preferred term to represent the definition of a concept specified elsewhere in the document
- o. pass the substitution test

**5. Context should be closely linked to definition.**

**6. Information must be included in a metadata item attribute only if it is appropriate for that attribute or metadata item.**

**a. Context**

- (i) Metadata can exist within a specific context
- (ii) Only information that is relevant to the environment or framework within which the definition for the metadata item is valid must be included in the Context attribute.
- (iii) The contexts of two metadata items must be compatible when the definition of one metadata item references a term defined in another.

**b. Guide for use**

Guide for use information must be included in any metadata item only if it is intended to provide advice interpretation on how to use the particular metadata item or data collected using the metadata item.

- (i) In metadata items other than data elements Guide for use information should be about how to use the item itself and not about any data that can be collected or used.
- (ii) Data elements can also include information about how to use or interpret the data in the Guide for use.

**c. Collection methods**

- (i) The Collection methods attribute must only include information about how data is to be collected.
- (ii) The following metadata items must not have a metadata attribute of Collection methods:
  - object class
  - property
  - data element concept
  - value domain
  - glossary item

**d. Permissible values**

- (i) In a value domain the actual value meanings must be exhaustive within the set
- (ii) Be made into an exhaustive set of values by adding an 'Other' value to aggregate all other possibilities not covered by the stated set of values.
- (iii) Be mutually exclusive within the set
- (iv) Be a true representation of the concept defined in the data element

**e. Allocation of code values**

- (i) In the Value attribute of the Permissible values of the metadata item avoid the use of a code value for 'Other' that is contiguous with the last code in the sequence of permissible values or that, in any other way, do not provide for inclusions in the future.
- (ii) Wherever possible, avoid the use of a coded value for 'Other' that may be commonly used as a supplementary value.

**f. Supplementary values**

- (i) Supplementary values must not be included in a value domain unless it is necessary.
- (ii) Do not include valid permissible values in the Supplementary values attribute of a value domain.
- (iii) Avoid the use of values that are contiguous with the last code in the permissible value sequence.
- (iv) To limit variations in the meaning within a specific data collection, use a default supplementary value meaning of 'Not stated/inadequately described'.
- (v) When using more than one supplementary value, use a logical set.
- (vi) It is appropriate that the Supplementary value field size is the same number of characters as the permissible value.
- (vii) Consistent use of supplementary codes/values across the data elements in a data set should be applied.
- (viii) In non-enumerated value domains (that is those without defined value meanings such as in a measurement) the supplementary value used should not be a valid permissible value.

**7. Always use a standard format for referencing publications and not a mixture of referencing methods.**

## METeOR

METeOR is the AIHW's online metadata registry.

It integrates and presents information about:

- the National community services data dictionary
- the National health data dictionary
- the National housing and homelessness data dictionary
- national minimum data sets
- data set specifications
- performance indicator specifications.

It includes:

- metadata search and browse tools that allow navigation of data standards of varying levels of endorsement and across the community services, health and housing assistance sectors
- metadata viewing, collation and download tools
- metadata development tools, including areas in which multiple data developers may collaborate on the development of data standards
- metadata submission tools that enable data developers to submit draft metadata standards for consideration as national standards
- metadata management tools that allow the registrar to change the registration status of metadata standards under authorisation of one or more registration authorities
- comprehensive guidelines for developing and reviewing metadata.

METeOR is based on the 2003 version of the ISO/IEC 11179, Information Technology – Metadata registries. This standard was applied to provide a detailed registry architecture in which metadata standards can be better defined, navigated and managed throughout the data development lifecycle. METeOR is an internet-based application accessible through the web address <<http://meteor.aihw.gov.au>>.

## Data element technical names

Service event – accommodation period end date, DDMMYYYY .....	18
Service event – accommodation period start date, DDMMYYYY .....	20
Address – address site name, text X[(50)] .....	22
Service provider organisation – organisation identifier, NNNNNA .....	24
Household – financial assistance amount received, total Australian currency N[NNNNN].NN .....	25
Household – application date, DDMMYYYY .....	27
Household – assessable income (weekly), total Australian currency N[NNNNN].NN .....	28
Service event – assistance received date, DDMMYYYY .....	30
Service event – assistance request date, DDMMYYYY .....	32
Service provider organisation – assistance/support other than housing assistance indicator, yes/no code N .....	34
Address – Australian postcode, code (Postcode datafile) {NNNN} .....	35
Person – Australian state/territory identifier, code N .....	38
Service provider organisation – Australian state/territory identifier, code N .....	41
Dwelling – boarding house unit indicator, yes/no code N .....	43
Child – care arrangements, care and protection order code N[N] .....	45
Client – case management goal status, code N .....	48
Client – case management plan indicator, yes/no code N .....	50
Person – government funding identifier, Centrelink customer reference number N(9)A .....	53
Person – child indicator, code N .....	55
Service episode – reporting period, date MMYYYY .....	56
Service provider organisation – common waitlist indicator, yes/no code N .....	57
Centrelink income unit – Commonwealth Rent Assistance amount, Total Australian currency N[NNNNN].NN .....	58
Dwelling – housing program type, community housing code N[N] .....	60
Service provider organisation – community housing provider type, code N .....	62
Address – complex road name, text X[(45)] .....	64
Address – complex road number 1, road number X[(6)] .....	66
Address – complex road number 2, road number X[(6)] .....	68
Address – complex road type, code AA[AA] .....	70
Person – conditions of occupancy, code N .....	76
Client – consent obtained indicator, yes/no code N .....	79
Person – country of birth, code (SACC 2011) NNNN .....	81
Date – accuracy indicator, code AAA .....	83
Dwelling – date occupied, DDMMYYYY .....	88
Dwelling – date vacated, DDMMYYYY .....	89
Person – date of birth, DDMMYYYY .....	91

Person – activity and participation life area, disability flag homelessness code N.....	95
Household – disability status, yes/no code N.....	97
Person – disability status, code N.....	99
Dwelling – Australian state/territory identifier, code N.....	101
Dwelling – dwelling identifier, X[X(14)] .....	104
Dwelling – occupancy status, code N.....	105
Dwelling – permanency status, code N.....	107
Dwelling – major redevelopment indicator, yes/no code N.....	109
Dwelling – structure type, code N[N].....	111
Dwelling – tenancy management status, code N.....	114
Dwelling – tenantability status, code N.....	115
Person – school enrolment and attendance status, code N.....	117
Service episode – episode end date, DDMMYYYY .....	119
Service episode – episode start date, DDMMYYYY .....	121
Person – financial assistance amount, total Australian currency N[NNNN].....	123
Person – financial assistance type, homelessness code N .....	125
Service event – first service contact date, DDMMYYYY.....	127
Person – first service request indicator, yes/no code N.....	129
Referral – formal referral source, homelessness code N[N].....	131
Person – formally diagnosed mental health condition indicator, code N .....	133
Person (employed) – full-time/part-time status, code N .....	135
Service provider organisation – government funding indicator, yes/no code N .....	138
Address – geocode latitude, decimal degrees XN[N][.N(9)].....	140
Address – geocode longitude, decimal degrees XN[NN][.N(9)].....	142
Dwelling – geographic remoteness, classification (ASGC-RA) N.....	144
Household – greatest need date, DDMMYYYY.....	147
Household – greatest need indicator, yes/no code N.....	149
Household – greatest need reason, code N .....	151
Person – gross income (weekly), total Australian currency N[NNNNN].NN .....	155
Service event – payment type, home purchase assistance code N .....	157
Service event – assistance type, home purchase assistance code N[N].....	158
Household – homeless prior to allocation indicator, yes/no code N .....	160
Person – need for assistance with activities in a life area, disability flag homelessness code N.....	161
Household – Australian state/territory identifier, code N.....	164
Household – household composition, housing assistance code N .....	166
Household – household identifier, X[X(14)].....	168
Household – Indigenous status, yes/no code N.....	170
Household – gross income (weekly), total Australian currency N[NNNNN].NN.....	172
Household – weekly rebate amount, total Australian currency N[NNNNN].NN.....	174

Household – application type, housing assistance code N .....	175
Dwelling – housing program type, (public housing/SOMIH) code N.....	178
Person – assessable income (weekly), total Australian currency N[NNNNN].NN .....	180
Income unit – income unit identifier, X[X(14)] .....	182
Person – Indigenous status, code N .....	183
Person – labour force status, code N .....	187
Service event – last service provision date, DDMMYYYY .....	191
Person – letters of family name, text XXX.....	193
Person – letters of given name, text XX .....	196
Address – level number, identifier X[XXXX] .....	199
Person – living arrangement, homelessness code N.....	201
Address – location descriptor, text X[(50)] .....	203
Address – lot number, identifier X[XXXXX].....	205
Household – main language other than English spoken at home, yes/no code N.....	207
Service provider organisation – housing maintenance expenditure, total Australian currency N[N(8)].NN .....	208
Dwelling – weekly market rent value, total Australian currency N[NNNNN].NN.....	209
Household – market value of rent paid indicator, yes/no code N.....	210
Person – mental health services received indicator, yes/no code N.....	212
Person – mental health services received timeframe, code N.....	214
Organisation – net recurrent administration housing expenditure, total Australian currency N[N(9)].....	216
Organisation – net recurrent operational expenditure, total Australian currency N[N(9)]	218
Household – new allocation status (financial year), code N .....	220
Person – new client indicator, code N .....	222
Service provider organisation – waiting list, total people N[NNN].....	224
Dwelling – number of bedrooms, total N[NN] .....	225
Service provider organisation – number of boarding house buildings, total number N[NNN].....	227
Service provider organisation – number of boarding house rooms, total number N[NNN].....	228
Service provider organisation – number of boarding house units, total number N[NNN].....	229
Service provider organisation – number of head leased dwellings, total number N[NNN].....	230
Dwelling – number of households, total N[N].....	231
Dwelling – number of occupants, total N[N].....	232
Person – number of people in the presenting unit, total N[N].....	233
Dwelling – number of tenancies, N[NN].....	234
Dwelling – number of tenancies at full capacity, N[NN].....	235
Service provider organisation – number of tenancy rental units, total N[NNN].....	236

Service provider organisation – organisation identifier, X[X(14)] .....	237
Service provider organisation (name) – organisation name, text X[50].....	239
Service provider organisation – tenancy management status, code N.....	241
Client – reason case management plan does not exist, text [A(50)].....	242
Person – reason for seeking assistance, text [A(50)].....	244
Person – relationship to the presenting unit head, text [A(50)] .....	246
Service provider organisation – support service type, text [X(40)].....	248
Person – person identifier (household), X[X(14)] .....	249
Address – physical address indicator, yes/no code N.....	251
Address – postal delivery number, identifier [X(11)].....	253
Address – postal delivery service type identifier, code AA[A(9)].....	255
Person – previously homeless status, code N.....	257
Household – principal source of cash income, community housing code N.....	259
Household – principal source of cash income, (housing assistance) code N[.N.N].....	261
Person – principal source of cash income, code NNNN .....	263
Person – principal source of cash income, code N[.N.N.N].....	265
Person – principal tenant indicator, yes/no code N .....	267
Service event – assistance type, private rent assistance code N[N] .....	268
Client – reason case management plan does not exist, code N.....	270
Person – reason for seeking assistance, homelessness code N[N] .....	272
Person – reason services not provided, code N[N].....	278
Household – rebated rent status, code N .....	280
Person – previously resided in institution/facility indicator, code N .....	282
Service provider organisation – net recurrent housing expenses, total Australian currency N[N(8)].NN .....	284
Service provider organisation – total recurrent housing expenses, total Australian currency N[N(8)].NN .....	287
Person – registered/awaiting government payment indicator, code N .....	289
Person – relationship to the presenting unit head, code N[N] .....	291
Person – relationship to reference person (household), code N.....	295
Person (income unit member) – relationship to reference person (income unit), code N..	297
Household – rent charged (weekly), total Australian currency N[NNNNN].NN.....	299
Household – rent paid (weekly), total Australian currency N[NNNNN].NN.....	301
Person – residential type, homelessness code N[N] .....	303
Address – road name, text X[(45)] .....	306
Address – road number 1, road number X[(6)].....	308
Address – road number 2, road number X[(6)].....	310
Address – road type, code AA[AA] .....	312
Address – secondary complex name, text X[(50)].....	318
Service episode – service cessation reason, homelessness code N[N].....	320

Service episode – service ongoing indicator, code N.....	323
Person – service requested, homelessness code N .....	325
Person – sex, code N .....	327
Person – household single/couple status, code N .....	331
Person – source of information on a mental health condition, code N .....	333
Person – source of information on a mental health condition indicator, code N.....	336
Person – source of cash income (all), code NNNN.....	338
Person – source of cash income (all), housing assistance code N[.N.N.N] .....	341
Record – linkage key, code 581 XXXXXDDMMYYYYN .....	344
Person – student/employment training indicator, code N.....	346
Person – student type, code N .....	348
Address – sub-dwelling unit number, identifier [X(7)] .....	351
Person (address) – suburb/town/locality name, text [A(50)].....	353
Address – suburb/town/locality name, text X[(46)] .....	355
Client – referral arranged, homelessness activity type code N[N].....	358
Service provider organisation – support service type, code N[N].....	361
Client – service activity type needed, homelessness activity type code N[N] .....	364
Client – service activity type provided, homelessness activity type code N[N].....	367
Service event – supported accommodation type, code N.....	370
Service provider organisation – survey response indicator, yes/no code N.....	372
Dwelling – tenancy rental unit identifier, X[X(14)] .....	374
Service event – tenancy end date, DDMMYYYY.....	375
Service event – tenancy start date, DDMMYYYY .....	377
Dwelling – number of tenantable vacancies, N[NN] .....	379
Person – housing tenure type, homelessness code N .....	380
Person – time elapsed since last permanent residence, code N .....	385
Service provider organisation – gross capital expenditure, total Australian currency N[N(8)].NN .....	387
Service provider organisation – total household rent collected, Australian currency N[N(8)].NN .....	389
Service provider organisation – number of improvised dwellings managed, total N[NNN].....	391
Service provider organisation – number of permanent dwellings managed, total N[NNN].....	392
Service provider organisation – total household rent charged, Australian currency N[N(8)].NN .....	393
Household – transfer status (financial year), Yes/no code N .....	395
Person – type of institution recently left, homelessness code N[N].....	397
Client – service activity type, homelessness code N[N].....	399
Address – unstructured address line, text X[(50)].....	402

The National housing and homelessness data dictionary (NHHDD) provides national standards for the housing and homelessness sector. The dictionary replaces the National housing assistance data dictionary (NHADD) which was last published in 2006.

It includes data set specifications and data elements for Specialist Homelessness Services, public housing, state owned and managed Indigenous housing, community housing, Indigenous community housing, home purchase assistance, and private rent assistance.
